Last updated on Oct 01, 2019 at 01:09 by Abyssalwave 35 comments General Information Welcome to our classic Guide to Alignment for Robbers. Here you will learn how to effectively align your Rogue all the way up to level 60. 1. Introduction This guide will be directed to provide you with a clear skill and gear path to the maximum level in the WoW Classic. Describing each quest and optimal alignment routes, we'll provide some information about your classes and some general alignment tips. 2. Specialization Choice for Level Rogues Have Three Tree Talents: Murder, Fight, and Subtlety. The Combat and Assassination hybrid is a recommended alignment build, thanks to access to 2 powerful coolings, as well as supporting choices such as Relentless Strikes and strong liabilities. The strongest alignment build uses swords both in the main hand and outside the hand. Sword Rogue alignments build while swords are better for solo play, daggers are better for group game. Playing with daggers will increase DPS in groups, but when it comes to solo play, it's much harder to play because Frontstabbing doesn't work in the Classic. Rogue Dagger alignments build 3. Level 1-60 as Rogue 3.1. General level tips, because the travel time between quests can be long, and the experience gained by doing quests alone is not always enough to get you into the next zone, you should aim to kill every enemy close to your level that you are traveling. The experience you get for each killing quickly, and dramatically, falls as you level past the enemies you kill. It is also much harder to kill enemies past your level because you often miss and your attacks look away from them, due to the inconsistency of weapons and defense skills. In addition, to reduce travel time as much as possible, you should aim to save enough gold to buy your first mount right after you hit level 40. To help achieve this goal, you want to buy only the most effective skills from your coach (we will provide a list in advance). Finally, as the WoW Classic level can be long and difficult, we would recommend you make friends with people who are also aligning in your zone as you go as a level in pairs (large groups are not recommended due to problems with finding a drop point of speed and experience separation) can not only make things faster and safer, but also provide you with someone to communicate with. Make sure you buy a Dual Wield at level 10, this will greatly increase your damage output. 3.1.1. Professions teaching professions early on is very helpful, as you can naturally align them as you go, avoiding extra work at the maximum level. This is especially true for the collection of professions, but crafting professions compensate. We encourage you to learn first aid as soon as possible for easy self-healing. Grass and Skinning are a big primary primary to align Rogue, which allows you to make extra gold, or accumulate materials that can be used for crafting levels later. There is also a case to be done to align engineering early on, since its crafts can allow you to immediately solo quests that would otherwise have to wait for later levels. 3.1.2. Gear Options When Aligning, one of the most important things to look for is weapon upgrades. As a Rogue, much of your damage comes from automatic attacks and some of your important abilities scale away from damaging weapons such as Backstab. The best statistic for robbers is agility/strength for damage, as they both increase your attack strength, however agility also increases the critical chance of hitting and dodge as well. Spirit is also a very useful statistic when aligning, especially as it increases your health regeneration from the battle. 3.1.3. Dungeons There is no Dungeon Finder in the classic WoW, so you'll have to either find a group using people you know or look for groups in the city. The dungeons can take some time to get to and the group wipe can set you back a lot of time, since you spawn at the nearest cemetery outside the dungeon and have to run back in. This is a more in-depth part in our Dungeon section. 4. Weapon options for level rogues in the WoW Classic Getting upgrades to any piece of gear will help the alignment process, but the most important upgrades to look for are weapons. Sword or dagger upgrades can greatly improve your alignment speed. You should always be on the lookout for potential range upgrade weapons that have a higher DPS than your current weapon. Read our full guide to guns by clicking on the link below. The out-of-the-way-arms guide is 5. Important rogue quests in WoW Classic Rogues have an extremely important quest that will greatly speed up the alignment process. This quest is broken down in great detail below. Rogue quests guide 6. Congratulations! Congratulations on reaching level 60! Now that you're the maximum level, we recommend looking at our Talents section and the rest of the guide to learn how to play at the maximum level. The best individual reading pages are as follows. THE DPS Rogue Talent Builds Guide has the best build for a level 60 covered. We offer assemblies for all specializations, with a focus on the fight for raider capture. Our PvP Rogue guide where you can find the best PvP builds for Rogue. Goldmaking Guide to Robbers is a page with details on where/how to farm Fast as a rogue when you level 60. The DPS Rogue Rotation guide is a place where you can read how to optimize PvE damage and how to prioritize your abilities. DPS Rogue Stats guide contains details of all Rogue stats, including a list of their priority for damage damage Our Gear guide for DPS Rogues lists all the optimal pieces of gear you want to farm at 60 in order to optimize your damage with a pre-BIS list for those trying to get ready to raid. 7. Changelog 11 Sep. 2019: Made clear that the sword build should use daggers and backstab up to level 10 when sword weapon skill can be purchased from a trainer. 05 September 2019: A note has been added about the importance of dual owning. August 29, 2019: An improved presentation of talent selects by level for a dagger build. August 29, 2019: An improved presentation of talent selects by level for the sword to build. June 20, 2019: Page added. Show More Show Less Need Help? Check out our Classic Forum! 35 comments Last updated November 05, 2019 at 09:30 by Abyssalwave 35 comments On this page, you'll find our level level dagger battle rogue guide for WoW Classic. Make sure to use a slider to make the guide adapt to your level. For more general information about alignment, please contact our Rogue alignment guide. We also have a Sword Rogue alignment guide. 1. Dagger Rogue level by level of rotation, talents, and Trainer Skills Move slider below to make a guide upgrade to your level! Level: 1 1.1. A tree of talents to align as The Rogue Dagger your first talent opens at level 10. Dagger Rogue Talents Level 10 to 19 Dagger Rogue Talents Level 20 to 29 Dagger Rogue Talents Level 30 to 39 Dagger Rogue Talents Level 40 to 49 Dagger Rogue Talents Level 50 to 60 Levels 10 11 - 2 Points in Improved Ominous Kick Levels 12 to 14 - 3 Points in Improved Gouge Levels 15 to 19 - 5 Points in Opportunity Improved Ominous Strike is a very powerful talent that also helps reduce the cost of energy ominous kick from 45 to 40 (when you have 2 points in talent). Improved Gouge increases Gouge's duration from 4 seconds to 5.5, which is fantastic when you want to stun the target and bandage yourself or pool energy while maintaining a healthy amount of life. The opportunity is a major increase in damage to the Rogue dagger, since you will open up on targets with an ambush and tries to backstab as much as you can. Levels 20 to 22 - 3 points in improved Backstab levels from 23 to 27 - 5 points in exactly Levels 28 and 29 - 2 points in The Improved Sprint Improved Backstab Buffs your main dot combo generator (except when solo quests where you're unable to get behind the target). Precision is a staple in almost all Rogue builds with Hit being one of your strongest stats. Improved sprint makes your sprint remove all motion breaking effects when has 2 points in talent. This can be very useful when searching, especially when you're playing on a PvP server and dealing with another faction. Levels from 30 to 34 - 5 points in double level specialization Wield from 35 to 39 - 5 points in the specialization dagger Dual Wield Specialization is a staple in almost all Rogue builds with The white damage from auto attacks is very strong and makes up a large chunk of your damage. The specialization of the dagger is well synergistic with the lethality that you will pick up later. Level 40 - 1 Point in Blade Flurry Levels 41 and 42 - 2 Points in Weapon Examination Levels 43 and 44 - 2 Scores in Endurance Levels 45 - 1 Point in Adrenaline Rush Levels 46 to 49 - 4 Points in Malice Blade Flurry is a major cooling that allows AoE and is your only AoE tool like Rogue. Weapon Examination is a staple in both sword and dagger builds for Rogue because weapons skill is very important for hitting targets consistently. Endurance is a strong talent, but also a means to unlock adrenaline rush talent. Adrenaline Rush increases the energy production speed from 20 to 40 energy every 2 seconds. This is your strongest DPS cooling and what you want to use with Blade Flurry and a few mobs for maximum damage. Level 50 - 1 Point in Malis Levels 51 to 53 - 3 Points in Improved Slice and Bone Levels 54 and 55 - 2 Points in Killing Levels 56 to 60 - 5 Points in Mortality We Start, finishing Malice by putting 1 point in it. Improved slice and Dice significantly increases the duration of Slice and Dice, which is a very strong buff that you try to keep as much as possible. Murder is a strong talent, but also a means to unlock lethality. You will finish the tree by putting the rest of your glasses in lethality, as it is incredibly powerful. 1.2. Rotation to align as a Rogue dagger The main difference in dagger rotation is the fact that Backstab and Ambush require a dagger, meaning you have access to these 2 abilities. 1.3. Rotation to align like a rogue dagger you start with an ominous kick, eviscerate, and throw, with the option to buy a Stealth from your trainer class when you get 10 coppers (which you can choose to wait with up to level 4). Maintain a positive slice and Dice effect. Use Eviscerate in 5 combo dots. Use the ambush to start the fight whenever possible and you are hidden. Use Backstab to start the fight and build combo points. Use Gouge whenever you can in order to minimize the damage you will take. You can combine energy, use Gouge, and then go for your goal to backstab them. Use Vanish if your threat is too high and you are in danger of pulling agro. Use an ominous kick to build combo points if you can't get behind your goal. To cool down Blade Flurry and Adrenaline Rush, use them as often as possible and, if you can, try to get as much benefit from the Blade Flurry split effect by pulling an extra crowd. 1.3.1. Multiple Rogue Dagger rotation as a rogue, you have limited Your 2 ways to make AoE are either talent Blade Flurry or explosives out of engineering skills. 1.4. At level 4, buy Backstab and Stealth, which are a good pair together since Stealth Stealth You have to open up on aggressive mobs using Backstab. At level 6, buy Rank 2 Evil Kick, and Gouge, which is your first CC ability and is great when paired with a backstab. At level 8, buy Dodging and Rank 2 Eviscerate. Dodging is a great emergency survivability of cooling. At level 10, buy slice and Dice, Sprint and Sap. Slice and bone is used at the beginning of alignment with 1 combo point because the mobs will not survive long enough to justify the more combo points used. This changes if you make a dungeon or a boss. Since you don't have a fastening to level 40, Sprint is a great cooling mobility that reduces travel time. Sap is a strong CC ability that allows you to safely pull humanoid that are grouped together. At level 12, buy Rank 2 Backstab. Also buy Perry and kick at level 14, buy Rank 3 Ominous Kick. At level 16, buy Grade 3 Eviscerate and Feint. At level 18, buy Rank 1 Ambush. At level 20, buy Grade 2 Stealth, Grade 3 Backstab and crippling poison. Make sure you buy instant poison as well. At level 22, buy a Grade 4 ominous kick. If you have money to save, also buy distract and disappear. At level 24, buy rank 4 Eviscerate. At level 26, buy Rank 2 Ambush, Cheap Shot. If you have extra money, then buy a Rank 2 Kick. At level 28, buy a Grade 4 Backstab and Grade 2 Instant Poison. At level 30, buy Rank 5 Evil Punch, Deadly Poison and, if you are on the PvP server, it is recommended that you buy a kidney Shot. At level 32, buy grade 5 Eviscerate. If you have the money, then buy a wound Poison. At level 34, buy Rank 3 Ambush, Rank 2 Sprint, Blind Powder, and Blind. At level 36, buy a Grade 5 Backstab and Grade 2 Instant Poison. At level 38, buy rank 6 Ominous Punch and Rank 2 Deadly Poison. At level 40, buy rank 6 Eviscerate. If you have extra money, then buy Rank 2 Feint, Rank 2 Wound Poison, and Rank 3 Stealth to reduce penalty speed. At level 42, buy Rank 7 Backstab, Rank 4 Ambush, Rank 2 Disappearance, and Rank 3 Strike if you have extra money for any ability. The last two are not required as updates. At level 44, buy a Grade 6 Backstab and Rank 4 Instant Poison. At level 46, buy Rank 7 Evil Strike and Rank 3 Deadly Poison. At level 48, buy rank 7 Eviscerate. If you have extra gold, then buy a rank 3 rana poison. At level 50, buy Rank 5 Ambush, Rank 2 Crippling Poison, and if you bought a Kidney Shot, buy the Rank 2 version now. At level 52, buy Rank 5 Instant Poison. At level 54, buy Rank 8 Evil Strike and Rank 4 Deadly Poison. At level 56, buy grade 8 Eviscerate and grade 4 poison wounds. At level 58, buy Rank 6 Ambush, Rank 3 Sprint, and, if you have extra gold, buy 4 Strike. At 60, buy Rank 8 Backstab, Grade 6 Instant Poison, and Rank 4 Stealth. Using abilities such as Gouge, Cheap Shot and Kidney Shot is useful for both mobs and players. It is highly recommended to buy these abilities if you are on PvP PvP 2. Rogue quests and weapons When aligning, you want to always be on the lookout for different updates. Most of your damage will be done from auto attacks and certain abilities will scale away from your weapons damage, meaning weapon upgrades will increase your kill rate significantly more than any other upgrade. The robbers also get a huge burst of power when they complete their Level 20 class quest and access the poisons and thistle tea, which will be very strong to align. Below are links to our weapons guides and class quests for robbers. Rogue Weapon Guide Rogue Quests Guide 3. How to advance as a rogue at level 60 Well done to hit the maximum level in the WoW Classic! Now that the level is over, you can learn more about level 60 gameplay by reading our DPS Rogue Guide, which covers all aspects of gameplay at 60 in detail. The best individual reading pages are as follows. THE DPS Rogue Talent Builds Guide has the best build for a level 60 covered. We offer assemblies for all specializations, with a focus on the fight for raider capture. Our PvP Rogue guide where you can find the best PvP builds for Rogue. Goldmaking Guide to Robbers is a page detailing where/how to farm gold fast as a robber when you level 60. The DPS Rogue Rotation guide is a place where you can read how to optimize PvE damage and how to prioritize your abilities. DPS ROGUE Stats contains detailed information on all Rogue statistics, including a list of their priorities for causing damage. Our Gear guide for DPS Rogues lists all the optimal pieces of gear you want to farm at 60 in order to optimize your damage with a pre-BIS list for those trying to get ready to raid. 4. Changelog 05 November 2019: Typo fixes in rotation. 23 oct. 2019: Additional notes on sprint improvement have been added. 02 October 2019: Page added. Show More Show Less Need Help?
