You're viewing old versions of the private area - AppLock, Video and Photo Vault. Here you will find APK files of all versions of the private zone - AppLock, Video and Photo Asylum are available on our website, published so far. The latest version: With a lot of tools that are currently on the market to protect your device from prying eyes, finding one that fits your needs can be challenging. LEO Privacy Guard is an app designed to block other users from accessing your apps no matter where you are. The biggest advantage of this tool is that you can create as many profiles as you want and customize them so that they are activated without having to touch the device. For example, if you're at home, you can set up your personal WiFi network as a way to run a profile. So once you step inside your home, it will automatically activate the protection mode that you are connected to that network. With so many configuration capabilities, all your apps can be protected no matter where you are. On the other hand, all the profiles you create can be changed at any time, although the most convenient way to do this is to create as much as you need and switch between them either manually, with a click, or automatically. With a simple switch, you can access the full list of features, so you can add privacy alerts to make sure no one has tried to open anything in your absence. Make sure to keep your password secret so that your conversations and documents remain secure. In addition to the protection feature, LEO Privacy Guard includes a second feature that allows you to remove apps that could put your device at risk. You can also back up everything important, so if one day you lose something, you can recover it.
