There are several options to help you when cooking, but one of the most sought after is the electric pressure cooker, which in addition to saving you a good time while preparing a wide variety of foods also gives you more security. There are some very useful features are not present in these these and make them much more useful than a regular pot, but of course also more expensive. Many people are afraid of pressure cookers, as it is often possible to see accidents involving them, but with electric models you can be carefree because they have several systems to detect any type of problem, whether high pressure, above average temperature among others in when detecting these problems, automatically pan shut down alone. As we said, practicality is also a very important factor in this device, as they have many interesting features. You can use the Timer feature to set when they will start cooking, and once you're done, you don't have to worry about going in and off it since they do it yourself. In addition, they are also easy to clean pans, as they have a nonstick interior finish that prevents the food stick. There are other differentiated features that you won't have in a total pressure cooker, such as the ability to fry and fry food, having the schedules ready, changing the level of pressure among others. To let you know what the perfect pot size is for your home, just use the formula of the number of people in the house No.1, that is, if your home has 4 people, then a good pot with five liters of power. Without further winding, check out our list with some of the best electric pressure cooker models on the market. We have different options of all sizes, prices and with a variety of functions. Perfect for those who don't need much power, this Britannia model is a very cheap option for you looking for an electric pressure cooker. Just like other models on the market, it has a timer function, so you can put the food, schedule time for it to start and go do other things that it will cook on and off on its own, including keeping your recipe warm for a while. It has a non-stick interior for food to not stick to the sides of the pan, except that some safety features such as automatic disconnection in case of unusual temperature and protection from excessive pressure. It's also an easy-to-carry model, as it has side handles and a handle on the lid for the convenience of opening it. Features: 3 liter capacity It has a timer function to keep food heated interior with non-stick coating Safety mechanisms against pressure and high temperature handles to facilitate the transport of Best Price Fun Kitchen is also a model with a more affordable price, but it has a power of 900W and a capacity of 5 five liters, so it's a good option for those who don't want to spend too much, but you're going to use it often. Like this others on the market, it has some recipes already programmed, so you don't need to continue researching about the ideal cooking time or what pressure you should use because it already does it all alone. Another quality of this model is that all its exterior is stainless steel finish, which provides great durability for the product. In addition, he has a smart memory, so if the power runs out and comes back within five minutes, he will continue the cooking process where he left off. In total there are up to 8 features already programmed, but you can also adapt them according to your personal preferences. Features: External stainless steel design with non-stick interior trim 5 litre capacity It has an intelligent memory of 8 functions already programmed, which can be configured can be used for saute food, with an open lid It has three safety mechanisms It is one of the most basic philco models, with only 4 liters of power and 800W power, but make no mistake, because although it is more simple, because although it is more simple, because although it is more simple It delivers great performance. Its bathtub is removable and has a non-stick finish, so cleaning here is a very simple task. In addition, it has 4 safety devices as well as internal temperature control, which turns off the pan automatically if it is larger than usual. Its panel is analog and already has five recipes programmed, including rice, beans, meat, porridge and soup. Three different lights indicate the type of work and also show if it acts in heating mode, which causes the food to remain warm even after it has already been cooked. Features: 4 liter capacity It has 4 safety sensor devices to determine the internal temperature and turn off the pan if it is necessary analog button to choose one of 5 recipes already programmed LEDs to indicate the active features of the Removable Tub covered with non-stick material Best Price If you do not mind having a little less features, maybe pay a good price buddy Pratic Cook, from Mondial. It is an option that has 5 liters of power, but has a non-stick interior coating, for food not to stick to the sides, in addition to the exterior stainless steel finish, which gives more durability, ease to clean and of course and of course too much touch to the beauty of the pan. It already has 6 ready-made schedules, including meat, beans, chicken, soup, vegetables and rice. You can schedule a start for each of these features in the future time up to 24 hours, so the food is ready just as you want. The digital panel shows information such as the remaining cooking time, or what is not enough to get started, as well as it is clear what function is currently Features: It has 5 liter capacity parts that can go into the dishwasher's stainless steel exterior trim and the internal non-stick safety valve on the cover of the Spoon holder digital panel to show the information Timer Feature Best Price Master Cooker is a more complete version of the other mondial electric pressure cooker that we mentioned earlier. In addition to the larger capacity of five liters, it has a total of 14 functions for you to prepare different types of food, from vegetables, seafood and even cake! Its lid has an ergonomic handle and does not suffer from the thermal effect of the pan, which also has lock safety. It has a digital display to show what feature is used as well as the time left for your recipe to be ready. You also have available timer technology to program when the pan starts cooking, in addition to keeping your recipe warm even after completion. Its stainless steel and interior is made of non-stick materials. Features: 5 litre capacity External stainless steel finish and interior with non-stick material 14 different features has a timer function to hold a heated lid with the handle Best Price One of the most affordable options with six-liter capacity Midea PPA72. The company emphasizes its security system as one of the strengths of this bank, as there are 9 different devices operating in this part. This system can disable any function if it detects something abnormal, assessing the well-being of the family. Its design is robust, made of stainless steel brush, and has a non-stick inner container, for easy cleaning. There are 4 ready-made schedules, with the ability to create your own. In addition to cooking, it can also bake, fry and fry, making it a very complete and versatile option. The small display shows how much time is left for the meal to be ready, and when finished, it will continue to heat up. You can use the timer function for the program when the pan starts working, so you don't have to stay close to call it. Features: Six litre containers of 4 recipes already programmed stainless steel construction with a non-stick internal display to show how long before food is prepared 9 safety devices Keep food warm Can fry, bake or fry also Best Price Britannia has a good variety of electric cookers for a wide variety of needs. This model has 5 litres of capacity and has more features than the option mentioned at the beginning of the text, of course, all at a slightly higher price. One of its highlights is the removable cable, which provides the opportunity take it to the table without serious problems. There are up to 10 different schedules for a wide variety of foods, including rice, beans, different types of meat, porridge, soup and others. It has a post-heating function that keeps the food warm once it is ready. Its body is made of brushed steel with a non-stick container, making it durable and easy to clean. The digital dashboard is responsible for displaying all the information of the moment as a chosen function, while remaining, in particular, the time of the production. Features: 5 litre capacity It has a removable cable External finish in brushed steel and the interior non-stick 10 different graphics Postheating function has the safety of the timer against the high pressure and temperature of the Best Price A PP01, from Arnaud, stands out among the pressure cookers across a wide range of foods that it can prepare. According to the manufacturer, there are up to 21 different recipes, all of them described clearly and easily in the book that accompanies the pot. It is a very compact model, despite having a capacity of up to 5 liters, so you can find a place in your kitchen very easily. Its design is not a strong point, but the PP01 has a large stainless steel finish on the outside and is covered with non-stick material domestically. It has seven automatic programs, in addition to the function of keeping food warm even after it is ready. Features: 5 litre capacity prepares up to 21 different recipes and has a book to teach instructions External stainless steel and interior with non-stick material Function to keep warm It has handles to facilitate in transport Up 7 graphics already ready Cadence is a brand of very strong appliances from Brazil, so that it can not be left out of our choice of electric pots. Sabore is a model that combines basic stainless steel designs with some of the red parts typical of the company. Assessing consumer welfare, Cadence has placed 8 different security devices so that in case of problems your bank has already closed on its own without any accidents. In the function part, there are up to 6 options already programmed, from cooking beans to cooking meat. You can manually set the cooking time of each recipe to reach the optimum point, and you can also use the timer function to make it programmed to start cooking at a certain time. Once the food is ready, it shuts down automatically, but keeps the food warm. Features: The 4 litre non-stick interior-building stainless steel finish up to 6 features already programmed keeps food warm after From preparing 8 devices to ensure its Safety Best Price Going vs. other models, Philips is betting on a more classic look for the Daily Collection, which has a stainless-brushed steel finish that makes it durable and durable. It has an analog button in the middle to control all 10 of its schedules, in addition to three different cooking options. Its total capacity is 5 liters, which is on average on the market and enough for a family of 4 to 5 people. . It also has heating technology, so even with its ready-made food, it will continue to heat up to six hours. Cleaning this electric pan is easy, as it has a full non-stick interior, with a white-circuited gold coating that also provides scratch protection. Features: The capacity of 5 litres 10 graphics is already ready 3 types of cooking different pressure control mechanisms to control the pressure and temperature nonstick interior with a scratch stainless steel finish Best Price A PPPV is a good option from Philco and has a modern and flashy design, all in red. Speaking of modernity, it also brings very interesting features to at least 14 different schedules, so you can cook a wide variety of foods, from rice, meat, vegetables to even seafood. You don't have to worry about eating nailing on the sides, as its interior is all made of non-stick material. A very interesting feature is the cooking mode, which allows you to use the pppv with an open lid, something that is very useful for cooking, for example. It has an automatic disconnection, but like other models on the market, they have the function of keeping food warm for a certain time. Features: It has 6 litres capacity up to 14 charts already ready Cooking function Saute Food Automatic Shutdown and keeps food heated interior nonstick temperature and pressure control has security locks has a digital panel Best Price One of the best options on the market is PCC 20, as it combines good design, modernity and a good number of features. Its exterior finish is made of stainless steel brush, but inside it has non-stick walls, so the food doesn't stick and is easier to clean. It has three levels of pressure intensity, allowing the consumer to prepare different types of food and leave them at the right point. The PCC20 also has a timer function, so you can schedule it to start cooking within 24 hours. With the Buffet feature you keep your recipe warm for 2 hours after In total, there are 15 pre-programmed modes, and you can track the remaining cooking time and the pressure used by the digital panel that it has. Features: The exterior finish in the stainless steel brushed non-stick interior 3 pressure level 6 liters capacity 15 different graphics has a timer function to keep the food warm Best Price Viva Digital is part of the philips line a little more premium. It has 5 litres of capacity and 11 custom menus that include cooking rice, beans, vegetables, potatoes, soup, chicken, pork, beef, fish and even pudding! Don't have what you want to prepare between these options? Don't worry, it has a button my recipe for you to create your own configuration. According to the brand it has an intelligent cooking system, with a computerized program that monitors the temperature and the ideal time for eating to stay in the right place. Another positive thing is that this pan is easy to clean because in addition to the non-stick finish on its inside, it also has a removable lid. Features: 5 litres capacity 11 custom menus 8 security systems while preparing recipes Intelligent system to choose the best temperature and time for your recipe Integrated Digital Display Postheating feature has Timer Removable cover Best Price As we said at the beginning of this publication, electric pressure cooker will make your life even easier in the kitchen, in addition to also giving more security. However, there are other appliances that you can purchase to make the task of cooking smoother and faster. The purchasing guide produced the best readings of several other appliances, including faucets, coffee makers, electric kettles, and cookers. ovens, electric fryers, electric ovens, refrigerators, blenders, bakers, electric pipe-airs and even toasters! © 2020 - Buying Guide - All rights reserved.
