Nocturnos de John Connolly es un libro de relatos de terror en los que podemos encontrar algunas de las tapizadas situaciones de las historias m's cl'silo del autor irland's y con una caracter'istica a la dada: el cadeo del Libero son nueve relatos escritos para ser narrados en la radio y, ciertamente, apetece leerlos en voz alta, al lado de un buen fuego y con poca luz, esperando llegar al final de cada relato para poner cara de sus ... Leer Post completo - Home - About Reviews on Request Send John Connolly is the bestselling author of several thrillers featuring private detective Charlie Parker, and most recently a terrifying supernatural standalone thriller called BAD MEN. NOCTURNES is his first collection of short stories and short stories, most of which appear in print for the first time. It's a real treat for Connolly's fans. Among some of the stories inside this anthology is Erking, a scarier take on children's tales at night; Nocturne, an obsessive story involving a murdered family and a piano; and the oven room, the story of revenge and ultimate retribution. Depending on how seriously you take each story some of them can cool your spine with stories of ancient evils, ghosts, demons, and everything between the supernatural world. The main problem is that most of these stories don't translate well into writing. They are designed to be fulfilled, and most of them have appeared previously on BBC radio, making them good and scary fire stories. Reading them for their entertainment does not provide the same influence as listening to stories. Most of them follow the same pattern where something terrible happened, or is about to happen, and by then all hope is forever lost (such as The New Daughter). The sale of this book is mainly in relation to John Connolly's fans, who are already familiar with his type of work. Fans won't be disappointed, as there's a new and disturbing Charlie Parker novella provided in this book called Reflective Eye. He doesn't give anything new. Connolly is better understood in writing novels than he does with stories (unless they're read aloud). Try at your own risk. Reviewed by Angel L. In this eerie collection, echoing the master by M R James Stephen King, Connolly Connolly our darkest fears are lost lovers, missing children, underground creatures and predatory demons. The framing collection of two essential short stories - Cancer Cowboy Rides charts the fatal progress of a modern grim reaper, while Reflective Eye is a haunted house tale with a twist and marks the return of private investigator Charlie Parker, the troubled hero of Connolly's Crime novels. The perfect antidote to the Christmas greeting, Nocturnes is a virtuoso volume that will be read with lights on - the threat has never been so seductive... No matter how hard the editor tries, and even if the editor is the most respected Ellen Datlow or Barbara Roden, who knows the demands of working carefully, there are bound to be clunkers, often produced by so-called big names whose lower-rated (sometimes frankly scary) efforts get incorporated are only to give the book a selling character in a niche market, and who, along with OK or acceptable stories, drag the entire book in this way that the book gets remembered not because of outstanding stories, but as such if one author of the collection is an author who has proven his storytelling abilities either in genre or elsewhere, there is a chance that among a dozen or so stories in the collection, there would be disconnected memorabilia of them, and even if there are a few wrong un-s, they will still be higher compared to the garbage that is often found in an anthology in the name of cutting or a new wave. When Helen Grant (an author whose storytelling abilities were proven beyond any doubt) in a discussion concerning various authors, mentioned the title of Nocturne's book, written by John Connolly (an author who made his mark in crime fiction with Shamus winning thrillers) as one that she loved very much, I knew I should have it. The defining element of the story is neither Length (though, if dragged to a novel length or more, they tend to lose steam exponentially) nor the style of writing used in it. Rather, it should have a story in it, which, if told well, can be conveyed or told by others, and in the process get incorporated into collective mythology once..... the venerable cosmic soup that, through the Big Bang, has spawned religion, philosophy, and eventually the story. Even if we are not so ambitious, then stories must have some redeeming quality in them that should justify their place in our memory, otherwise they will be thrown out without mercy or empathy, representing the author doomed in the process. Thus, when one good storyteller remembers the works of another and refers to them, these stories should be really memorable. And so I take possession of Nocturnes, and completed the journey for 3 nights (one way or another), the idea of reading these stories in the daytime seemed blasphemous). Stories:1. Stories are bound to produce shudders, upheavals, some deliciously scary moments, stiff suspense, and above all good and solid stories. Some are OK, some are just above average, some are just terrific in their places, and some that will be carried out in mind for a long time. I will cherish this collection, and will definitely share these stories with other people who love their stories, on dark and stormy nights. How about you? ... more Nocturnes is a collection of supernatural novels and stories that echo the work of some masters of the genre-M.R. James, Ray Bradbury, Stephen King, though never losing the distinctive voice of the creator of the story, John Connolly. Here are lost lovers and missing children, predatory demons and vengeful ghosts. In the novel Rak Cowboy Rides, a New Hampshire town infected by the arrival of a tormented stranger; In Some Children Wandering by Mistake, the sinister circus returns to reap the fruits of seeds sown many years ago; in the new daughter, the father comes to suspect that the mound is on his hide something very ancient, and very lively; And in The Underbury Witches, a pair of London detectives find themselves battling a particularly female evil in the city, culminating in the menfolk. Finally, private detective Charlie Parker returns in a long novel Reflective Eye. A photo of an unknown girl appears in the mailbox of an abandoned house, once occupied by the infamous killer, forcing Parker to resist the possibility that the house of John Grady is not as empty as it seems, and that something was waiting in the dark for his chance to kill again ... Connolly is an excellent storyteller who combines his own unique voice with a wonderful sense of humor; its one-liners will have the reader laughing long after the book has been closed.
