LIMBO is a high-quality adventure platformer on Android. In the center of the plot - a little boy who went in search of the missing sister and was in the darkest place in the universe - in the underworld. The game has won prestigious awards and received many positive reviews from critics from all over the world. Gameplay is a journey through the dangerous places of hell, which is portrayed as the developers of a gloomy forest, sometimes passing by an abandoned factory or an empty metropolis. All locations are dominated by dark colors, and light is used very rarely and only as a contrast. The main character is presented in the form of a black human silhouette, on the head of which from time to time you could see two white dots representing the eyes. Levels in LIMBO are not the easiest among platformers. The locations are full of all sorts of traps and cunning puzzles, and enemies are scary monsters. To survive in this dangerous place, you need to constantly move, move objects and otherwise interact with the environment. Any, even insignificant mistake can cost the main character of life. Control the game by clicking on the edges of the screen. Left for movement, right for jumping and interacting with objects. For example, to move the box, it is enough to make a long click in the bottom right corner of the screen. In general, LIMBO is a stylish arcade game for mobile devices, in which Arsenal has a good story, well-considered gameplay and unique visual style. Additional information requires Android5.0 and up developerEditor's ChoicePlaydead Hell Border is well received on PC to black and white visual style games, the game itself is very complex, but this artistic style and hidden in the game history is very much so that players want to know what happened follow-up - APKAward.com Limbo is a puzzle-platformer. The game uses only two buttons in addition to motion control, one to make the boy jump, and one for contextual actions such as dragging the box, pulling levers, or pressing buttons. The boy can grab the ledges within reach and descend from the platforms, climb the stairs, push and pull objects, and swing from the ropes found in the environment. Limbo has a lot of what developer Playdead describes as trial and death gameplay, requiring players to die often (and horribly) in order to fully understand the puzzles. Limbo has an extremely generous checkpoint system with an almost instant reboot, usually bringing the boy back in just before he went into a trap or fell into the abyss, minimizing (but not avoiding) the player's frustration. Limbo focuses mainly on puzzle-based physics. These puzzles include the player pulling or pushing objects with a true pulse, affecting the liquid, and manipulating and gravity to move objects as well as the player. The game introduces a number of different types of puzzles as the game progresses. A A The puzzle element involves brain bullets that burrow into the boy's head and force him to go forward, leaving him unable to stop or turn around until he enters the bright light, which harms the bullet's brain and causes him to turn it around to escape back into the darkness. When suffering from a bullet, previously benign areas and easy to avoid dangers turn into terrible obstacles and deadly traps. The contentsLIMBO table is an exciting adventure game created by PlayDead and first released in 2011 on XBOX 360, a year after the game was developed on PC and quickly picked up by gamers. In early 2015, the first mobile version of LIMBO also came to gamers and was released for free. Travel to find the light sourceRegardless day or night, darkness still surrounds and follows every step of LIMBO, roads that are filled with traps, deaths all over the world. LIMBO is a little homeless boy with a thin body, lacks family affection and grow up in a brutal war, he has no relatives nearby. In the dark, death and despair are believed to be near, but LIMBO does not give up, the desire to live led him on a journey from the darkness and seek the light of life ... Adventure game genre mixed with solving puzzles, LIMBO players are immersed deep in the content of the journey. Opening the scene of black and white desolation, there was a cry, everywhere death, the boy left the dark corner. Thus, the silhouette of the boy still persistently advanced, despite heavy breathing and steps to find a solution to the horror in the dark country of death without end. The gameplay of LIMBOThe game has no instructions as well as dialogue at all. It's just an endless journey where you'll play as a LIMBO boy who is looking for light in the dark and full of monsters, capturing constantly through the ground that LIMBO set foot on. Become LIMBO, your task is to control the running boy, jump, drag obstacles and swing the rope, through the scroll keys available on the screen. LIMBO doesn't have any stages, you go, go forever to cross the jungle, swim through rivers, abandoned houses until the end of the game where horrible deaths. Waiting for you to be swallowed by sharks, rock crushed people, guillotine or spiky spear through repetitive make you feel despair and without end. If you are defeated, you will return to where you previously crossed to restart the journey. Throughout the game, your main enemies will be deep pits, tall trees, lakes, abyss, sharp vaults and the most feared are the giant spider monsters. It is very difficult to overcome these obstacles, so the game requires you to constantly think, as well as the skills to cope with the situation quickly and consciously quickly overcome, because it is the only way to survive for you. Graphics and Sound With 2 main colors in the game are black and white and quirky space to help you familiarize yourself with the game at first sight. The buttons move back and forth, the high jump is located just for easy work even for new players to experience the game in the first place. The fog effect, as well as the deadly effect of the character in the game on each path, increases the attractiveness of the game for players. In terms of sound, the game has no background music, only loud and heavy steps of the main character, sometimes you can hear rain, crickets, the chime of the wind and the cold tongue of crows screaming ... bring you chills at every moment. The silence in the game is also high for attracting artistic value and making a difference that no game titles have. APK Full version of LIMBOWhat is LIMBO APK (Full version)?
