When mice and men were forced out of the ks4 curriculum in 2015, the next on many teachers made before death hitlists was inspector calls. Even the most beloved texts struggle to justify reading or watched year after year, not to mention studied day after day for weeks at a time, usually at least a few students who have no idea why the person at the front of the class extols the text in hand. However, the inspector urges to endure. Proposed by the ACA, Edexcel, Eduqas and OCR, it remains the most used text in the post-1914 prose/drama unit. Given its ubiquity and longevity in the GCSE curriculum, you would be forgiven for thinking that there is no need for another revision guide; We respectfully ask to disagree: introducing our inspector calls for a revision guide for GCSE English... Explaining the eternal popularity of Priestley's play with our inspector calls for a Revision Guide just as Shakespeare can be adapted for all time, so can the inspector. Yes, Birlings are products in the early twentieth century, and many productions resemble outdated period pieces, but let's not forget that Priestley used the pre-World War I setting as the front for postwar discourse. Fast forward another 75 years and coronavirus, climate change and globalization give the theme of interconnectedness a fresh spin. The Inspector's message that we are members of the same body is perhaps more relevant today than ever. While our leadership goes to great depth in the context of a growing welfare state, it also draws lines through history, helping pupils understand why Priestley used the past to comment on his present and how it relates to the present. Instead of being callous to play from a bygone era, it becomes a text that speaks here and now. Think of how much fun you might have in class with the notion of Inspector Goole as a Doctor Who type of time traveler, popping up at various points in history to clear up the mess that humanity has made! Caution's Tale is an additional resource of the class that dramatically brings home to the teen the universal nature of Eva's demise. Does the inspector only require lower ability? Let's be honest, one of the big selling points of the inspector is its relative simplicity. It can be read in 90 minutes, and even the reluctant boys attention covers the duration of a football match. It happens in one place with a limited composition all of which are ciphers for Priestley's teachings. At the lowest level, there isn't too much to get your head around. For those whose minds are struck by the revelation that Inspector Goole can be spectral, the Chain of Events summarizes summary and topics are explained in a nutshell. This information is designed to stand out so that lower readers' ability to access key points, even if they gloss over everything else. An interactive glossary also helps them understand a more complex language. However, those who aspire to ninth grade are equally well served. Taking in feudalism, feminism, social realism and futurism, there is plenty here to challenge the grey matter. Students are guided through great ideas, but the point of thinking stimulates independent thought, so they don't produce replica answers that experts have heard a million times before. After all, when so many students take the exams in this one text, it is even more important that higher abilities be able to distinguish their ideas from the rest. Everything that should be ready for the exam, as with our other revision guidelines, is all carefully designed around GCSE assessment goals without working on it. First of all, we want students to know the brilliance of the text they are learning, which is wrapped in beautiful illustrations. However, we also want them to succeed in a highly charged exam scenario, so the information is organized around thematic exam questions, complete with key quotes from all over the text and annotated sample responses. We are here to help those who teach, so take a look at the inspector calls fresh-eyed and fall in love with it over and over again, and then share your passion and our resources so that your students see it in the same light.
