Devolver Digital brings to market the story of an unnamed girl in GRIS. You can witness how it returns color to your own life. This five-hour evocative experience comes through solving problems without using words. GRIS will pull you into its colorful world and wrap you in its beautiful design. Much like a journey, you travel through a strange world that evokes deep emotions in the process. The point is to grow to understand the character's trials and successes through color change from dark to bright. As the narrative weaves into the design, the trip becomes fundamentally beautiful. Unfortunately, when you take GRIS and compare it to Celeste, another emotional story based on travel, the run time is quite short. Although Devolver Digital has done a great job with the design, the game is not made to play. The puzzles that you have to overcome in the game defy play again, and the universe is not expansive enough to keep exploring. Where can you run this program? You can run this on Android 4.4 and beyond. Is there a better alternative? No, there are no better alternatives. Others that are similar to GRIS have their own niches. The journey has a stunning graphics, but provides a completely different tone. Celeste has a much darker but direct approach to fighting the fight. GRIS is a visually stimulating experience with its color-based narrative. The engine is well thought out and interesting. You will find that it doesn't take you very long to finish the story, but it will be worth the experience. Should you download it? Yes. If you value visual art, this is a game you don't want to miss. KrowD requires that your login account be set up in front of the restaurant where you are assigned to work to access relevant information. KrowD is an app for those working in the restaurant brand Darden, but this app comes with many challenges. KrowD is an information tool available to employees of any Darden restaurant, such as Olive Garden and LongHorn Steakhouse. Available information includes company news and a a way to access your paychecks and benefits. You can log it all in with the option of logging in to your fingerprint system. Using KrowD will enhance your experience while working at one of the Darden restaurants. If you have an ID and password for the app, you can view schedules, change shifts, send messages, and receive real-time notifications from the app. KrowD suffers from many errors and failures. One of the most common problems is app updates. Its lack of automatic updates has the potential to leave you using a version of the app that no longer works. Entering a username and password on the login portal will log in to the app. However, you may need to repeat it several times because of an error. Where can you run this program? KrowD is available for devices running Android 5 and up. Top. Is there a better alternative? Yes. Sling: The Employee Planning App is a much better choice. However, there are no other options for Darden restaurant staff. KrowD is a poorly made application that can only be used by those who work in Darden restaurants. Should you download it? No. You should only get this app if you work at a Darden restaurant. StaffLin is an application for planners that is created to serve companies because they handle a lot of work shifts. This allows you to communicate between colleagues and allow employees to remotely request hours. StaffLin' would be extremely useful for the company if it worked properly. When you open the app, you'll be confused about what to do, how to design closely. Another problem with the app is that anyone who wants to use it should buy it. There is no package company like Asana provides. Because of all the connectivity issues, StaffLin no longer works well to set up schedule preferences. The most useful thing about this right now is to view your work schedule if you can get it to sync with the team. You can do this and more with Ready, like setting meeting goals. You may have problems logging in. Once you get it, it often cuts or won't display parts of the system. In this respect, Humanity is a much superior application without errors. Where can you run this program? You can run it on Android 4.1 and beyond. Is there a better alternative? Yes, Done is an excellent work coordinator for smaller teams. Asana provides what StaffLin does, and more with its ability to organize work. Humanity works for the whole company and provides strong customer support. There is very little good to say about this app. The design of the app is bad in every way. Planning doesn't even work properly to encourage people to buy it, and logging in can even be a problem. Should you download it? No, there's no reason to spend money on this program. Get rid of advertising on your Android with AdLock.AdLock is a free Android app that will help you stop annoying ads for popping on your Android without the need for root access. The app will stop unwanted ads from ever appearing. Not only on apps, but also from the screen when on stand by mode. Download We have a bunch of great ways to keep up with the latest from Android Central on your smartphone, tablet or computer - besides visiting the web page in the browser. Here's a look at our available downloads: Android apps We have a trio of apps, each serving a different purpose. The official app for the No.1 Android community on the planet! This is your home for the latest news, reviews, opinions, editorials, podcasts - plus our podcasts, videos, access to our forums, wallpaper gallery and more! More than 100,000 Android fans are installed! Download Google Play! If you're looking for a more dedicated Tapatalk experience for Android Central Forums, this app is for you. Installed by nearly 100,000 AC Forums users, you get access to all of our forums, personal messages and contests. Download Google Play! Google announced its news magazine-style app in December 2011, and Android Central was kindly invited as one of the launch day partners. We've got almost 1 million subscriptions, making us the largest Android site in the library. Sign up now! If you're looking for a quick and easy way to check out the latest headlines for Android Central give our Chrome expansion a shot. With one click you get the news. And another click makes you look at our various news sections. This is a great way to keep up with the latest news from the greatest Android site around. Download it from the Chrome Web Store! Free Android wallpaper Our readers love Android wallpapers - and they love sharing their favorite wallpapers. That's why we created our wallpaper library. Here you can find the coolest wallpapers used by people who actually love wallpaper. New wallpapers are loaded every day! Check out the wallpaper gallery! Android Central Pebble Look Face Are Pebble Smart Watches? Want to trick him with the most look Android mascot around? Now you can. We have our own Lloyd baked in the watch face, ready for immediate loading. Android Central Pebble watch face! Android Central on Google Google Glass now supports IFTTT, which means you can now shoot notifications on more than RSS feeds. So of course we did it. Click here for our IFTTT recipe to get Android Central Stories directly from Google Glass. You can earn commissions for purchases using our links. Learn more. RealPlayer's own RAM/RM format can be a student's worst nightmare. While many universities record their lectures online, they refuse to allow them to be captured for fear that their gems of knowledge will be redistributed around the world... Free. It is for this reason that many universities as well as other audio distributors stream their lectures using the RM format because it is known to be difficult to capture effectively. Many of us, contrary to the beliefs of the creators of such streams, do not want to redistribute them, but just want to write them down to listen at our convenient time. There is always a listening and recording method, but it requires you to listen to the entire recording without using your sound card for anything else. Uncomfortable and from time to time. Here's an easy way. Note: you will need a USB drive. Download and transform Real Media Audio just drag the link to your stream into the gaming bar. Click the record. You can listen while recording or pausing, just don't use RealPlayer for anything else while you're streaming. The line should be filled in red. When this is done RealPlayer will take you to your library of recorded files. This is where the real fun begins. Click the right button on the selection file, probably the one you just recorded. You want your USB drive connected at the moment. Now click Copy To, then a removable disk. You have to see the next screen. Once this is complete, you will be delivered to the All The Music section on the device. I renamed my Different Thread to distinguish it from the rest of the files on my crowded USB drive. The aforementioned screen means that the file must be on your removable disk. Now you just need to go to it; RealPlayer creates some folders for you on your USB, so it requires some explanation. First, get to the USB drive. You should see a folder called Music, click on it. (It's nice to see that RealPlayer is taking a smart approach, assuming that you haven't yet had a folder with an obscure name such as Music) There will be another folder inside that. Then another one. And finally, you'll be taken to your file! And there you have, you easily captured and transformed the elusive .RM stream without paying for RealPlayer Plus, or using any potentially spyware-infected software. Congratulations on sticking it to the man!
