This article describes Carlo Gavazzi counters that support DEXGate or DEXGate 2. The article is divided into the following sections: Manufacturer's website: Carlo Gavazzi EM111 Manufacturer: Carlo Gavazzi Product and Options: EM111 Description: Single-decker din railway electric meter with additional modbus communication measurements: Electrical parameters are compatible with: DEXGate2 (see, App: EM111-INSTALLATION-GUIDE) Carlo Gavazzi Manufacturer EM112: Carlo Gavazzi Product and Variants: EM112Description: DIN rail/panel single-phase electric meter with modbus communication as optionMide: Electrical optionsCompatible with: DEXGate2 (see, Attachment: EM112_Manual) Carlo Gavazzi EM21 Manufacturer: Carlo Gavazzi Product and Options: EM21, EM21 72D Description: Three-step din railway electric meter with additional modbus communication Measurements: Electric parameters are compatible with: qDEXGate Carlo Gavazzi EM21 - A quick guide Follow this guide you need: 1 x DEXGate 1 x EM21 1 x USB-RS485 Adapter 1 x Computer 1 x Ethernet Cable Setup : Install power transformers after the chart below: Connect the orange usb adapter cable to the 15 connector, the yellow cable to the 14 connector, and the black cable to the 13: Power EM21 connector. Go to the configuration menu and set up Modbus (we use address 10 in this example). Sets the transformer conversion rate. Reset EM21 counters (optional). Feed DEXGate. Sets up a computer to obtain a DHCP IP address. Connect the Ethernet cable to both the computer and the ETH1 port on DEXGate. Get access to DEXGate's website management interface through a web browser to . Enter the user and password (default administrator/ administrator). Go to the Gateway Settings section. Change line: devices.carlogavazzi-em21-So: devices.carlogavazzi-em21-10 Saves. Connect the USB-RS485 to DEXGate. Restart. (see attachments: EM21-72DDS and EM21Retrofit) Carlo Gavazzi EM210 Manufacturer: Gav Carlo Product and Options: EM210, EM210 72D Description: Three-step din railway electric meter with additional measurements of modbus communication: Electrical options are compatible with: DEXGate2 Carlo Gavazzi EM210 - Fast Guide to Connect with DEXGate2 To follow this guide you need: 1 x DEXGate2 1 x EM210 1 x Computer or mobile phone with Wi-Fi Installation: Install power transformers below: Connect Terminal 16 EM210 to Terminal A (I) DEXGate2, Terminal 15 from EM210 to TERMINAL B (-) DEXGate2 and Terminal 17 from EM210 to TERMINAL S DEXGate2. Power EM210. Access to settings and menus Modbus address (in this example we use address 10). devices.carlogavazzi-em210TM Reset EM210 counters (optional). Power DEXGate2. Enter the DEXGate2 administrator portal by connecting to the Wi-Fi hotspot and . Enter the user and password (default administrator/ administrator). Go to the Modbus Settings section. Line change: devices.carlogavazzi-em210- So: devices.carlogavazzi-em210-10 Save and restart Modbus. It's done! (see attachment: em210ds) Carlo Gavazzi EM24 Manufacturer: Carlo Gavazzi Product and Options: EM24 Description: Three-Echo DIN Rail Network Analyzer. Two versions allowing direct connectivity to 65A, or the use of /5A current transformers. It has three digital inputs for reading pulses (Channel 3). Measurements: Electrical parameters, pulses are compatible with: DEXGate2 (see attachment: EM24-17514-17636) Carlo Gavazzi EM26 Manufacturer: Carlo Gavazzi Product and Options: EM26 Description: Three-panel electric phases meter with modbus communication Measurements: Electrical Options Compatible with: DEXGate2 (see, Attachment: EM26-96DSENG) Carlo Gavazzi WM30 Manufacturer: Carlo Gavazzi Product and Options: WM30 Description: Three-Step DIN-Rail Energy Analyzer. Measures: Electrical Options Compatible using: DEXGate (see app: WM30-IM) Carlo Gavazzi WM40 Manufacturer: Carlo Gavazzi Product and Options: WM40 Description: Three-Step Rail Network Analyzer DIN. Measurements: Electrical options are compatible with: DEXGate with: DEXGate
