Everyone and their mother uses the Snapchat app. In addition to all the fun filters that are on the popular multimedia messaging app, there is also Bitmojis, which allows people to create their own personal cartoon avatars. And now Snapchat is rolling out a new feature called Mix and Match on Android and iOS, which will allow Snapchat users to customize the look of their bitmojis. SEE ALSO: Friendmoji is finally free of their Snapchat shackles New Mix feature and match allows users to individually choose items of clothing or combine different clothes looks so that users can make their Bitmoji completely stand out. So, whether it's tops, bottoms, shoes, or socks, you can customize the color of them all with this new option. Once users have made a general look, it will be stored in a closet that users can then edit or customize. To be able to use the app, just select the Bitmoji app, open avatar designer in the app, and you'll be able to discover a number of new icons for each piece of clothing to select and customize separately. Also, when you click on the profile icon, you'll be able to identify the option to change the outfit inside the Bitmoji option. Then you get An Avatar Design where you can easily start playing around with outfits. SEE ALSO: Make me cute: Why we're obsessed with adorable cartoon avatars Also, since the company wants to promote the use of the feature to a wider audience, it runs a 'Bitmoji' merch sale where people can buy customized T-shirts, mugs, etc. There's also a 20% discount running at all Bitmoji merch for the festive season. Snapchat has over 100 million daily users and over 100 million Google Play Store installs, making it the 4th most downloaded Android app, and chances are many of you are fans of the video sharing app. Of course, we love spending time with you and keeping in touch as much as possible, so we jump into Snapchat with both feet. Download Snapchat from Google Play StoreYes, an Android body currently on Snapchat, and you can join the party by following us there. How to follow Android Administration on Snapchat there are two ways to find us on Snapchat. The first method of finding our username, which is just an android. You can also scan Snapcode below using the Snapchat app. What will we share on Snapchat? There will be a lot of content to be had here! First, we will provide a constant stream of behind the scenes coverage during events, while working on reviews, and sometimes just random moments. Some of them will even be exclusive, so it's not a bad idea to stay tuned! But things are going to get a little more interesting than that. You can even send their own video shots that we will watch and can even respond to. Besides, we'll forget Snapchat FOR a show that you can use to connect directly with us. The idea is to answer your questions in the form of pictures. Shutterstock You can ask us anything. Are you wondering which new phone you want to buy? Maybe you want to know what we think about a particular VR product. And why does Josh like his pink phones so much? Indeed, everything related to Android is coming. Any ideas? We try our best to contact you, but also understand some of you may already have Snapchat experts! Do you have any interesting ideas for the show? Maybe some game or activity will be fun. Hit the comments and share your thoughts on the subject! What would you like to see? At this point, just go ahead and find us on Snapchat! Once again, our username is Android. Come join our Snapchat craze! And you can also find us pretty much on any social media network worth its salt. Where else can I find Android Authority? Snapchat's YouTubeGoogle-Facebook-TwitterInstagram is one of the fastest messaging services around, but it can be misleading to use. I know it was hard for me at first to understand. In this post, we'll teach you everything you need to know about Snapchat. There's more than naughty sexting to it (although that's the key part), so let's get started. What is Snapchat? First, Snapchat is a messaging service. We know that you have a lot of chat apps, but what makes this a little special is that no message really stays around. Users can send photos and video messages to friends who will self-destruct after viewing. Once gone, these messages will never be seen again. If you don't take a screenshot, that is - your friend will get a notification if you do. The social network and messaging app is one of the most popular around, with 287 million monthly active users (according to Statista). It's nowhere near Facebook's 2.32 billion monthly active users, but the younger generation loves Snapchat.According to Statista, 46 percent of teens in the U.S. prefer to use Snapchat as the main social network when asked in a survey in the fall of 2018, compared to 32 percent of American teens who prefer Instagram, and only 6 percent of everyone who prefers Facebook and Twitter.Snapchat's terminology app has its own language. Snapchat is no exception. Let's banish the basic terms of Snapchat you need to learn how to effectively use this app and know what your friends are talking to you. Snap: Snap is a photo or video you send via Snapchat. It can be sent to multiple users will be deleted after viewing. Stories: While also temporary, the stories are longer than regular shots and chats. Stories can be viewed as many times as users wish, but only within 24 hours. Stories are also shared with all your friends. Chat: Snapchat uses chats for more private conversations. This is the main function of instant messaging, but messages are also After watching. Memories: Memories make it possible for users to save snapshots for future use. This is the only way to keep the content around without removing it. Filters: Snapchat filters make it possible to change the mood of your image. They can change shades, saturation, shadows and more. Lenses: Lenses are animated special effects you can add to your shots. Snapcode: Snapcodes are zR-style codes used to easily add friends. Bitmoji: A Bitmoji is a version of Snapchat's avatar. This icon shows an animated character that you can customize to look like you. Snap Map: Snap Map is a section of the app that shows your location and the location of your friends. Download the Snapchat app You have to download it first! Once you download the app, you can sign up (or log in) and add friends to the contact list that may already be on Snapchat.Download Snapchat from Google Play StoreDownload Snapchat from Apple App StoreSign up or log in if you already have an account, just indow your username and password. Those looking at this post might not be one though. If so, follow the instructions below to get yourself a Snapchat account. Open the Snapchat app. Put it on the Underpigh button. Include the permissions requested. Take your name and surname. Take your birthday. Find a username that hasn't been taken. Create a password. Use your email address. Enter your phone number. Wait until the check number will pass as a text message. Bring in the check number. You're set up! Navigating the Snapchat appOnce you created it, the app will take you right for fun. Snapchat will get access to your camera and will provide you with a live stream of the view as a home screen. The buttons in the top right corner allow you to turn on the flash, flip a selfie on the camera or add friends to your snaps. You can also expand these settings to display timer and grid settings. In the top left corner there is a badge with bitmoji. This is the main menu, so to speak. Here you can find settings, contact information, stories, Bitmoji variants and more. There's a couple of icons at the bottom, right and left of the shutter button. They will inoculate you with your messages and the Discover section. Swipe down from your home screen to access Snap Map. The lenses will be to the right of the shutter speed, while the below shutter icon displays memories. Taking and sending SnapYou can take a picture by clicking the shutter button on the home screen. Pressing and holding this button will take the video clip. Taking an actual photo or video is only half the fun; there's a lot of editing power to The usual shot look fun and dynamic. LensesTap emoji next to the shutter button to access Snapchat lenses. They make it possible to add a little flash to images or videos with animated animated Many of them can analyze your face and change your appearance. You can turn into a puppy, swing a beard, have horns, and more. Some of them are interactive and respond to certain actions such as opening the mouth. Others also support more than one person in the frame. The sticker features can be accessed on the editing page. Sounds like a sticky note. Click this button to open a whole page filled with stickers, just click on the one you want. To move it around, just drag it with your finger. If you're working with a video, you can stick it on anything, even if the object is moving. Just click and hold the sticker, drag it to the object in the video that you want to stick to. Let's say it's my eye. Once located, you can release the sticker and it will follow whatever you have placed it. In this case, my eye. TextAdding text is just as simple. Just click on the T button and you will be allowed to write something on the shaded area. After that, get rid of the keyboard and you can drag the text area around your will. The DrawingThe pencil button on the editing page allows you to draw images or clips. You will get different color options. Just draw something with your finger after choosing the color. The update button also allows you to start drawing. CuttingThe scissors icon allows you to shorten sections of your content and superimpose them into Snap. Choose a scissor icon, map out the area you want to cut, and drag it around to place it in the desired area. The URL cover icon allows you to attach the URL to the snap. Just click on the aspi, search or paste the URL, and attach. You can set a time limit on the pictures. Simply click on the timer icon and choose your preferred option. Change the filters. This will add a filter to your photo or video. Saving Snaps with Memoriest is used to ensure that when you take Snap, it will disappear quickly. Now you can save any Snap you make with the Memories feature. All you have to do is click on the Save icon in the bottom left corner of the screen after you complete the Snap editing. To access memories and see saved Snaps, keep the icon right under the shutter button on your home screen. How to upload videos to SnapchatViewing SnapTo viewing Snap just follow the steps below. Open the Snapchat app. From the home screen, swipe from left to right to enter the Friends page. The new Snaps will be here, along with chat messages. New images can look both red and purple. Red bindings have no sound, while purples do. Click on Snap, open and view it. Double click on Snap to view it again (last chance!). The binding is gone! If you haven't taken a screenshot, that is. Remember that your friend will be notified if you perpetuate Snap with StoryAs mentioned above, stories are pretty much Snaps that are available within 24 hours. This means that posting a story is very similar to sending a Snap. Here's how to do it. Open the Snapchat app. Take your picture or video. Edit the content. Instead of clicking the Send button on the Story icon in the bottom left corner. You can also do it this way: Open the Snapchat app. Click on the Snapchat avatar icon in the top left corner. As part of The Story, select Add to My Story. Taking an image or video. Edit content. Below you will see the my story section. Click on it to access more options. Here you can create groups, add friends, make history private and more. View StoriesSwipe on the other side of the home screen (right to left) to display the Discover page. That's where all you can find is all your friends' stories. You can search using a magnifying glass, or you can just scroll down through the latest updates or all the history sections. Going through stories is very simple. Just click on the stories and they will show up. Skipping through different stories is as simple as tapping the screen at any time. Alternatively, you can pull out the chat box from below by looking at the story post, and start a conversation. This can also be done by swipes up. Swiping down will close the Story session. By saving stories like Memories Like With Snaps, you can also save your stories in the Snapchat Memories section: Click on the Profile button that you can find in the top left of the profile screen. Click on the menu icon (three horizontal dots) to the right of StoryTap in the Settings stories section. Click on the Save icon to save your Memories story.There's also the ability to keep a separate Snap from stories to memories: Click on the profile button. Click on the name of the story. Click on the separate Snap you want to save. Click on the Save icon to save that Snap to Memories.ChatSending personal messages on Snapchat is simple. When on the home screen (camera section), just swipe from left to right and you'll be taken to your inbox. You can also click on the Friends button in the bottom left corner. Here live the messages of your friends. The search feature can be used to find a specific friend or message. There's also a button to start the conversation in the top right corner of this page. There are two ways to interact with messaging streams. The more basic of them is to push and hold the conversation. You will be presented with several options: one for watching a chat, the other for sending an image or video, and a gear icon with several options (among them, the ability to block the user). Otherwise, Click on the stream and swipe from left to right to access the chat. This chat will have all the content your friend sent to you. Keep in mind all is temporary. Messages disappear after viewing. You can also send images, emoticons and start videos and voice calls. How to save Snapchat videos on AndroidNote: We decided not to pay too much attention to voice and video calls here. It's just not a feature many go into Snapchat for, but it's there in case you want to. DiscoverThose feeling a bit of an adventure can also be viewed through the Discover section, which includes Snapchat accounts from sites and other users. Pages such as MTV, Vice, BuzzFeed and other content creators make Snapchat posts. Instead of sending them a message when looking at the snap, you can access their articles by swiping up. Time to get snapping! We hope you enjoyed our tutorial on how to use Snapchat. Hit the comments and let us know if you have any other tips for your fellow Snapchat users. Maybe you have some questions. Either way, we'd love to hear from you. You.
