Android: Google for Android has picked up some new features today, including the ability to switch between Google accounts more easily, manage Google pages, access all your photos and videos stored on Google Drive from the Google app, and more location sharing options to keep up with your friends. For Google users who run a business page, moderate the Google community, or have multiple Google accounts, the update is great news. Replacing your id is a simple matter now, and as long as you have a personality on your Android phone, the Google app makes it easy to switch between them. In addition, all your videos and photos stored in Google Drive are now available from the Google app, and you can share them with a few taps. Also, if you like Google's new auto enhancement features, you can apply it to all your photos. Google gets some mind-blowing new features to make your images awesome and help you manage... More Financial, location sharing has received an update as well, and you can share your specific location or city level with others if you want. You can do it in a circle-based manner, or you can share it publicly, depending on what you choose. It's a bit of a bone for people sad about losing Google latitude, and while it's still no substitute, it's a useful feature. These are not the only features to go to the new android app. You'll also get some more minor changes, such as a pull to update, and a few other interface changes to make it easier to move between views, share media, and keep up with what others are posting. The update will roll out to Google Play over the next few days, so if you don't see the update right away, check back a little later. Google (free) Google Play via Virgil Dobjanschi Update: March 13, 2020 (3:59AM ET): We updated this list with instructions on how to incorporate dark mode into several Google apps, including Google Assistant and Google Play Store.A system dark theme dropped from Android 10. While Google apps are automatically adaptable in some cases, others must be manually switched. Let's see which ones officially have a dark mode and how to turn on each one depending on your device. Google Dark Mode appsEditor Note: We will update this list as Google updates more apps with dark mode support. How to incorporate dark mode into Google Assistant on many Android devices, Google Assistant should follow your system preferences for dark mode by default. If Doesn't support the dark mode of the system, you can also switch it manually or allow it to adapt depending on the battery mode of the device. The Discover page found on the left side of many Android devices' home screens must follow your system light/dark preferences, regardless of google Assistant app settings. Either way, here's how to manually incorporate dark mode into Google Assistant.Open Google Google Application. Click more with three points in the bottom right corner. Click Settings.Then select General.Scroll down, and click Theme.Depending on your device, select Dark, System Default, or Install Saver.How to turn on the dark mode in Google CalculatorBy default, Google Calculator app changes its theme based on your system preferences. However, there is an easy way to do this so that the Calculator app displays dark mode at all times: Open the Calculator app. Click on the three points in the upper right direction. Click Select Theme. Choose Dark.How to turn on dark mode in Google CalendarAs with the Calculator app, the Google Calendar app changes themes based on your system's dark mode preferences or battery life. However, you can go to the app settings and turn on the dark mode. Here's how: Open the Calendar app. Click on the burger icon at the top left. Click Settings at the bottom. Click General.Tap Theme.Depending on your device, select Dark, System Default, or Set on the Saver.How to turn on dark mode in Google Chrome, The Google Chrome mobile app can change dark themes when either system dark mode or battery life is on, or you can change it manually. Here's how: Open the Google Chrome app. Click on the three points in the upper right direction. Click Settings.Under Basics, click Themes.Depending on your device, select Dark, System Default, or Set on A Saver.How to turn on the dark mode in Google ClockRelated: 10 best app watches and digital watch apps for AndroidGoogle Watch already allows dark mode by default, without the possibility for an easy theme. However, there is a way to include an even darker dark Google mode for the app's screensaver: Open the Watch app. Click on the three points in the upper right direction. Click Settings.Swipe down until you get in the screen screensaver section. Click Night Mode. How to enable Google's dark default Google ContactsBy mode, Google Contacts automatically includes a dark theme when it's installed across the system or when battery-saving mode is enabled. However, you can manually turn on the dark mode: Open the Google Contacts app. Click on the burger icon at the top left. Click Settings.In display section, click Select Theme. Depending on the device, choose Dark, System Default or Set by Battery Saver.How to turn dark mode into Digital Wellbeing Believe it or not, the Google Digital Wellbeing app also comes with dark mode. In order to turn it on, you just need to change the theme of the device in a dark mode or turn on the battery-saving mode and Digital Wellbeing will follow suit. How to turn on dark mode in Google Drive As in a number of others Google, Google Drive can change themes either when the dark mode is turned on throughout the system, or when the battery economy mode is turned on. You can also manually customize it to a dark theme. Here's how: Open the Google Drive app. Click on the burger icon at the top left. Click Settings.In theme section, click Select Theme. Depending on the device, choose to By default, or Set on the Saver.How to turn on the dark mode in Google Duo Like Google Drive, users can either install a dark Google Duo mode to trigger when it turned the system wide when the battery saver mode is turned on, or they can manually install it. Here's how: Open the Google Duo app. Click on the three points in the upper right direction. Click Settings.Tap Select theme. Depending on your device, choose Dark, System Default or Set by Battery Saver.How to include dark mode in Google File files based on the dark settings of Google theme vary depending on which version of Android you have. If your Android version supports a system dark theme such as Android 10, the files should follow suit. If not, you can follow these steps. Open the files with the Google app. Click on the burger icon at the top left. Click Settings.In the Other Settings section below, click Dark Theme. How to incorporate dark mode into Google Discover feedSitting on the left side of the main screen, the Discover channel now has a proper dark mode. Unfortunately, there is no way to manually turn it on - the dark theme is automatically kicked when you have dark wallpaper or certain display settings. Here's hoping that Google will allow you to manually switch between light and dark modes in a future update. How to incorporate dark mode into Google FitAs version 2.16.22, Google Fit has a dark mode. With the update. Now you can choose the theme of the app to be light, dark, or automatically switch using the battery screensaver. Open the Google Fit.Tap Profile on the bottom line of navigation.
