Book Properties PDF has now established itself as a form of change. People immediately understood - what was it for? It was like PostScript - was it related to success starting from day one? I mean, people couldn't wait to get PostScript in 1985. I'm not kidding because Steve Jobs and John Warnock put checks in their hands and they said: How much? How much do I want now and I want it to be faster next year! NON-REFUNDABLE-Lavignac Solfej 1A wasn't like this with PDF - it wasn't like that at all. Around 1996 I visited Adobe regularly, did a lot of things with them in PDF format, etc. and in this particular case San Francisco confiscated my customs passport and said: Purpose of the visit, sir? Work or pleasure? Said. I said: It's business. My God, I'm so sorry what company are you visiting? Oh, my God, I'm so sorry. Now they're in San Jose. Oh, I'm so sorry. It's interesting, sir, and what are you doing with them? I think that's what we're all used to: Are you an illegal immigrant? Do you really work for Adobe? or paid, sir? No! No! No! We are only interested in the same thing: We do research and I'm here to meet people to find out where we're doing our project. And he said, I'm not going to do that. But what do you do with Adobe, sir?, and I said: Well, you may not have heard of it, but it has a product - if you like - called a PDF, and you can read it with a free program called Acrobat Reader. His face froze, and I thought, Oh, darling, and he took off his glasses. He put them down, turned my passport upside down, pulled them aside and said, Sir! This is PDF NON-REFUNDABLE-Lavignac Solfej 1A! What's this for him?! And I just ... I've heard similar things from other people, I smiled. I said, well, do you want a five-minute story or an hour-long story? I told him: Look, you probably know that you're exchanging documents with people and they told you - they told you to use this route for PDF and use THE PDF as a standard form of exchange? Said. Yes, I'll have to, that's absolutely true. We don't understand why we can't just send word files to each other! So I said: You know some problems with sending Word files to each other. Everyone has a slightly different version and uh, darling, some people work on a computer rather than a Macintosh, and it doesn't look the same...? Oh, I'm so sorry. Tell me about it! He said, and I said, well... And then there's something else that says: WordPerfect is much better and I absolutely refuse to use anything from Microsoft? Oh yes! There are several of them. So I said, well, it's about exchanging documents. You have to remember. But ideally, you should have a common, quality solution that can suit other options. Think of newspapers that are accurate and need something printed on paper, they want to preview in smaller sizes and they want the document to fit in different sizes and resolutions and always take quality - they want them to gently move between them - so they don't start to mint apart - even if you almost inflated it to the size of the shed door. Newspapers really appreciate this ability, I said, so what is this path to non-REFUNDABLE-Lavignac Solfej 1A PDF? He said: Yes, they should have a route to the PDF. And I said: Other people -- let me give you one more example. olleg think it's just magic to bring a program called AutoCAD, you know architects can be used for drawing computer help design; it can be used for electronic chain. But it's important for them to maintain quality when scaling to a different size. It's a graphic model; It's a complex, scalable, graphic model in it. And at this stage a broad smile appeared on his face, and he said, Sir! - he puts on glasses - Sir, thank you very much for that! Thank you thank you! He gave me my passport back: Welcome to the United States of America, sir. So I left it to think: I'm not surprised - a lot of people don't really understand this; They don't understand why it's necessary. I thought - I don't think it was on this trip, maybe next year when I worked with Adobe many times, but especially in the early '93s. John Warnock and his colleague Chuck Geschke chose us here in Nottingham as one of the first beta sites in PDF. And I think a year after my relationship with an immigration officer, I went to John and told him that you have the first problem: John. PDF NON-REFUNDABLE-Lavignac Solfej 1A - how are you? And he said, David, this is a long, long, long and difficult struggle! And I said, yes, can I just say that this is not a postscript of nighttime success? And he said, No, it's not. And he said: If you want to ask me how much I spend on PDF, the answer is \$100 million. Once you start charging, people will just give it up and not use your format. So he said: We should have lived with it, but I'll say it again - we're sure we're right! So I thought I'd talk to my colleague Ken, who was my agent at the time. I went out and told him a story. He said: David, we technically have us - we know John and Chuck are absolutely right. But he said: I must say, there are nerves in this company, because there are nerves, especially among the suppliers you see: We do not get any bonuses from non-REFUNDABLE-Lavignac Solfej 1A PDF! People don't understand what it is and that's it. Please keep me responsible for Photoshop! I'm going to make a lot of money and bonuses from Photoshop. And I said, I don't know. Yes, I'll have to make that clear. And when I think of my friends at Adobe, that responsibility for Photoshop is real... Well, you know the measure of PDF success if sales revenue exceeds those in Photoshop? And the answer to that question, I think I have a book in place like this. Adobe Story - I think in April 2004, PDF revenues eventually exceeded Photoshop's revenue. And during my visit, then, with great desire, as I remember, photoshop a crowd of four or six people on the lower floors of a building in San Jose or something. PDF/Acrobat/PostScript users were much higher: 11th and 12th floors. Senior management, John, Chuck, etc. were at the top of the tower. When I got there - and with joy - from the moment the PDF/Acrobat sales and sales results topped Photoshop when it crossed Photoshop, a large amount of champagne, tapes and greeting cards were sent on the 4th and 12th floors. It was: Pressure on you, now is a good day! The file can be deleted for many reasons. These may be the main reasons: the file may have been deleted because it has never been downloaded for a long time, the file may have been deleted by the downloader. Or the file may have been deleted by us because the site does not meet the terms of use ... We don't regret it! dosya.co site has great respect for personal rights, copyright and all conditions established in our terms of use. And unfortunately, we have no concessions on this issue.
