Filter View all THE FILTER filter systems BRITA fill/enjoy fill/enjoy Fun fill/enjoy Style fill/go Active fill/serve fill/serve Mind filters and cartridges mypure mypure P1 Benefits filtered water Lee water filters BRITA help protect the environment? Yes. All FILTERed BRITA systems help significantly reduce the consumption of plastic bottles. Because BRITA components have a positive impact on the environment. I'm on a diet with a limited potassium content. Can I drink filtered water? The filtration process can lead to a slight increase in potassium levels in the water. However, one liter of filtered WATER BRITA contains less potassium than an apple. If you have kidney disease or watch your potassium intake for other reasons, consult your doctor before using a water filter. Is BRITA filter water suitable for steam irons? It is better to use BRITA filtered water over tap water in steam irons to help reduce the accumulation of lime. However, demille water is recommended for most aluminium-based steam irons for optimal performance. Filtered water is ideal for irons with a chrome steel base. If you are unsure what iron you have, please refer to the instructions or contact the iron manufacturer. Is filtered water the same as distilled water? No. BRITA water filters reduce the amount of substances from tap water that can affect its taste and appearance. The process only partially demilitarizes the water. Distilled water, on the other hand, is completely demilitarized. This is why filtered water is not suitable for use when distilled water is not required, such as car batteries. What are the benefits of BRITA filtered water? Water mains are strictly regulated and controlled, but may contain substances that impair its taste and appearance. THE BRITA water filter can reduce the water network: carbonate hardness/limescale (calcium and magnesium ions) free and associated chlorine (if present) lead and copper BRITA filtered water provides you and your family with the perfect base for aromatic hot drinks such as coffee and tea. It is ideal for cooking and effectively protects household appliances from limestone build-up. What is the best way to store BRITA filtered water? Store a JUG of BRITA water filter in a cool place, such as in the fridge. Also, protect your BRITA product from direct sunlight and consume water in a vessel for one day. What is the hardness of water and why reduce it? The hardness of the water falls into two categories: constant hardness and temporary hardness. Constant hardness does not affect the taste of water or how household appliances work. Temporary hardness affects the taste of food and cooked with hot water. It also causes lime deposits in household appliances that heat water such as kettles, steam irons, coffee makers and washers. By reducing the temporary hardness of the water, THE BRITA water filter cartridges reduce the taste and substances and limestone build-up. The result is a great tasting of water for hot drinks and dishes cooked with water, and less lime scale build-up in household appliances. How hard is your water? Order a free water hardness test strip to find out. Are the questions about BRITA filter cartridges Safe? Yes. The contents of all BRITA cartridges are nutritional quality and completely harmless, even if accidentally ingested. Do BRITA fluoride cartridges remove? No. BRITA cartridges are not designed to remove fluoride. Some fluoride is naturally present in tap water, while some water companies add fluoride to the water. If you are concerned about the presence of fluoride in tap water, contact your local water supplier. Do BRITA filters have an expiration date? With the right storage, all original BRITA cartridges can be stored for several years. Proper storage of funds at temperatures from 1 to 50 degrees Celsius, without direct sunlight or heat. The cartridge must also remain sealed in the original packaging. How do I change my personal information on myBRITA account? First, log in with your username and password. Your username is the email address you used to register. To check or change your personal information, go to my account area. Click the Change button to make all the necessary updates. Please confirm all changes by clicking the Save Change button. For reasons of data privacy, you are the only person authorized to change your data. If you forget your password, please click the Lost Password?. We'll send you a new one by email. How do I return a BRITA order? You can return any item within 14 days of delivery without explaining the reasons for the return. Punctual dispatch will be sufficient to meet deadlines. To return your product for free, please contact BRITA Customer Service. Please don't return unstamped parcels to us. If you do this, we bill you for an additional cost. Please include a completed delivery receipt with your return. After receiving the item, we will refund you the cost within two weeks, provided that the bill has been paid. Please enter your account number in your delivery note so we can get your money back. We cannot accept returned items that are damaged due to misuse or faulty return packaging. After a 14-day period, you can still return defective or faulty items within the legal warranty period. Keep your receipt in a safe place as proof of warranty. Items delivered with obvious material or manufacturing defects must be Registered. Please contact BRITA customer service for free. How do I get rid of BRITA and MicroDiscs cartridges? BRITA recognizes its responsibility to protect the environment and makes a positive contribution to the world around us. We strive not only to meet, but also to and conduct business in an ethical and environmentally friendly way. As a pioneer in internal water filtration, BRITA developed a program to dispose of depleted filter cartridges in 1992. Since then, all parts of the BRITA filter can be completely recycled so that the materials can be recycled. In response to consumer demand, BRITA UK has launched the first in-store recycling scheme, where used cartridges can be returned to high street stores including Argos, Robert Dyas and Tesco and many independent stores providing more than 7,000 recycling sites across the country. Unfortunately, no store is obligated to house our trash cans and we would suggest that customers talk to their store directly if this is something you find useful. If this is not possible, we recommend that filters be put into your plastic recycling bin so at least the plastic will be recycled in an environmental way. To help you find the nearest BRITA trash can, please visit www.brita.co.uk/recycling where you can enter your zip code to find the most convenient recycling location where shops with the Recycling logo will be happy to take your Maxtra, Maxtra, Classic, Inline and P1000 filter faucet cartridges back to recycling. Visit www.brita.co.uk/recycling How to order BRITA products online? Browse the BRITA online store to find what you're looking for. Put the item (s) you want in the shopping cart. Tap the shopping basket icon on the top right to the right of each page to see the item you choose. You can also review the details of the product and remove the products from the basket. To order, go to the shopping cart and click Continue at the bottom. Sign in with YOUR BRITA account or sign up as a new customer. You can also order as an unregistered guest. Now choose a payment method. Browse the shopping cart before ordering. Click send an order to send us a mandatory order. Please note that orders cannot be placed through a contact form. Contact customer service for help getting an order. How do I prepare a BRITA water filter cartridge for use? Both BRITA MAXTRA and BRITA MicroDisc have been designed for fast and easy installation. WRAPERAGE BRITA MAXTRA: Just fill a jug or bowl with water. Immerse the BRITA MAXTRA cartridge in cold water and gently shake to remove air bubbles. Insert the cartridge into the funnel of the jug and run the water through the filter in half. After resetting the first two litres, the BRITA filter cartridge is ready for use. BRITA MicroDisc: Before using MicroDisc for the first time, place it under running water and gently wipe both sides with your fingers for about 30 seconds. It's effective any free carbon dust that may be present. How to repay the BRITA voucher? Go to the shopping cart and enter the voucher code in area. Click 'Redeem' to confirm the code and the voucher will be applied to the total order amount. The amount of the voucher is automatically deducted from the total order amount. Please note that you can only redeem one voucher per order. Any free gifts or extras you are entitled to are automatically added to your shopping cart. How does MicroDiscs work? What are they made of? The new BRITA MicroDisc uses ActivSelect technology to effectively reduce the taste of substances, allowing valuable minerals to pass through. Each MicroDisc is made of natural carbon from coconut shells and has millions of tiny pores. These pores trap and block unwanted items. The result is fresher, more delicious water. How does the MAXTRA cartridge work? What's inside the cartridge? The filtered material of the MAXTRA filter contains a mixture of ion exchange resins and activated carbon that has been tested for food grade quality. The ionic resin used reduces the hardness of the carbonate (lime) and reduces metals such as copper and lead, which can result from internal installation. Activated carbon reduces substances that can impair taste, such as chlorine and chlorine compounds. How long can I use the BRITA MicroDisc cartridge? Typically, you have to replace MicroDisc every four weeks for optimal performance. Many BRITA products come with a handy electronic indicator that tracks the life of the filter and tells you when to change it. How long can I use the MAXTRA cartridge? To make you enjoy BRITA's high-quality filtered water, replace the filtered cartridge regularly. The life of the filter cartridge depends on the quality of the local water. If your water base contains carbonate hardness 10-12 degrees Celsius, the filter cartridge should be replaced after 100 liters of water. If the water is more complex or the consumption is longer, the cartridge life decreases accordingly. The cartridge must be replaced at least every four weeks. It's wet inside my cartridge. What should I do? Don't worry, it's perfectly normal. Whether it's wet or dry doesn't affect the performance of the cartridge. What are the benefits of BRITA water filter cartridges? All BRITA filter cartridges provide high filtration performance, effectively reducing the amount of substances that can negatively affect the taste or smell, such as chlorine. In addition, BRITA filter cartridges are easily installed, installed and stored. BRITA MAXTRA: The innovative BRITA MAXTRA cartridge provides up to four weeks and 100 litres of freshly filtered water. Its ion exchange resin reduces both carbonate hardness (lime) and metals such as copper and lead. Activated carbon reduces substances that can worsen such as chlorine and chlorine compounds. BRITA MicroDisc: Compact and powerful BRITA MicroDisc filter up to 150 litres and lasts up to four weeks. The technology stops unwanted elements that affect the taste of water, such as chlorine, allowing minerals such as calcium and magnesium to pass. What black particles are in my water after filtration? It's just activated carbon from the BRITA filter. The granular activated carbon is made of coconut shell. Like all natural products, coconut shells are subject to natural changes in the quality of products. Sometimes this results in carbon parts in filtered water. Preparing a cartridge, as described in the product guide, can help eliminate carbon dust. What happens when the cartridge is exhausted? Can impurities leak back into the water? Once the BRITA cartridge is full, it just stops filtering. It does not drain the impurities back into the filtered water. What is a BRITA cartridge? The BRITA cartridge service provides you with new filter cartridges every six months to choose one or two years. When you order a cartridge, you automatically get a free gift in your shopping cart. With the exception of the first batch, you will be notified by email a week before delivery. THE BRITA cartridge service is not a subscription! It ends automatically at the end of the chosen duration. When do I get my order? How can I track that? We deliver quickly so you can enjoy your BRITA products as soon as possible. As soon as your order is handed over to our logistics partner, you will receive an email notification. Please note that we are not responsible for delays caused by our logistics partner. Once you have placed an order, you will have access to your status by joining MyBRITA. Click My Orders to keep track of every part of the process. If you have booked as a guest, it is impossible to trace your order to MyBRITA. However, we will confirm your order by email and notify you by email when your order leaves our warehouse. Where can I get BRITA spare parts? What payment methods can I use? Are they safe? You can pay for the purchase at the BRITA online store using MasterCard, VISA and PayPal. For online orders, we use a secure SSL connection for the confidential information you send us during the ordering process. This ensures that your information cannot be intercepted by third parties. The questions about BRITA products are BRITA pitchers dishwasher-safe? Yes, most of our jugs are safe for the dishwasher up to 50 degrees Celsius. Alternatively, you can wash the brita jug by hand using warm, soapy water and sponge. For more information, please contact the training guide. The following BRITA products/components are not safe for the dishwasher. Please cleanse as described in the instructions: BRITA fill/enjoy Fun and Aluna cover BRITA MEMO, METER and Smart Light: Remove from the lid before placing the lid in the dishwasher Are BRITA products BPA-free? All BRITA materials in contact with water do not contain polycarbonate and therefore therefore BPA release. In addition, the materials used in BRITA appliances are certified food quality. This includes migration tests in accordance with EU law. Accordingly, there is no migration of prohibited/dangerous substances above the levels set by the EC. Are the minerals stored in the water filtered by my brita-fillet/fillet system? Yes. Minerals such as calcium and magnesium can pass through the microDisc's innovative activated carbon filter. It is designed to reduce contaminants that impair the smell and taste of drinking water. Can I also use my BRITA fill/serve mind to make hot drinks? Your fill/serve mind is designed to improve the taste of tap water to cold consumption. You can also use filtered water to make hot drinks, but that doesn't protect your appliances from limestone build-up. Can I exchange my BRITA filter filter on my own? Yes. It's quick and easy to do. Just follow these four steps: Unlock the cartridge using two blue levers on the sides of the cartridge head. There is no need to turn off the water from the water supply: the valve is automatically disconnected in the cartridge heads. Release the pressure with a flash valve. After that, be sure to close the valve again. Pull out the old cartridge and replace it with a new one. Locking the cartridge in place. Can I put my BRITA file-go active in the freezer? No, freezing your fill/go Active can damage parts of the bottle or MicroDisc. Can I use my BRITA fill/go with liquids other than drinking water? No. Your BRITA fill/go Active or Vital system is designed to be used only with water tested as safe to drink in accordance with legal regulations such as tap water. Can I use the BRITA water filter system with liquids without despairing of tap water? No. BRITA water filtration systems are designed to be used only with municipal tap water or with water from private supplies that have been approved safe to drink. Do BRITA faucet filters come with a warranty? By registering your BRITA product, you will receive a 12-month free warranty extension, starting with the expiration of the legal liability for defects (24 months from the start of purchase). Can you find more information here Lee old MAXTRA cartridges fit my BRITA fill/enjoy style? The new BRITA fill/enjoy style comes with the new all-purpose MAXTRA cartridge. Old MAXTRA cartridges do NOT fit into the new media. Does BRITA fill/enjoy Fun fit in the fridge door? Yes. It is designed to fit all standard refrigerator door shelves. Exception: BRITA fills the XL models. Note that the pitcher must remain upright, as it may not be Does BRITA fill/go Active fit into the bike water bottle holder? Yes, the usual 0.6-liter size is designed to fit into most standard bike water bottle holders. However, the XL 1-liter size does not. How do I track my filter performance? Depending on the BRITA BRITA water filtration system there, BRITA METER, BRITA MEMO or BRITA Smart Light monitors the performance of your filter. Please contact the product guide for more information. How do I activate THE BRITA MEMO? Simply press and hold the start button on the lid until the four bars appear on the display and erupt twice. Now BRITA MEMO will start the countdown. The flashing point in the bottom right corner of the display indicates that THE BRITA MEMO is working. The number of bars on the display indicates the remaining life of the cartridge for several weeks, with one bar disappearing each week. You must replace the filter cartridge at least every four weeks. This way you will enjoy the optimal performance from your BRITA cartridge. How do I activate BRITA METER? After inserting a new MAXTRA filter, press and hold the start button on BRITA METER for about six seconds. When four bars appear on the display and OK flashes, you've activated BRITA METER and your MAXTRA' cartridge is filtered properly. To determine the remaining life of the MAXTRA filter cartridge, just look at the percentage shown in the bars on the display. Flashing water droplets that consistently move from top to bottom on the display indicate an active filtration process. When an empty filter cartridge icon flashes 'NEW', it's time to replace the MAXTRA filter cartridge. You must replace the filter cartridge at least every four weeks. This way you will enjoy the optimal performance from your BRITA cartridge. How do I activate SMART Light BRITA? Just press the LED button on the lid to see the current state of the filter. Every time you use a water filter, BRITA Smart Light tells you about the state of the cartridge with its colored flashing lights. How do I know when to exchange a filter cartridge for tap filters? The lifespan of the P 1000 and P 3000 filter depends on local water hardness and individual water consumption. Look at the cartridge status indicator to see when to change the filter cartridge. How much water does brita fills active hold? The fillgo active water bottle is available in two sizes. The regular size can hold up to 0.6 litres of water, while the XL can hold up to 1 liter of water. I have an OLAP system but can't find it on the website. Help! This is because OLAP has been renamed mypure. Find it online here. Should I close my BRITA fill/enjoy Fun when I'm not using it? Yes. Closing your BRITA fill/enjoy Fun when not in use ensures that the filtered water stays fresh and clean. What are the benefits of BRITA faucet filters? BRITA tap filters are connected directly to your main water line. This allows you to enjoy the great taste of BRITA filtered water whenever you want. Instantly and as much as you What to do with a water filter if my water supplier notifies me of tap water problems? We advise you to always follow the recommendations of your water supplier. If I instruct you to boil water before drinking, we recommend that you first filter the water and then boil. When boiling water is no longer needed, clean the entire BRITA filter system and insert a new cartridge. What is the difference between BRITA METER and BRITA MEMO? Both features are electronic cartridge replacement indicators that remind you when to replace the cartridge filter. BRITA MEMO has been tracking the time since you last replaced the cartridge filter. Just click to start the countdown. It automatically reminds you when it's time to replace the cartridge. BRITA METER uses three factors to determine the optimal time to replace the cartridge: the volume of filtered water, the hardness of the water and the time of the last cartridge replacement. Why doesn't BRITA have a Fun pen? BRITA fill/enjoy Fun is designed to save space. It is easy to store in the fridge to make room in your kitchen. Why is the funnel in my BRITA fill/enjoy Fun so small? I have to refill it so often. BRITA fill/enjoy Fun is specifically designed for smaller households with lower water consumption or for people with limited space. It also comes with practical icons on the filter. They will help you filter the right amount of water for specific use. Will the BRITA tap water filter match my sink? The BRITA tap water filter can be upgraded to fit most sinks or worktops and require just one standard 35 mm hole. No additional plumbing or holes are required. The filter cartridge is small and does not require much space under the sink. It can be installed horizontally or vertically. Vertically.
