The fourth class is a transitional stage where focus shifts from many basic mathematical facts to applications. There is still a strong emphasis on more complex arithmetic such as prolonged division and more multiplication problems, and you will find many mathematical sheets in this section for these topics. This set of 4th grade sheets has more faction sheets, including cuts and faction comparisons, and be sure to also check out the faction calculator, which will provide a lot of help to the faction's work problems. Interest is another topic covered in 4th grade, and the percentage sheets in this section can be solved using an interest calculator if students have problems with these problems. Students will also use many of their basic math skills to address the conversion unit in 4th grade, and you will find metrics and regular unit conversion sheets in this section as well. Check out your work: For three digit SubtractionCheck your job: for three digit subtractionS begin how to test our work is essential in order to become strong math students! In this exercise, students will first solve subtraction problems, and then they will practice checking their work by plugging the answers into the add-on equation. You're here: [Home](#) → [Sheets](#) → [Grade 4](#) is a comprehensive collection of free printed math sheets for Class 4, organized on topics such as addition, subtraction, mental mathematics, place value, multiplication, division, long division, factors, measurements, factions, and decimal signs. They are randomly generated, printed from your browser and include a response key. The sheets support any fourth-grade math program, but go particularly well with the IXL's 4th grade math curriculum, and their new lessons at the bottom of the page. The sheets are generated randomly every time you click on the links below. You can also get a new, different, just by refreshing the page in your browser (click F5). You can print them out of the browser window, but first check what it looks like in Print Preview. If the page doesn't match the page, adjust the fields, the title, and set up the settings for the browser page setting. Another option is to adjust the scale to 95% or 90% in printed previews. Some browsers and printers have a Print to fit option that automatically scales the sheet to fit the print area. All sheets come with the answer key placed on page 2 of the file. [Psychic Addition Adding 3-digit numbers](#), [2 add-ons Adding 3-digit numbers](#), [3 add-ons Adding 3-digit numbers](#), [4 add-ons Adding 3-digit numbers](#), [5 add-ons Adding 3-digit numbers](#), [2 additions Adding 4-digit numbers](#), [3 additions Adding 4-digit numbers](#), [4 additions Adding 4-digit numbers](#), [5 additions Adding 5 and 6-digit numbers](#), [2 additions Adding 4-digit numbers](#), [5 additions Adding 5 and 6-digit numbers](#), [2 2 2 Adding 5 and 6-digit numbers](#), [3 Additions Adding 5 and 6-digit numbers](#), [4 add-ons Build a four-digit number of parts \(print in landscape\)](#) Find the missing place value of a 4-digit number (print in the landscape) Build a 5-digit number of parts (print in the landscape) Find the missing place value from a 5-digit number To build a 6-digit number of parts Find the missing place value from 6-figure to the nearest number of places , within 1000 Round to the nearest hundred, within 10,000 Round to the nearest thousand, within 10,000 Round to the next ten thousand, within 1,000,000 Mixed Rounding Problem 1 - Round up to the nearest 10 or 100 Mixed Rounding Problem 2 - round up the next 10, 100, or 1000 Mixed Rounding Problem 3 - both above but rounding up the highlighted figures of The Mixed District Problem 4 - round 100, or 1000 Mixed Rounding Problem 3 - both above, but rounding up the highlighted figures of The Mixed District Problem 4 - to the nearest 10000 , 100, 1000, or 10,000 within 1,000,000 Mixed problems of rounding 5 - round anywhere value within 1,000,000 It is completely optional, since Roman numerals are not included in the general core standards. Mental multiplication of the table 2-10, random Table Multiplication Facts 2-12, Random Table Multiplication Facts 2-10, Missing Factor Multiplication Tables 2-12, Missing Factor Multiply single Digit by Whole Dozens, Whole Tens, or Whole Hundred on the Same, but Missing Factor Higher, but Including Whole Thousands As stated above, Missing Factor Multiply in Part 1: Single Digit number by 2-digit : single number on the number about a whole hundred Multiply in Part 3: single digit number on 3-digit order of operations: add, subtract, multiply and brackets - three operations Order of Operations: add, subtract, multiply and Braces - Four Operations Multiply in 2-Digit Columns by 1-Digit 3-Digit on 1-Digit 4-Digit 2-Digit 2-Digit on 2-Digit Mental Division Division Practice Facts (Tables 1-10) Practice Facts Department (Tables 1-12) Missing Dividends or Divisor (Basic Facts Section) by 10 or 100 Divide into entire tens or hundreds divide as many as tens and as many as hundreds into one-digit numbers mentally Division with a balance within 1-100, based on the basic facts of the Division with the remainder , divisor as many as ten Division with the remainder, divisor of the whole hundred Order of Operations: add, subtract, multiply, divide, and bracket - three operations Order of Operations: add, subtract, multiply, split, and : add, subtract, multiply, divide, and bracket - five operations Long Department facts practice (using long separation symbol) Long division, 2-digit, exact division Long division, 2-digit 1-digit dividends, remnants of perhaps Long Division, 3-digit dividends, 1-digit dividends, accurate division Long Division, 3-digit dividends, 1-digit dividends, balances possibly Long Division, 4-digit dividends, 1-digit dividends, 1-digit units measurement factors, and are optional. Conversion between millimetres and centimeters (e.g. 34 mm and cm) Conversion between centimeters and meters (e.g. 2 m 65 cm and cm) Mixed practice two above (millimeters, centimeters and meters) Conversion between meters and kilometers (e.g. 2584 m and km) Mixed practice of them above (mm, see, m and km) Conversion between milliliters and litres (e.g. 2584 ml and L) , 2584 ml, 5 kg 600 g and d) Mixed practice two above: ml and l and g All metric units mentioned above - mixed practice Conversion between inches and feet (e.g. 35 inches in. Conversion of whole miles and yards Conversion between ounces and pounds (e.g. 62 ounces and pound ounces) Conversion between cups, pints, quarts, and gallons All the usual units mentioned above - mixed practice Fraction Adding Fraction Subtraction To Mixed Numbers or Comparvving Fraction Equivalent Fractional Decimal such as the number of problems or the size of the font or the interval of problems, or the range of numbers, just click on these links to use the generators of the sheets themselves: [Sheets of the qgt](#); [Mathematics of the qgt](#); [Grade 4 zgt](#); subtraction of our grade 4 subtraction sheet organized into two sections: mental subtraction, for exercises that students should try to solve in their heads without sticking intermediate steps and subtractions in columns to practice in the form of a subtraction column at different levels of difficulty. Example Subtract within 0-100 69 - 54 - Subtract a 2-digit number of as many as 200 - 55 - Subtract whole tens 720 - 50 - Subtract whole tens (harder) 7 20 - 350 - Deduct as many as hundreds 4500 - 1100 - Subtract the whole (harder) 7458 - 600 - Missing Minuend Problems - 2-digit 57 - No 33 Missing Minuend Problems - Whole Tens 270 - No 130 Missing Minuend Problems 691 - No 52 Deduction from 1000 1000 - 665 - Subtract 3-digit from as many as 4000 - 593 - 3-digit figures 780 - 739 Subtract 4-digit numbers 4,721 - 3,566 Subtraction 5- or 6-digit figures 628,932 -1. 76,875 Regrouping with two zeros 6900 -5,925 Regrouping with three zeros 83000 -62,487 Grade 4 mixed adding and subtracting word problem The Problem Mixed 4 Operations Word Problem Word Example Class 4 Subtraction Sheet Here's a graphic preview for all subtraction sheets. You can choose different variables to customize these subtraction sheets for your needs. Subtraction sheets are created randomly and will never happen again, so you have an endless supply of quality subtraction sheets for use in the classroom or at home. Our subtraction sheets are free to download, easy to use and

very flexible. These subtraction sheets are a great resource for children in kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade and 5th grade. Click here for a detailed description of all the subtraction tables. Click the image to be taken on this subtraction sheet. Subtraction Facts Table Sheets These subtracting facts table colorful and a great resource for teaching kids their subtraction facts. A full set of printed subtraction facts for 1 to 12. Single Subtraction Sheets Vertical Format (en) 2 Numbers These single-digit subtraction sheets are tuned to the 2nd in the vertical problem format. The range of numbers used for each sheet can be individually varied to create different sets of subtraction sheets. You can choose up to 30 problems for these sheets. From zero to twenty Subtraction Sheets Vertical format (en) 2 Numbers These subtraction sheets are tuned to the 2nd numbers in the vertical problem where you can select numbers from zero to twenty to create different sets of subtraction problems. You can choose up to 30 problems for these sheets. From zero to 99 Subtraction Sheets Vertical format (en) 2 Numbers These subtraction sheets are tuned to the 2nd numbers in the vertical problem format where you can select numbers from zero to 99 to create different sets of subtraction problems. You can choose up to 30 problems for these sheets. Subtraction within the vertical number format sheet 2 Numbers These subtraction sheets will produce problems subtracting the vertical format in the chosen number. You can choose the maximum number and number of problems to produce, or you can choose a non-repetitive kindergarten, 1st or 2nd class set of unique challenges. These special set of problems will produce sheets that will directly test common core government standards. Subtraction with Subtraction Points Sheets Vertical format (en) 2 Numbers These subtraction sheets will produce 12 vertical subtraction problems with points to the right of each number for children to subtract. The range of numbers used can be individually varied to create different sets of subtraction problems. Subtracting point shapes to ten subtracting sheets vertical or horizontal format (en) 2 Numbers These subtraction sheets will produce 12 vertical or horizontal subtraction problems using the point represent the numbers. You can choose numbers to subtract sheets to be used from 0 to 10. Subtracting point figures to twenty subtracting sheets Horizontal format (en) 2 Numbers These subtraction sheets will produce 10 horizontal subtraction problems using the points of the numbers represent numbers up to twenty. Equations can appear under point numbers if you choose this option. You can choose numbers for subtraction problems to be used from 0 to 20. Subtracting two digits ending in a horizontal fixed-number format, these subtraction sheets produce large sheets that subtract double digits that end in a fixed number. The numbers can be selected as positive, negative or mixed numbers. You can choose up to 30 subtraction problems on the sheet. One or more Digit Subtraction Sheets Horizontal format These subtraction sheets can be configured for one or more digits of horizontal subtraction problems. The numbers used in the subtraction sheets can be selected as positive, negative, or mixed numbers. You can choose up to 30 subtraction problems for these sheets. 2, 3 or 4 Digits Subtraction Sheets Vertical format These subtraction sheet can be configured to 2, 3 or 4 digits. You can choose some regrouping, without regrouping, all regrouping or subtracting through zero. You can choose from 12 to 30 subtraction problems for these sheets. 4, 5 or 6 Digits Subtraction Sheets Vertical format These subtraction sheet can be configured to 4, 5 or 6 digits. You can choose some regrouping, without regrouping, all regrouping or subtracting through zero. You can choose 12 to 20 subtraction problems for these sheets. One - Two Digit No Regrouping Subtraction Sheets Vertical format These subtraction sheets are perfectly matched for problems that do not require regrouping. Subtraction sheets can be configured with 2 digits minus 1 or 2 problem numbers. If desired, the option of regrouping on these subtraction sheets may be disabled. The problem format is vertical and you can choose up to 30 subtraction problems for these sheets. 2, 3 and 4 Digit No Regrouping Subtraction Sheets Vertical format These subtraction sheets are perfectly substrate for problems that do not require regrouping. Subtraction sheets can be configured with up to 4 digits and 2 add-ons. If desired, the option of regrouping on these subtraction sheets may be disabled. The problem format is vertical and you can choose up to 30 subtraction problems for these sheets. One - Two Digit No Regrouping Subtraction Sheets Horizontal format These subtraction sheets are perfectly matched for problems that do not require regrouping. Subtraction sheets can be configured either with 2 digits minus 1 or numbers of problems. If desired, the option of regrouping on these subtraction sheets may be disabled. The format of the problem is horizontal and you can choose up to 30 subtraction problems for these sheets. Subtraction through zero subtraction Sheets Multiple Digits (en) Vertical format These subtraction sheets are perfectly credited for subtraction practice through zero. Subtraction sheets can be configured to 3 or 4 digits. You can choose up to 30 subtraction problems for these sheets. Decimal Subtraction Numbers Vertical Format These subtraction sheets can be configured for 1, 2 and 3 Digits to the right of decimal and up to 4 digits to the left of the decimal problem. You can choose up to 25 subtraction problems for these sheets. By subtracting money Subtraction Sheets Vertical format These cash subtractions can be configured for up to 4 digits in each subtraction problem. The currency symbol can be chosen from the dollar, pound, euro and yen. You can choose up to 25 subtraction problems for these sheets. 1, 3, or 5 minutes of subtraction of the drill sheets Vertical format time subtraction of the drill table contain all unambiguous subtraction problems on one page. A student who has memorized all the problems of subtracting single digits should be able to develop these subtraction sheets correctly at the right time. Extended subtraction of the Vertical Rig Sheets This sheet will generate advanced subtraction exercises selected by the user. The user can choose from 256 different subtraction problems from the tables, ranging from 0 to 15. The user can also choose 1 minute drill 20, 3 minute drill 60 problems, 5 minutes drill 100 problems, or custom exercises with ranges of 20 to 100 problems and times from 1 to 5 minutes. Missing subtraction sheets horizontally format These subtraction sheets are good for introducing algebra concepts. You can choose different types of characters to replace the missing numbers on these subtraction sheets. The subtraction formats are horizontal and the numbers range from 0 to 99. You can choose up to 30 subtraction problems for these sheets. Missing Digits Vertical Subtraction Sheets These multi digit subtraction sheets are configured for the vertical problem format. The missing numbers on the subtraction sheets are randomly selected to challenge the children. The number of numbers on these subtraction sheets can vary between 2 and 4. You can choose up to 30 subtraction problems for these sheets. Irregular Units Subtraction Sheets These subtraction sheets are perfectly credited for teaching children to subtract irregular units of measurement. These subtraction sheets can be selected to include feet and inches, pounds and ounces, hours and minutes, Minutes and seconds. These subtraction sheets will produce 15 subtraction problems on the sheet. Subtracting leg and inch sheets These subtraction sheets are excellent for subtracting two measurements of legs with fractional inches. These subtraction sheets will use $1/2$, $1/4$, $1/8$, $1/16$ and there is an option to choose $1/32$ and $1/64$'s. Subtraction from the paired sheets These subtraction sheets are great for subtraction practice with doubles or almost doubles. Subtracting Facts from one to ten sheets of Vertical format (en) 2 Numbers These subtraction sheets will produce subtraction facts where the answers are between one and ten. You can choose up to 30 subtraction problems on the sheet. Visual Subtraction Sheets Subtraction Sheets These subtraction sheets produce visual subtraction problems with geometric shapes representing subtraction.
