TempMail - Email Temporal is a useful app to create an email address for temporary use. It's incredibly useful when you need to sign up with your email address on a sketchy website, but you don't want to give out your real one. With TempMail - Email Temporal, you can create a temporary email address in seconds. This app makes it easy to protect your inbox from spam, suspicious emails, and other potential attacks. It's also important to note that you don't need to register to create all the email addresses you want without question. Another interesting feature offered by TempMail - Email Temporary is that you can copy and paste all the emails you receive directly to the clipboard. You can also erase or archive all these conversations, go back to them or share them without losing important information. Thanks to TempMail - Email Temporal, you can make as many temporary email addresses as you want without having to register. What's more, it's incredibly easy to manage all your accounts and emails you get on each of them without losing anything.
