Then you will learn the techniques to allow your consciousness to leave your body and safely explore the astral plane. With this book in hand you can explore the spheres you have only dreamed of. Make your dreams come true. From the publisher: A few years ago, I asked Denning and Phillips, two of the most famous and experienced occultists in the world, to make a series of books on lonely topics. What they wrote was nothing as a miracle, and more than half a million people used their books. I don't think anyone but Denning and and could have done it. One of my favorites from the Llewellyn series is a practical guide to astral projection. I like it because while many people talk about astral projection skills, few actually learn to project on their project. This book gives you clear, step-by-step instructions so you can do it. There are a few things you need in order to be able to astral the project. First, you have to be comfortable with the idea. What if you can't come back? What if someone disturbs your body while you are out of it? What about the astral bounce? Denning and Phillips answer all these questions and show you that astral projections are not only safe, but also natural. Next, you must learn the mental and physical techniques needed to project your consciousness out of your body. The book fully describes everything you need to do. And it does so in a way that is easy to follow, understand and practice. The result is that you will be able to project your consciousness out of your body of your choice. But what do you do when you are on an astral plane? This book gives examples and tips on what you can do to improve your life and other people's lives, or just experiment, explore and have fun. If you have tried an astral project in the past without success, I urge you to get this book. Here you will find the tips and secrets of two occultists who have been working with astral projection for decades. For some time you'll find that you can do this, too.
