The front of The Newest Karaoke Head Himedia No10 Pro is equipped with 8 right touch keys, including machine control options, mid-infrared recorder and status light, left - a small screen displayed time parameters. Rooms and joysticks are illuminated by LEDs, when turned on the machine creates a very beautiful decorative light. In addition, the front of the device has an Ultra HD print that shows the power of the No.10 Pro, which can decode video with 4K Ultra HD resolution and 60fps frame rate. On the left side of the latest Karaoke head Himedia No10 Pro is 3 USB ports, including 2 ports 2.0 and port 3.0. Next to it is an SD card slot that supports up to 64GB. The side should be simpler, consisting of only one lever to open the lid whenever the inner hard drive needs to be removed. It's easy to disassemble the hard drive, just open the lid and attach the hard drive to it, just like in any HDD box. Pay attention when attaching your hard drive, be sure to press the contact slot tightly, so that the playhead No.10 Pro gets a hard drive. It supports a 3.5-hard drive with a maximum capacity of 6TB. The back of The Newest Karaoke Head Himedia No10 Pro is fully equipped with peripheral ports available on both Android TV Box and HD players. The USB hub 3.0 is used when connected to a computer. At the time, the No 10 Pro was obtained as a conventional hard drive case that could copy the data without removing the internal hard drive. The Android Box Himedia No10 Pro also has an additional antenna that increases Wi-Fi viability and a radiator fan, ensuring the board and hard drive work steadily. Accessories that come with Android TV Box Himedia No 10 Pro include remote control, power, HDMI cord and guide. The latest karaoke head Himedia No10 Pro has completely inherited the noble and elegant beauty with the prickly aluminum body Himedia No10 IV, but the internal configuration of the q10 Pro is much more powerful. The Himedia No10 Pro is equipped with Huawei's newest 64-bit HiSilicon Hi3798C V200 chip. The Mail-720 GPU chip, 2GB of DDR3 RAM, 16GB of internal eMMC, Gigabit LAN, 2-band Wi-Fi (2.4Ghz/5Ghz 802.11AC) running Android 5.1 Lollipop operating system. With the HiSilicon Hi3798C V200 chip, the No 10 Pro can decipher The latest compressed standard video is H.265/HEVC, with Ultra HD video protected by email resolution. II. Pros feature Android TV Box Himedia No 10 Pro Benefits: Basically, the latest karaoke himedia No 10 Pro and No. 5 Pro have the following improvements compared to No. 10 IV and No. 5 IV: - Configuration: Stronger, upgraded from HiSilicon Hi3798C V100 chip line HiSilicon Hi3798C V200. - 2GB of RAM, 16GB of RAM, Bluetooth, Wi-Fi AC (this configuration has been around for a long time on the X6 PRO, so far Himedia has just equipped its product). - Images that support Dolby Vision and HDR10 (unless you're a movie viewer with a hard drive, don't have your own digital sound system, this improvement doesn't make sense). - Dolby DTS HD and Dolby Atmos audio (for those who like to watch movies with a hard drive and have their own sound system). - Android 5.1 (already available for a long time on the X5 AND SIDU X6 PRO, the upcoming SIDO will launch a TV Box line running Android 6.0 much more optimal). Disadvantages: The recently launched firmware product No10 Pro is not stable, you need to wait for a new update from the manufacturer in the near future (was launched almost 1 month, but does not have a new firmware to fix the main errors), some user errors react as follows: - The error of the system's user interface failure: sometimes suddenly stops during use, now the interface message has stopped, which makes the user very uncomfortable. - Some apps to use are Force Close: the app is suddenly stopped. - Subtitle error when watching movies from a hard drive - Processing apps with slightly lower response rate than other high-quality Android Box lines such as qidoo X6 PRO, MINIX Neo U1, Mygica ATV1900AC... - Firmware is not automatically updated if there are new firmware users to download and update manually. Powerful updates Himedia No10 Pro compared to Himedia No10 IV - The last karaoke head Himedia No10 Pro using the Chip HiSilicon Hi3798C V200 quad Core 64bit Cortex A53 (No10 IV: Hi Silicon Hi3798C ARM Cortex A9) - Mail-720 GPU Chip (No10 IV: ARM Mali-450MP6 GPU) - RAM: 2GB DDR3 - Internal Memory 16 EMMC GB (No10 IV: 8 GB) - Gigabit LAN, Wi-Fi 2 band: 2.4Ghz / 5Ghz 802.11AC (No 10 IV: 2.4Ghz 802.2.2.2.2 4 1 b/g/n Wi-Fi) - Bluetooth 4.0 (No10 IV without this feature) - Launch of Android 5.1 Lollipop operating system (No10 IV: Kitkat 4.4) Equipped with Hisilicon chip line, this is a line of chips specializing in HD movie reading processing from External stiffness is attached separately. Thus, The Himedia product line is suitable for those who like to copy movies, download movies to the hard drive to watch offline. Online processing of the Hisilicon chip line is a bit slow, especially the response rate when using applications is much slower than other chip lines. The old HD Player interface works very slowly, using the same uncomfortable interface on the zidoo, MINIX product line. Especially this line of chips is not able to handle heavy games, so anyone who has to play games should not choose the Product Line Himedia. Depending on the needs you want to watch online basically (zidoo, MINIX, Mygica...), or want to watch offline with your own hard drive many (Himedia series) who choose a product line to suit your needs. III. Highlights of Android TV Box Himedia No10 Pro - Processor: HiSilicon Hi3798C V200 quad Core 64bit Cortex A53 - GPU: Mail-720 quad Core - RAM: 2GB DDR3 - Internal memory: 16GB eMMC - Operating system: Android 5.1 Lollipop - port support, AV, USB 3.0, Gigabit LAN, HDMI 2.0 - Support for SATA hard drive trays installed in up to 6TB - Supports Ultra-HD 4K60, 3D Bluray ISO , 7.1 HD-Audio IV.
