It is best to gently pull the paper from the printer. Turn off the printer, and make sure that the printhead is not dependent on paper and there is no paper left on the printer. Cartridges that are not genuine may not be recognized by the printer. In this case you will receive a message that the cartridge is empty. The purchased cartridge manual usually contains a solution, if this does not work, it is recommended to contact the seller. There may be a variety of reasons for poor print quality. Check if the cartridge or toner is full. If so, inkjet printers often require cleaning of the printer, the cartridge has dried, or the print head is damaged. With laser printers, calibrating laser printers is recommended. The laser printer is printed with a toner and the inkjet printer is printed in ink. In most cases, the inkjet printer cartridge is damaged and the cartridge needs to be replaced. DPI stands for Dots Per Inch and is the number of ink droplets (per inch) that end up on paper when printing. Is your question not listed?
