The place where he was, crawls with monsters and zombies, so the character will have to survive in a hostile environment. To do this, you need to look for food, shelter and weapons, because the enemies do not sleep and want death to the main character. Also, the user will create equipment from different materials, perform exciting tasks and explore the island in search of a way home. Unknown marine area, several mysterious islands like Robinson on a desert island, as self-sufficient as belly, as grazing various things, many young people cherished this vision. However, the survival of the island only dare to experience the dream thing, and now this idea in hand travel must be achieved. Radiation Island is a disaster-based survival puzzle game designed by atypical games. Players collide and encounter primitive creatures and scary creatures on a desert island, surviving and ridding the island of puzzles. It is not easy to live, but to cherish the line, let's enter this unscientific world! - APKAward.com Some twists of the history of the game strange, tells the story of the beginning of World War II in 1939, the notorious 701 division of the Japanese Empire, the Ninth Technical Department began work in order to create huge ground transport devices for their invasion of the high mobility unit transport channels. Two years later, a transmission device was built on a small archipelago that used electromagnetic effects to distort space-time and achieve quantum invisibility, which was subsequently tested for transmission, but as a result the entire island disappeared from the air together with the inhabitants of the island! Players play the role of a crew member on the frigate USS Elderridge. During the electromagnetic experiment, he went through time and space on an island that disappeared due to an electromagnetic experiment. In addition to survival, the player had to explore the island and solve an open puzzle, restart the electromagnetic experiment, return to normal space-time. The game begins with a movie trailer, thunder and lightning in a non-stop makeover, giving a sense of time and space disorder. When still, we can see the game exquisite image production. The light and shadow effect of using very good, the details are also very well characterized, it is difficult to imagine that this is a mobile game. At the same time the background music is filled with a strange atmosphere, a huge island only the player lives, can not help but make people nervous. The game is full of sensory operation, feel very smooth, the player slides left and right side of the screen to control the direction and perspective, touch the attack button to attack, Also, in the game all the action can be a long click or a short click on the object, a button to run, these in the beginner tutorial will get a detailed introduction, so getting started is not difficult, but learning to work is only the first step in life. The game requires players in the open world for a grim survival adventure, horror and a changing reality atmosphere overwhelmed. Players need to hunt for food, look for everything that can be used to survive props, but this place is full of crises, wanting to survive is not easy, collecting and synthesis is actually the main content of the game. By collecting simple materials, players can create a variety of advanced props such as weapons, traps, tools and clothing. As the game progresses, players can also create many modern items on this uninhabited island, of course, all the tools must be processed on the original resources, players can use the game of cutting firewood, hunting, scavengers, mining and other ways to get all the processed resources. In the game, the player's enemies are not only bad weather, primitive animals on the island and all sorts of monsters mutated due to radiation, pose a deadly threat. Some enemies move fast, some enemies in groups, and some enemies will spray the poison from afar, even if the player is fully armed and difficult to deal with. Fortunately, many enemies find the player moves inexplicably stagnating for a short period of time, giving the player the full ability to attack, then the player's weapons and attack tools becomes very important, and some long-range weapons, including the game Late Guns can provide good security for the players. With all the skills to survive, we can try to explore the world. The history of radiation island is based on diary documents found on the way. There will be one transit point in the game. Once detected and marked, the player can use the cards to instantly move to these places. There are also some interesting tools in this area that will help the travel player such as paragliding to fly in the sky and canoes used to cross the ocean. It is important to note that players should not forget to wear a radiation suit and carry enough drugs other than storing basic food when studying, because radiation and infection are equally dangerous in the game. Survival part of this game accounts for a large proportion, but the greatest pleasure comes from it. As mentioned earlier, the game has a rich and varied of tools, but an endless stream of danger, hunger, cold, darkness is not the only challenge of the game, players face great difficulties from the fear of the unknown. But opportunities and dangers coexist. These dangerous mutant organisms can also provide us with a surviving capital. We can also do this step by step, learn the secrets of the island precisely because we have experienced various ordeal tests will allow us to understand more about the fear of nature. People, of course, are born with fear and expectation of unknown things. Strangeness and curations make our heart worry. The walk through the quaint world of Radiation Island is even more unique. Overall, the game is one of the few first-person adventures in hand called a rare masterpiece, a story of a game step-by-step, an intriguing story, whether it's a free style of exploration or an expressive picture worth trying, not to mention the open world of the game, so that the challenges of survival become exciting and interesting.
