Classification: Game controller description: iPega PG-9118 Gold Warrior Android and iOS compatible BT Gamepad - New updated gamepad, no need for APP, easy to use, support PUBG, Survival Rules, Fornite and ect. Support for Android/iOS/win 7/ 8/ Bluetooth games 10 driverless sisters; The A/B/X/Y button has a white LED light. And its b... NOTY (Packing Number): 30 PCS Net Weight:248.8g Gross Weight:355.2g MEAS:18'14'7CM Details of Product Instructions If you've been following my article, you may have stumbled upon my previous HOW-TO message on ipega gamepad setup from my other blog. Some of them were able to successfully customize their IPEGA controller by installing the official IPEGA Game Center\_ENG.apk. Although some of those who tried failed. I'm not sure what or why. But there is always the possibility that the mobile device they pair with the IPEGA controller is not compatible at all. However, my friend the game enthusiast once again found a way. Now you can pair up with a mobile device with an IPEGA controller without installing any apps. And that's what we're going to show you today. Are you one of those young at heart and loves to play online or offline games? Games like these new Games Nintendo 3DS XL and Wii U. If you are, then I'm sure you'll enjoy more games on your mobile phone with ipega controller controller. While there are other controllers like the Moga Pro Power controller I reviewed last year, which I think is also cool and neat to use. Either way, there's only one main clue as to why I and others use the controller controller. And that should have better control over the game. Кроме того, наличие настройки геймпада контроллера делает его более удобным и менее навязчивым. Unlike swipes and tapping directly on the display screen of user interface controllers. The real feeling isn't just there. If you know what I mean. © so much for introduction and without further farewell, I'll be letting you now check out the steps below and watch the video so you can have fun with the IPEGA game controller. Get your own iPega PG-9028 Multimedia Bluetooth game controller for Samsung Huawei iPhone iOS Android. Nwo! As you set up the IPEGA controller without any First apps (as well as important), you must remove the installed IPEGA Game Center app from your device or any third gamepad app from your mobile phone to avoid conflicts. Then, on the IPEGA (PG-9025) controller, click the X and HOME button at the same time. Wait until the red LED flashes. Once the red LED flashes, you can now pair it with the device. That's it! Now you can test it by opening any game app drawer. In our video below, we'll show you an Android gaming app called Beach Buggy Blitz. And in this game you will see that we can use IPEGA IPEGA Controller. You can try to pair your mobile device with IPEGA first with this app-dependent setting. But if your device can't recognize your controller controller or not paired, then you can try using the official app that I mentioned above. Now if all fails, then check with your supplier. I'm sure you don't want to spend your precious money with a device that you can't use after all. Let us know if the steps above work on your IPEGA gamepad regulator. Update: If you're using the iPega PG-9028 controller, you can visit this article to find out how you can pair iPega PG-9028 with your device. Share this article with a friend.
