This is the official app that allows you to watch videos from the Internet directly on Android. YouTube works just like its web version: subscribe to channels, search videos, see recommended videos, share videos and that it also has voice search and instant search suggestions. You can also throw videos on the TV, comment on videos, and also loved and and them and let the world know how you feel about said video. Enjoy watching YouTube videos for Android. Check out Tom's Guide for more information android and Android Games. Also check out the forums for Android. Download video editing is one of the hardest tasks a device can perform. On computers, it requires decent specifications, tons of RAM, tons of storage, and some know-how on how to make it work. Phones don't have the specification or power to replicate experiences like Final Cut Pro or Adobe Premiere Pro. However, some apps can do basic things very well. It's even good enough for some pro vlogging with some patience. Here are the best video editor apps on Android, at least until Premiere Rush CC does it on Android. You can also click here to see the best video editors on most platforms! ActionDirectorAdobe Premiere RushFilmoraGoFunimateInShotKineMasterMovie Maker FilmmakerPowerDirectorikVivaVideoPrice: Free/\$3.99ActionDirector is one of the most popular video editing apps on PC. It is also available on Android. He's doing the basics. You can import clips, edit them and visualize videos. You can do things like add your own music, trim and cut videos, add text, use slow motion, and more. This is one of the few apps for video editor who also supports 4K video. Developers have a great tool connected in the Google Play Store to see if you can. It also receives frequent updates. Adobe Premiere RushPrice: Free /Up to \$53.99 per month Atbe Premiere Rush is one of two above-average Adobe video editor apps. Another Adobe Premiere Clip, which is closer to a standard mobile video editor. Anyway, Adobe Premiere Rush is one of the new video editor apps on the list, and that's pretty good. It comes with plenty of must-have features, including multichannel timing, cloud synchronization, and some advanced editing tools. The app still needs some user interface work and some bug fixes, but it does have a ton of potential. It's also included in the Adobe Creative Cloud subscription, so it's worth a try if you're using this service already. FilmoraGoPrice: Free /\$7.99FilmoraGo is the video editor of the Wondershare app. This is easily one of the best video editor applications. This video editor packs whallop. You can make basics like trim and cut, visualization, and the like. It also includes the ability to play backwards, to do video (1.1) for Instagram, and 16:9 videos for YouTube in particular. It also has support for things like slow motion, transitions, music, overlays, and more. It's not half bad for what you get. There are in-app purchases that add to the power. However, most features are, in fact, free. Funnimate Video EditorPrice: Free with in-app purchasesFunnimate is one of the surprisingly popular but not too powerful video editor apps. It is positioning itself as a great app for music videos or simple videos of things you already have on your device. There are 15 video filters that you can play, and the process of creating is pretty painless. This is not something you would want to use on a serious video. It has things like video effects. However, it's better for short little posts on social media rather than actual video production. You can download it for free to try it yourself. InShotPrice: Free/\$2.99 per month/\$9.99 per year/\$29.99 timesInshot is a super simple video editor with a heavy focus on things like filters, video trimmings, and short videos. It has a fairly simple timeline editor with multiple video and audio channels. You will also get basic tools such as pruning, a selection of music, and various other little things as disappears in and out. Its toolkit, sticker packs, speed control and other features make it great for things like YouTube, TikTok and similar platforms. We also love how it has one price tag along with its subscription in case you want to go down this path. KineMasterPrice: Free/\$4.99 per monthKineMaster is one of the most powerful video editor apps available, and one of the first. You can do the basics like most of these other video editors can. However, this includes several videos, images and effect layers. In addition, there are audio filters, chrome key (for your green screen fans out there), various video effects, transitions, and more. It's not as powerful as a full desktop editor. However, this is getting much closer than most other competitors. We would recommend this for actual video production (at least for things like YouTube). You can use it for free in trial mode for a while. However, you need a \$4.99 per month subscription to get everything forever. Filmmaker FilmmakerPrice: FreeMovie Maker Filmmaker among the best free video editor apps currently available. You'll be able to trim, trim and reorder video content, as well as install focal points. The app also boasts a variety of video effects and you can create your own custom filters, although this functionality is not surprisingly powerful. It also has other basics like music. The app has struggled with some bug problems since it's a major redesign, but it's still one of the best video editing apps out there. It's also completely free with ads. PowerDirectorPrice: Free/\$5.99PowerDirector is one of the most comprehensive video editor apps on this list. It comes with a ton of features, including quick editing tools, various effects and other tools, and Even comes with things like collage maker and slow motion support. The interface is relatively easy to work with and uses the classic timeline editor method. It should be more familiar to those who often edit videos. It's free to download and use, but you need to fork out extra money to get all the features. It's This. for a real video editor, especially for big screens such as Chromebooks or tablets. KvikCena: Frikwick is a new generation of applications for video editors. It's halfway decent if you need something simple. As it works, you add up to 50 photos and video clips to the app. The app then analyzes them and spits out a short video from them. The quick contains about two dozen video styles, and you can re-order and customize the video before you export it. It's not as powerful as something like Adobe Premiere Clip or PowerDirector, but not everyone needs something intense. It's free to download without shopping in the app. VivaVideoPrice: Free /\$3.99VivaVideo is one of the exceptionally popular video editing apps. In practice, however, it is a very mid-road video editor. It works especially well for short clips for social media. The app uses storyboard style editing where you upload clips, edit and crop them as needed, and then move on to the next segment. It includes more than 200 video filters and various other effects, typing, as well as fast and slow motion support. VivaVideo has a free version that comes with a watermark and a time limit for any video. You can remove these restrictions by buying a pro version.
