This has all the other beat as far as available features, functionality, themes, and no bugs. I've tried them all but either they would be missing the features I would like, or I would find one with everything I would like but it would constantly crash, or the themes would be terrible, or autocorrect to keep changing my words to obscure English words that nobody would actually ever use. I finally found one that I can use. I also like that it gives you a lot of customization options. How amazing that. People spend so much money on this app. Does he cook your breakfast? Does it do favors? I'm not going to do 📄 this app. Anyone can do their best to get whatever they want from people until they force them or scam them, so good luck. I'm just surprised. I just don't see paying \$30 a month or \$120 a month on this. I'm just amazed. If I were you, I would make a separate app that allows you to make 3 avatars and maybe a few other limited things just so people can feel safe to try. There's no way I'm going to do a three-day trial. I'm not going to accidentally get myself into a situation where I accidentally spent \$120. No. If you want me to try it, don't stick it with dumbly the big possible casual purchase oops that you would then say: You should deal with Apple about a refund. So, I wonder how many people get charged a monthly fee, which does not mean to buy and do not realize that they have to cancel it ... Dear user, thank you for your valuable suggestions and comments. We've recorded your feedback for one, the keyboard has a massive delay when you too fast to the point where the keyboard will stop. The themes are sticky as very sticky. They all look like something you might like if you were in elementary school. In addition, the sounds for the keyboard are cleverly used for the say. They're literally the same sounds, sounds, resin or lengths vary. All of this would be understandable if it were maybe a 1.99 fixed fee for it all. But they're literally asking for \$30 a month! As it is more than most people pay for satellite TV. That's more than some people pay for gas every few days. It's a 4 hour job if you're paid the minimum wage in Georgia. Seriously, I don't know what they were thinking. Dear user, thank you for your valuable suggestions and comments. Go Keyboard File Info Last update: January 13, 2019 Developer: GOMO Dev Team Version: 3.60 (387) Requirement: Changes with Device File Size: 35.1 MB Downloaded: January 13, 2019 at 8:46 GMT No07 MD5: 64638626d464dbf619d2f9bb6aca2a48 SHA1: 74d0de8e50487be88ba048407f9b7bf8e1f43f Available in Google Play: Set from Google Play Go Guide Review For Android series. One of the machines that predicts words. This machine will predict some of the most common words, so you can type faster. Another important feature of this application is an integrated dictionary with precision that can tell the meaning of words in each language. Since it is also equipped with an automatic correction and word prediction system, the number of typos can be reduced. Users can also make swipes entering the mode. This app provides up to 800 free emojis and text face features that can be used directly on the keyboard. It also offers more than 140 topics that need to be updated. Because of this app, users can make sure their data is secure because this keyboard is designed to block classified information such as password Contact credit card. These features make this app more interesting than other keyboard apps. It supports more than 60 languages, which is important for those who need to print in languages other than English. Some languages may be found in this app include English, French, German, Hindi, and more than 50 others Not only supports more than 60 languages, this keyboard app can also import contacts, and set the skin and background. In general, if unique colors and layouts are your best interests, this app should be your primary choice. You'll love the way it works for your Android device. Just like other apps, this app also has a few pros and cons. Pros: Many topics are provided. It provides customizable sounds, fonts, themes and background. This allows for a better one-handed operation because of its swiping input. Cons: There is too much spam with notifications about new topics. How to use it is easy to start using this keyboard app. Once downloaded, you have to find its menu by long clicking any entry box. Once the menu appears, select the input method. Next, just tap the keyboard. In addition, to change the location of the keyboard, just click the English button. It is at the top of the keyboard. Long press until it displays some options. Then choose one option to change the style. In addition, you can press the settings key for a long time (123 ABC), and then the menu will appear. The next step is to choose the opposite arrows to get to the most recent layout options. To use the translation package, click the settings-languages-check the language box.
