Time we want to install custom ROM on our Android phone while we have to unlock the Bootloader. After unlocking The Bootloader we can install any type of custom ROM on our Android device or Smartphone.I explained the step-by-step process of how to unlock a downloader without a PC and without rootAlso Read: Download and root with SuperSUWhat is a Bootloader? The loader is a program that performs while downloading the operating system or we can tell when the computer turned on ON loader downloads the operating system on that device. Each motherboard device has its own loader to determine whether the operating system and this inside application is compatible with the motherboard hardware or not. What is CUSTOM ROM? Basically, custom ROMs are used to add a new version of Android for any Android phone, without the official release of firmware for the device. Why is the Android downloader blocked? To prevent the installation of custom ROM on the devices, manufacturers locked the downloader on their device. If the ROM is not properly installed it can damage the phone's software as well as its hardware too, so to prevent these types of loss manufacturer loss lock loaders. It also affects the device's warranty. Why unlock the loader or what does the unlock loader do? By unlocking bootloader on our android device, we can install different types of custom ROMs, installing custom recoveries, using MODs like exposed, multi ROM and magisk and much more! We can do a lot of useful things on our android device. READ Root and install TWRP Recovery on Dooopro P3B this article, I explained the exact step-by-step process of how to unlock the downloader without PC and without root on any Android device. What happens when the loader is unlocked? Unlocked Bootloader Risk !!!! Before unlocking the loader, the following points should be kept in mind. It empties the warranty by unlocking the loader. Make sure you have complete knowledge of how to unlock a rootless downloader without a PC Unlock downloader just in an environment where you fully know what you are doing and have technical knowledge of Android. Opening the loader, it makes your smartphone vulnerable. Unlocking the loader can affect the phone's security and privacy. Yes, it may be blocked again, but its condition will be relocked. In addition, you can't restore the original lock states. Warning before unlocking the bootloaderMake is sure that you have full knowledge of how loader without root. The guarantee on the phone must be overdue. Download the proper software. The device must have at least 80% charge. Finally, let's see how the downloader unlock without a PC and without root? How does a downloader unlock without a computer? There are different ways Loader. among them, I gave a better and easiest way to do it. read carefully and then apply. Note: Unlock bootloader will erase all data from your phone's internal memory. These methods work even if your android is not rooted. The following methods work on every Android phone. Method 1. Unlock the downloader is not PC (Rooting) Rooting the phone it automatically unlocks the loader. READ ROOT and install TWRP Recovery on Prestigio Muze C3 3504 DUOMethod 2: Android unlock downloader app (using app)Install CyanogenMod on your device it will automatically unlock the downloader for you. Bootloader unlocks apk CyanogenMod: This app is used to install a popular ROM on your Android device in a matter of minutes, without rooting your smartphone. Method 3: Android unlock downloader quickly bootUsing Superboot unlocks the device's loader, and it also contains a fastboot as well. Remember that each device has a unique hardware behavior with a motherboard that requires it to own an individual loader. Thus, it requires different procedures and different tools for different brands. Method 4: And the last but not the most recent method to unlock the loader is not PC RequiredThings Need before you learn to unlock the ProcessStep 1. downloader. Install ADB and FASTBOOT for AndroidDownload ADB and a quick download driver from the above link and install it on your Android device. And also install a terminal straightener. Step 2. With root, Browser opens the ADB and inserts it into the /system/binStep 3 folder. Now open the Terminal app, which acts as a commanding tip in Android Device and tie up the following codes. Reboot The Heat 5. Use the OTG cable to connect the device to another root device. Step 6. Enter the adb reboot loader in the terminal straightener to download the connected device in FASTBOOTStep 7 mode. Show a list of connected devices such as fast devices. Step 8. Now to unlock Bootloader Type: fastboot oem unlockEnjoy!!! That's all for this Hope article you'll find a solution on how to unlock a downloader without a PC and without a root. If you have any doubts, please comment below. READ ALSO: Saavn Pro Cracked Apk Most Android devices come with a locked loader for a number of security reasons, which prevents the installation of custom recovery and root access to the device. But for people who need to set up a system level on Android, manufacturers also give a way to officially unlock the downloader. However, unlock the loader loss of warranty of your device, as well as a full wipe device. So in case you plan to install a custom recovery take nandroid backup of your device and then unlock the downloader first will destroy everything and leave nothing to back up. But But There are ways to root out Android devices without unlocking the downloader. One is Kingroot, which is installed as an app on your device and takes root with the simple click of a button on the screen. Download Kingroot (.apk) Download and install the kingroot .apk file on the link above. ^L If you receive a request to allow Google to regularly check your device's activity for security issues..., make sure you DECLINE it. Once installed, open the Kingroot app and click the Start Root button to begin the rooting process. During the process you can repeat Google's warnings to check the activity of the device, DECLINE it as you previously did in Step 1. If the process is successful, then congratulations! You're rooting. ^L to check the access to the root, download the root app to check the Play Store. It's simple. Enjoy root access on your device without unlocking the downloader. Happy Androiding!
