Source: Joe Marin/Android Central WhatsApp latest features show in beta app a month before they are rolled out to the public. If you want to be the first to try out the latest WhatsApp features, here's how to download the WhatsApp beta app. Products used in this Level Up Guide: Google Pixel 3a XL (\$420 on Amazon) Usually, it takes about a month for a new feature to make its way from beta client to public build. This was the case with dark mode, and any new feature or user interface change that WhatsApp plans to roll out will make its way to the beta channel in the first place. If you don't want to wait for a feature to run in a public channel, you can always download the beta app. WhatsApp launches the official beta program in the Play Store, but it has been filled for over a year and does not accept new beta testers. Your best option instead is to sideload the latest APK beta and install the app. I'll show you how to do it below, but before you start you'll have to back up the time of your WhatsApp messages and media, so if something bad happens, you won't lose your chats. Backing up messages on Google Drive? Here's how you can sideload the latest WhatsApp for Android beta: Open Google Chrome or any web browser on your phone. Type apkmirror.com. Hit the search box in the top right corner. Source: Harish Jonnalagadda / Android Central Type WhatsApp beta and hit go. Click download next to the beta version of WhatsApp Messenger. In the Download section, select the build number again. Source: Harish Jonnalagadda / Android Central Tap Download APK to start downloading. Click OK in the dialog box to allow Chrome to download the file. Click Open. Source: Harish Jonnalagadda / Android Central You should let Chrome install apps. Click Settings to get started. Switch Allow from this source to On to continue installing. Click Set to install the latest beta version of WhatsApp. Source: Harish Jonnalagadda/ Android Central Once you do install WhatsApp, make sure you disable the settings that allow Chrome to install unknown apps. Go to apps and notifications to access a special app to install unknown apps to switch settings to turn off. If you've ever felt like you didn't want to be on the beta channel, all you have to do is remove the app and just download the official WhatsApp client from the Play Store. The mid-range camera King Pixel 3a XL has a lot going on for him, but its defining feature is the camera on the back. Google somehow managed to offer a flagship class on a phone that costs half as much as high-end phones, making the 3a XL a fantastic deal. Whatsapp. This is a Facebook-owned chat client with over 5 billion installations on Android and has been pretty stubbornly behind the curve at the attraction on a dark mode of some sort. The first hint of this came in 2018, the year came a couple more signals last year, but it's 2020 and we still had no reason to pull out our Simon and Garfunkel jokes. Well, the good news is at last: the latest beta will finally allow you to give a dark spin mode. Image: Moshe If you are registered in beta, check if you are on version 2.20.13. If you don't, don't worry, just download it from APK Mirror. Once you're in the app settings and click on the Chats item, you'll be able to pull up the theme selector and choose a new Dark One. You can also choose System Default to keep the app in line with your device's general scheme. We regret to inform some specific display geeks that this is not an AMOLED blackout theme, just a paint job that is more friendly to use at night. You would think, with more use than Facebook Messenger, that WhatsApp would get priority with developing and deploying key features like this one. But no, Messenger went public with its dark regime last April. With any hope, we will see this improvement go into stable releases in the next few months. Developer: WhatsApp Inc. Author Mudit Dube WhatsApp is a long-awaited dark mode feature that has been in the works for months, finally here for Android users to try. If you're registered in the beta program, you can upgrade to the latest version (2.20.13) to use this new dark themed user interface. And if you're not registered, you can just download the beta app from APK Mirror. Here's another one. Dark WhatsApp mode is available in theme selection settings and is simply called Dark. As the name implies, it gives a dark green profile to the entire user interface with some contrasting color accents to switch buttons and install blanks. The chat menu only has dark text bubbles, while the background or any other custom background. WhatsApp's dark mode helps relieve eye strain and provides easy readability in low light conditions. However, since the app doesn't use a true black background, it doesn't help to keep the battery on smartphones that come with OLED screens. As mentioned earlier, if you're registered with WhatsApp beta, you can simply upgrade (via Google Play Store) to the latest version (2.20.13) to use the dark mode feature. However, if you're not a beta user, you can download the beta app from APK Mirror and install it to try out a new dark theme. Open WhatsApp and click on the three-point menu icon in the top right corner, then click on the settings. In the Settings menu, click on the chats and then the theme. Now select the Dark option to include dark mode in the app. Notably, you can also choose the default system option to automatically switch between dark and light themes based on system settings. Last Updated Jan 22, 2020 3:28 PM /15:28 -- WhatsApp joins the dark (mode) side. The Facebook-owned app has begun testing a new dark mode in the Android version of its app. How to download and view WhatsApp data report Users who have joined the Google Play WhatsApp beta program see the native Dark Theme inside version 2.20.13 of the Android app, as first noticed by WABetaInfo. Keep in mind screenshots of this dark mode first leaked almost a year ago. So, we have long suspected that the dark mode WhatsApp descends pike. If you want to try a new version of The Dark Theme in WhatsApp, here's how. Pocket-lintUnfortunately, the beta version of WhatsApp on Android does not currently accept new registrations.
