You will need to choose one depending on your version of ROM Android. There are several overlays with different versions for some versions of Android. Mandatory versions of Android : Nougat 7.0 - 7.1.1 - Oreo (8.0-8.1)nineteen onehundredfortyone P.apk Description: IMPORTANT! When you open a theme in the substrate app, you'll see the menu fall out at the top of the overlays. You have to choose one depending on the Android version of your ROM. There are also some linings with different options for a specific version of Android. HOW TO APPLY the theme. Choose all overlays (if there is any option to overlay, read and choose wisely), click floating action and choose build and upgrade. Wait until the process is over and restarted. Open the substrate again. CHARACTERISTICS: When you open a theme in the Substrate app, a drop down menu appears at the top of the layers. You have to choose one based on your version of Android ROM. There are also overlays with different options for a specific version of Android. Supported Android (7.0 and UP) Supported Android Version:- Nougat (7.0 - 7.1.1) - Oreo (8.0-8.1) Nineteen (Substrate) (LITE) vonehundredfortthree (Patch) Requirements: 7.0 - Up Substrate Thematic: Please READ! The theme only works on 7.1.x OMS ROMs - the theme doesn't work well in stock and LineageOS is based on ROMs (you can get a FC or unthemed part of some apps) - you won't be able to set the theme, if you installed Lucky Patcher on your device - Black and Translucent) - Keyboard AOSP (black and translucent) - Calculator AOSP - Google (black) - Watch AOSP (black) - Contacts AOSP and Google (black) - Documents (black) - Gallery AOSP (black) - Gmail (white), invert it in the future) - Play Store (white, invert it in the future) - Play Music (white, invert it in the future) - Google Play services (gradient, Black and Translucent) - Google (black and translucent) - Hangouts (white) - Store (white), invert it in the future) - AOSP and Google Messages (black and translucent) -AOSP Calendar (black) - AOSP installation package and Google (black) - Dialer AOSPP - Google (black) - Post, invert it in the future) Apps superimposed, only system themed now) - Let me know if you're still getting any bugs This app has no advertising Read more: If you want to download at full speed and help us keep this site active, you can sign up by clicking on the banner below. Home: Download Instructions:dropapk.to/ubr3sdm5ehol Mirrors: upload.ac/g57ddpsbt0v4 www.uploadship.com READ FIRST! The theme works with Google shares and custom AOSP based on 8.1/9.0 ROMs' LineageOS is not fully supported OxygenOS is not supported Doesn't work on Samsung devices running IOS IOS shares You need a substrate app from the Play Store to apply the theme You must be rooted!MANTPORT! When you open the theme in the substrate app, you'll see a drop menu on top of the overlays. You need to choose one depending on your version of ROM Android. There are also some linings with a different option for a specific version of Android. HOW to apply the theme. Choose all the lining (if there is any option in overlaying, read and choose wisely), click floating action and choose Build and Update. Wait until the process is over and restart. Open the substrate again, select all the overlays you've built before, click the floating action button and select Enable this time. Enjoy the theme! To update the overlay, you must first disable it, create an update, and finally turn it on. There's no need for a reboot, except for the Android overlay system. Don't report errors if you use custom DPI!WHAT'S THEMEDSystem ONLYFor error reports and support join my Telegram goupt.me/lev03_design nineteen substrate vonehundredfortthree Apk corrected the latest is the personalization of Android appDownload the latest version of the nineteen substrate Apk corrected for Android with a direct linknineteen substrate is a personalization android app, made by the Android app READ FIRST! - The theme only works with custom 7.1.x/8.x ROMs with OMS support on any device and 8.x stock ROM on Nexus/Pixel devices. The theme doesn't work well on LineageOS-based ROMs (many apps can FC) - The theme doesn't work on any other stock rom devices - you need a substrate app from the Play Store to apply them!IMPORTANT! When you open the theme in the substrate app, you'll see a drop menu on top of the overlays. You need to choose one depending on your ROM Android version. NOTE: Some apps such as AOSP Watch, Messages, and Gallery may or may not work because each custom ROM has its own version of these apps, so if get an error when compiling, just don't install them. After each update I recommend a clean installation (remove all the overlays from the previous version and then install new ones) WHAT THEMED nineteen substrate Apk nineteen substrate ApkWhats New:- Made the theme LITE (removed all overlay applications, overlays, System themed now) - Let me know if you're still getting any bugsthe app doesn't have Google Play AD PLEASE READ! nineteen vonehundredforty (Patched) APK Free download latest version for Android. Download the full APK from nineteen vonehundredforty Patched. Review and features nineteen vonehundredforty (Patched) Before downloading nineteen vonehundredforty (Patched) APK, you can read the brief review and the list of features below.
