We'll be back soon. I downloaded iGO navigation, but when I run the app for the first time I can't find any maps. How can I get them? iGO Navigation does not contain maps when you first download. To get them, you need to use the in-app shopping feature. Visit the store in the app and select the region's navigation package you want to download. Once you've downloaded the navigation package, you can purchase more content I downloaded iGO Navigation some time ago but deleted it ever since, and now now can't find it in the Google Play Store/App Store. How can I install the software again? Android: In the Google Play Store, go to All in my app menu to see all your previously downloaded apps and download them to your device again.iOS: In the App Store, go to the Purchased menu to see all your previously downloaded apps and download them to your device again. The name and location of the Purchased menu option may vary depending on the iOS version. I updated iGO Navigation and all my cards are gone. What can I do? In iGO Navigation, go to the Settings button, click on the arrow in the bottom right corner, and then the default menu option. You can also delete and reinstall the app. Then click on the arrow in the bottom right corner of the Store menu and select Restore Purchases. Here you can download previously purchased maps and services. I bought iGO navigation some time ago, but now I can't find this application in the App Store. What happened? When we release iGO Navigation, we no longer support previous apps, meaning you won't find them in the App Store anymore. You can continue to use the app downloaded to your phone, but please note that no additional updates will be available. Thanks for choosing iGO Navigation in the past, and we believe our new app will give you a better navigation experience through its new features, a more stable system and improved visualization. I downloaded iGO Navigation, but when I first run the app I can't find any maps. How can I get them? iGO Navigation does not contain maps when you first download. To get them, you need to use the in-app shopping feature. Visit the Store app and select a navigation package to the region you want to download. Once you've downloaded the navigation package, you can buy more content from the app. Do I have to pay for upgrades? Once you've purchased the package, you'll be able to download upcoming updates for free. Why is there no speed camera or traffic information in the trial? There are several services that are only available in the full version of iGO Navigation. That's why you can't use them during the trial period. Can I download any map or content using iGO Navigation running in the background? iGO Navigation can't download maps when it's running in the background. Please note that the app should be open. We suggest you download the content you need over the Wi-Fi network to avoid any additional data transfer costs. Initial Settings Video on what to do when you first open the GO Navigation app: How to customize preferences, download the desired region (s), download features and functions, calculate the route. Navigation Tips and Tricks Videos on Essential Features and Features How to set up a route calculation calculate the route, add through point, POI, etc. Advanced video settings to extended settings (except for some roads, fine-tuning) What is iGO navigation? iGO Navigation is a standalone car navigation app that comes with a number of additional maps of more than 100 countries available. With the iGO Navigation app, you decide which countries you want to download from the region, so you can save storage for more important things such as photos, videos and music. Set off and let the explorer in you have your own way! What is iGO navigation for? iGO Navigation for real explorers who are passionate about cross-border travel, or after some exciting new challenges in exotic countries. Because the app works offline after downloading the desired content, you don't have to worry about connecting, no matter where you are. Explore new regions without being online and choose from thousands of restaurants, museums or attractions if you need a short break or stopover. However, if an Internet connection is available, you can enjoy our live traffic service after you have downloaded this package from the store in the app. iGO Navigation will be a great travel companion wherever you go. Do I need an Internet connection to use iGO Navigation? You only need an Internet connection when downloading a card or feature, or when you want to use an online service, such as real-time traffic information. Because the app uses GPS signals that are available on any basis, you can use your iGO navigation where and when you like it after downloading the navigation package and the desired content. How much space do cards need? The size of the cards and features depends on the district you choose. To find out more, please visit the store in the app. We suggest you download maps over wifi, as their size can be several hundred MB sometimes. What kind of operating system do I need to run iGO Navigation? iOS 7.0 or later. Android 4.0.3 or later. Can I download countries, not entire regions? The maps are grouped in regions, but it's up to you which country you want to download on your phone for your next trip. If you need the rest of the cards at a later time, you can also download them at no extra cost. What community features does iGO Navigation come with? iGO Navigation does not currently offer any community functions. That's how we would encourage you to live in the moment, enjoy your fellow travelers and get to know the locals. Believe us, a real experience is much more valuable than a Facebook post. Is real traffic available? Yes, if you purchased our traffic information package in real 2000. To Real-time traffic information, you need to download this package from the app store and have an active Internet connection. If you're offline, traffic statistics will provide you with data traffic at this hour at the moment. Based on this information, the app calculates the estimated arrival time, or you can instruct iGO Navigation to recommend an alternative route if you encounter a traffic jam during your trip. I travel to several countries. Does the app alert me if I'm traveling at or near the speed limit? Yes, iGO Navigation contains current speed limits and relevant data for each country. Why is the app only available in beta at the beginning? The beta version is available for a short time with selected content, so you can see how iGO Navigation works on your phone. Once the trial period is over, previously downloaded maps and content will disappear from the app. However, if you want to use them in the long run, you can purchase them in-store in the app. Why do I get a notification every time I start running an app? Android: iGO Navigation notifies you that you are using the beta every time you launch the app during a seven-day trial period. Once the trial period is over, you can purchase the packages you need and the notification will stop to show. Why do I always get a warning to set up an iCloud account? To use subscription features, such as real-world traffic information, you need to set up an account. If you've replaced your device or reinstalled iGO Navigation, you'll need to set up an account to be able to restore subscription features. You should turn on iCloud if you have an operating system earlier than iOS 8. If you have an iOS 8 or later version, you'll also need to turn on iCloud Drive. Please make sure iCloud is on at the time of purchase, otherwise the app can't save the data you need to recover your purchase information. Why can't I recover statistical traffic information by restoring items purchased from the app store? To recover data, iCloud or iCloud Drive must be enabled in the device settings and must be enabled at the time of purchase. Why do my cards disappear after a trial period? Once the trial period is over, previously downloaded maps and content will disappear from the app. However, you can purchase them in the app store. I downloaded iGO navigation, but when I run the app for the first time I can't find any maps. How can I get them? iGO Navigation not cards at the first download. To get them, you need to use the in-app shopping feature. Visit the store in the app and select the region's navigation package you want to download. Once you've downloaded the navigation package, you can buy more content content Your statement. Some time ago I downloaded iGO Navigation, but deleted it since then, and now I can't find it in the Google Play Store/App Store. How can I install the software again? Android: In the Google Play Store, go to All in my app menu to see all your previously downloaded apps and download them to your device again.iOS: In the App Store, go to the Purchased menu to see all your previously downloaded apps and download them to your device again. The name and location of the Purchased menu option may vary depending on the iOS version. I bought iGO navigation some time ago, but now I can't find this application in the App Store. What happened? When we release iGO Navigation, we no longer support previous apps, meaning you won't find them in the App Store anymore. You can continue to use the app downloaded to your phone, but please note that no additional updates will be available. Thanks for choosing iGO Navigation in the past, and we believe our new app will give you a better navigation experience through its new features, a more stable system and improved visualization. Can I set iGO navigation on an SD card? You can't install iGO Navigation on an SD card, but you can always take it with you: in memory of your phone. The download has stopped and I can't download the selected packages. How can I get them? You can choose from one option: interrupt the process and restart the download. Remove the entire package and restart the download. Don't worry, you don't have to pay again for content. Go to the Settings button in the app and click on the arrow in the bottom right corner to select the default Reset menu option. Download previously purchased cards and services again. In this case, you can do it without having to pay for them again. Reinstall iGO Navigation and then go to the App Store menu and click on the arrow in the bottom right corner to select The Purchase Recovery. This way you can reinstall all the cards and services you purchased before for free. I have a new phone/tablet. How do I use my previously purchased iGO Navigation app on my new device? Android: Log in to the Google Play Store through the Google account you used with your previous device and go to Everything in my app menu to download iGO Navigation to your new device. After the end of the seven-day trial period, please do the following to access the previously purchased content: In iGO Navigation go to the store for the purchased items of ggt; Click on the arrow in the bottom right corner of the purchase: Login with the same Apple ID that you used with the previous deicein App Store, go to the Updates / iPad menu and choose iGO navigation to download it to a new device. After your one day of the day Period ends, please do the following to access previously purchased content: In iGO Navigation go to the store for the purchased items of ggt; click on the arrow in the bottom right corner of the recovery shopping I've updated iGO navigation, and all my maps have disappeared. What should I do? In iGO Navigation, go to the Settings button, click on the arrow in the bottom right corner, and then the default menu option. You can also delete and reinstall the app. Then click on the arrow in the bottom right corner of the Store menu and select Restore Purchases. Here you can download the latest versions of previously purchased maps and services. iGO Navigation says it doesn't receive any GPS signals. Android: Make sure your phone or tablet is on to receive GPS signals, or connected to such a receiver. Not every model comes with a built-in GPS receiver. If you have a built-in receiver, make sure it's on. To check this, please go to Settings/Privacy/Location Services. iGO Navigation doesn't detect any GPS signal, but other location-based features work smoothly on my device. What can I do? Android: The location feature on your device can be disabled to navigate iGO. To check it out, please go to Settings/Location. Other features may use mobile data or a Wi-Fi network to get information about your current situation. iGO Navigation only works with GPS signals because it is available on a free basis and does not require data transmission during navigation.iOS: Location on the device can be disabled to navigate iGO. To check this, please go to Settings/Privacy/Location Services. Other features may use mobile data or a Wi-Fi network to get information about your current situation. iGO Navigation only works with GPS signals because this service is available on any account and does not require data transmission while navigating. I've tried all of the above, but the app still doesn't detect any GPS signals. What can I do? If the GPS reception is still bad, please try using the device outside where the satellite signals are not blocked. If you're using iGO Navigation in your car, place your phone or tablet next to or directly under the windshield. UV filter of advanced technological windshields can also have a negative impact on GPS reception. If you still can't Any GPS signals, please contact the manufacturer of the device. Manufacturer. Manufacturer. iGo gps navigation for android free download
