Sakae Osaka No. 2 Plant Co., Ltd. has established the following quality policy for the production of products that satisfy customers in the production of factory equipment, logistics equipment, office equipment, environmentally friendly powder coating and assembly packaging. The quality control is always based on quality in the first place, so that customer satisfaction and trust can be gained. We produce products that comply with laws and regulations and take into account customer requirements, as well as create quality in all processes delivered to customers. In addition to promoting continuous improvement through management reviews, internal audits, etc., compliance and quality management systems, each person is responsible for the following items as important quality points. Reduce Customer Complaints Promoting Activity 5S To achieve quality policy, report this policy to all employees for the post, set quality targets, and promote quality control. This quality policy is reviewed once a year. Sugimura Manufacturing Co., Ltd. 512-8064 11 TEL:059-364-7788 Fax: 059-364-7541 We work through the entire process of product development, prototyping, mold design and manufacturing, press processing and automotive parts assembly in Mie Prefecture. ISO14001 Certification Certificate (PDF 2.8MB) Is the main text from here Menu associated with this page back at the top of the page OF HOME zgt; CSR zgt; ISO9001 Certification Acquired by Maruzen, Maruzen Co., Ltd. acquired the ISO9002 International Standard Certification System in 1996. Maruzen Co., Ltd. in 2003 and Keiyo Logistics Co., Ltd. acquired the ISO9001 quality assurance system certification in 2004. ISO9001 is constantly improving the creation and maintenance of quality management programs and their effectiveness, i.e. systems providing good products and services, as well as organizations that achieve their management. Through the acquisition of ISO9001, Maruzen is working to improve operational efficiency, enforce laws and regulations, and strengthen the organization's structure. The goal is to increase customer satisfaction by providing stable services that meet the needs of our customers and improve the quality of our services. With the acquisition of ISO9001 certification, Maruzen will continue to operate as an integrated integrated logistics company for chemical products aimed at high quality, high value added, and no accidents. Yoshida Sangyo is an ISO9001-certified company, an international standard for quality management systems. Following a review of international standards, the transition to the 2000 version was revised, and the transition to ISO9001 was completed on 23 May 2003. The basic philosophy of the quality policy is Yoshida Sangyo Co., Ltd. provides a quality that delivers high customer trust and satisfaction by implementing a quality management system in the construction of civil engineering, construction and housing. In order to improve the quality of construction, we set quality targets in departments and hierarchies, as well as constantly assessing and improving them in the planned cycle. We will meet the requirements of customers, comply with laws and regulations, and strive to increase customer confidence and satisfaction. We strive to ensure that our policies are well known and well-functioning for staff, involved in quality management systems, through quality education and advocacy. We regularly review our quality management system through internal quality checks and management reviews and strive for continuous improvement. December 10, 2002 President and CEO Yoshida Sangyo Co., Ltd. Makoto Yoshida I think there are different goals to work on obtaining isO9001 certification with customer satisfaction as a first, but our main goal is to satisfy our customers. To that end, we value the following: Review customer requirements. Develop a plan that fits your requirements. Make sure the quality meets the customer's requirements. From corporate image to management efficiency, ISO certification acquisition is still also a trend, and improvements in corporate image may have preceded. From now on, however, ISO9001 must be positioned as a system that is useful for management. To this end, we are launching the following system: Education and training for employees involved in quality management systems Preventing inconsistencies and sharing measures and information to prevent continuous improvement through internal audit and top reviews Continuous improvement through internal audits and reviews iso 9001 hp inc. iso 9001 hp pdf. iso 9001 hpe. certificado iso 9001 hp. certificat iso 9001 hp. hp iso 9001 certificate pdf. hpa iso 9001. hp inc iso 9001 certificate
