File managers may be a dime a dozen on Android, but Solid Explorer stands out from the package. With advanced features for managing and viewing files, both on your phone and remotely, this is our new favorite file manager. Update: Recently, our previous selection of ES File Explorer has started adding some shady advertising to its free version. The paid version (\$2.99) is reportedly still safe, but we decided to update our main selection to reflect this new development. Solid ExplorerPlatform: AndroidPrice: \$1.99 after 14-day free trial Download PageFeaturesBasic file management feature: copy, Insert, cut, create, delete, rename, share and send files stored on your SD card or internal memory Select multiple files simultaneouslyBrowse Collections of Photos, Music and Video in one place Installing, installing and deleting apps, and explore the structure of files in appsOpen, read, extract and decrypt, 7-EP, RAR and TAR filesManage cloud files on Dropbox, Box, OneDrive, Google Drive, Sugarsync, Copy, Mediafire, Owncloud, and YandexAdd more storage options with plug-ins for Amazo, Mega, and moreLock access to network sites with passwordUse root access to perform only root actionsBatch renaming Large group files immediately with regular expressions or variablesWhich access to files with FTP, SFTP, WebDav, and SMB/CIFS customers' customers Bookmark folders to quickly access laterView images and listen to audio with a built-in media player on your ChromecastCustomize primary and accent color scheme , dark and black background themes Material design interfaceD he ExcelsSolid Explorer covers almost all the beats you'd expect from a file manager almost flawlessly. Collections allow you to view all your photos, music and videos in one place.

You can connect cloud storage accounts, such as Dropbox, to remotely manage your files. It also has the support of remote access protocols such as FTP, and you can even use it as a root file manager. Even for advanced users, it packs a punch. On top of that, it's also great. While most file design managers are stuck somewhere between 2009 and the Stone Age, Solid Explorer makes it a priority to stick to Google Material Design specs. You can also customize your themes and colors and even choose between light and dark themes, because in fact there is no reason the file manager should dazzle you. Where it falls ShortWhile we prefer to choose a free app when we can, Solid Explorer does not get into this camp. You can try it for free for two weeks, but after that, you'll have to fork out \$2 to use it. In addition, the company also charges for some plugins like Mega, and even offers additional icon packages for more money. It's annoying, but most add-ons are free or optional. The plus is that you at least know where Solid Explorer gets its money from. Since our last choice was pulled adding sketchy advertising programs, we'll call it a mixed blessing, not a outright negative. CompetitionThe free version of ES File Explorer may have lost our recommendation, but if you don't want to say goodbye, you should at least check out ES File Explorer Pro. For \$2.99, all built-in apps offer and junkware are removed, and there are no ads. It still has all the bells and whistles that we used, like, including remote access to files, qIP support, and an application manager. Of course, most of the same features are in Solid Explorer for \$1 less. FX File Explorer is also a great option for users who like to design an ES Explorer file but don't want to be junk. The free version covers the basics of local file management, while you can pay \$2.99 to unlock advanced features such as cloud or network storage and app manager. For mainstream users, the free version gives an edge over Solid Explorer, but advanced users will end up paying a little more for the big guns. Although, at the time of writing, FX File Explorer is running a sale, bringing the price to \$1.99, particularly aimed at court users of ES File Explorer.It it's also worth noting that if you don't need much from your file manager, Android N will have you covered as well. Google began to build a basic file manager in the system itself. You can copy and move files, rename files and folders, and create new folders within the system itself. It's a far cry from the advanced features of other apps on this list, and Android N hasn't even been released yet, but if you're one of the few running N Preview or reading it in the future with an Android N device, you might not need a full file manager app. The search for work is already quite busy. You should be able to build a resume without adding to that stress. The resume is important because it gives you one document that you can send to multiple employers. It has contact information, work history, links, and all kinds of valuable information for employers. It is easier to hand out a well-made resume than to fill out dozens of applications. In addition, many jobs require both an application and a resume anyway, and it's always good to be ready. Here's the best resume builder of Android apps! Of course, many of them are useful for a summary for you scientists out there. Price: Free (with ads)Ariostoz Summary Builder Free kicks off our list and it's a pretty sensible builder resume app. The app comes with more than 75 templates for different types of jobs. Alternatively, you can download the final product in PDF format at the end if you want. Patterns are customizable, and you can easily share it with cloud storage or email And. The finished PDF is stored in the download folder. Some users complain that resumes are deleted if they leave the app and return. However, this is one of the Free resume builder applications that are actually free. It is supported by advertising. CV EngineerPrice: Free / Up to \$5.99CV Engineer is a popular app in this space. It has a bunch of resumes, simple controls, and you can export in PDF format when you're done. You just fill every box until it's all finished, so it's easy enough for almost any use. The app was also developed by a recruitment consultant, so the templates are decent enough for anything. You can make a resume and resume for free and contribute later if you want. Free Resume BuilderPrice: Free/\$1.49 Free Summary Builder by Magnetic Lab is one of the best free resume builder applications. It has a bunch of customizable sections for any kind of resume you want to build. This includes an extended resume editor where you can reformat the template of your choice. Some other features include PDF support, the ability to duplicate your resume, and you can even use a photo if you like. Finally, we loved the user interface and input information with that. It's super easy and it looks good. You can pay for a \$1.49 purchase in the app to remove ads if you want. LinkedInPrice: FreeEverybody knows about LinkedIn. The social media website service is mixed with a job search website and it is also a source of information for different types of professionals. Your profile is basically your resume. You put your work experience and education experience out there. People can contact you or you can apply for a job right there on the site. It has its ups and downs both in popularity and functionality. However, it is easily the largest website on the web that does what this app does. LinkedIn also has a great professional training app called Linked Learning if you want to brush up on some work skills. Microsoft WordPrice: Free/\$6.99-\$9.99 per month/\$149.99 times The Microsoft Word is the original builder summary app. People are using this to create resumes to this day and for decades at the moment. The app has templates and it uses its word processing capabilities to create some really neat looking stuff. You can export in a variety of formats, including the native Word or PDF format, if you choose. The mobile version doesn't have a ton of templates available, but it has a good baseline. You'll probably have more luck on the web version or desktop version if you have access to them. ResumakerPrice: Free (with ads)Resumaker is an up-and-coming resume of the builder app. It covers all the usual basics. You can do both resumes and resumes ni, there are several templates for each, and it's easy enough to fill one and export it. You can customize every letter of your resume if you need it and you can even make it colorful if you want. It exports to the PDF format, like most of them. Patterns look clean for the most part as The app is completely free with advertising support. There are some complaints about some minor errors, but nothing serious. Summary Builder App FreePrice: Free (with ads)Resume Builder App on 23apps.com is another fairly competent builder resume application. The app boasts a variety of templates for resumes and resumes. In addition, it exports to the PDF as usual, includes a cover letter and you can add pictures of yourself if you want. He does all the basics right. The app is completely free and supported by advertising. So we recommend it. However, 23apps.com, it has a second resume app, simply called the Resume App. This one costs \$4.99 a month and puts watermarks on your resume in the free version. We recommend the one we tied up because the other version of the developer is pretty bad. Summary Builder Free CV MakerPrice: Free (with ads)Resume Builder Free CV Maker is a terrible name for the app, but it does a good job. It boasts more than 50 templates for resumes and resumes. You also get an automatic save feature, multiple resumes, PDF support, email support, and it's relatively customizable. You should be able to find all the tools to make a decent resume or resume with this app. Some complain about the frequency of ads, but it's a free app, so it's hard to complain too much. There really is nothing flashy about it. He's just doing a cv. Top ResumePrice: Free (with ads)Top Summary is not the most popular builder resume app on the list, but it does a pretty decent job. The app has several different export templates in PDF format, and it's actually quite easy to use. This is a good trifecta of features for a resume builder. This process is relatively trouble-free, and the app is also free with advertising support, like most other free resume builder applications on the list. There are a few things that people would like to see changed, but the developer seems to be active in the review section and improvements should come with time. Job search appsPrice: Free/VariesMany job search apps have resumed the work of builders as part of the app itself. One such example is really finding a job. Most job search apps do not advertise a builder's resume, but about half of them actually have one. This is a good option for finding a job because you can create your resume and immediately turn around and find potential employers to send it. Sure, this locks you into the ecosystem of this job search app, but as long as you find a job, it doesn't matter that much right? We really click below, but there are dozens of them on Google Play. If we missed any great builder resume applications or any great CV apps, tell us about them in the comments! You can also click here to check out our latest Android app and game lists! Lists! Lists!
