And what if, when each of these men tries to search each other's lives? How do we know who we are? What do we mean by identity? What defines us as individual, unique people? Can we ever come to terms with the existence of another person with voice, our functions, our everything, down to the smallest distinguishing brand? Can we change places with our double without those closest to us to notice? Dark yet comic, Jos – Saramago's new novel may be read as an existential thriller, but it is above all the work of literature immersing us in the essential issues of life. It's safe to become a 21st-century classic. Portuguese author Jose Saramago (1922-2010). The first novel, Land of Sin, was published in 1947 and won the Carmon Prize for Literature, the highest prize for Portuguese literature, in 1995. In 1998 he was awarded the Nobel Prize in Literature for his fables of imagination, compassion and sarcasm that continue to deepen our understanding of illusory realities. Salamago's works have a unique style and deep connotations, and most of the works' themes revolve around the fate of mankind and the future of the world. In his writing style, he created a type of novel full of imagination, metaphor and satire that won praise from countless readers. He has written dozens of novels and other literary works throughout his life and has been translated into more than 30 languages selling more than 3.5 million copies, including The Chronicles of the Abbey, The Caves, The Elephant Travels, Stone Rafts and more. Four years later, in 2018, I started reading, feeling that the original wants to read is the right choice, very good taste. Because this is a story about someone who lives alone, a solo player. This is the hardest story to write and tends to become boring and hollow. In fact, very few people may decide to do without regard to others' feelings... This is, a tale of double existence, an interference in words, of numbers, of identity, of self and existence of being. And a damn good thriller. The narrative before it begins, the author has given you a hint and a about that you are not only being immersed in great Saramagian narrative with carefully placed words, long drawn phrases that have you hooked in the scene, in the moment, in breath, and then you have you on your axis, with his fables and the surreal, food for thought consciousness, but in this hint, the epilogue, in these few sentences, there is a point of some formulas at play in his narrative, and has some connection to what you are about to read, let me repeat to you now: Chaos is just to wait to be deciphered. -The Book of Contraries I believe in my conscience I intercept many a thought, as heaven intended for another man. -Laurence Sterne,The Life of Opinions by Tristram ShandyTake note that Maria de Paz, the protagonist lover who happens to work in a bank dealing with numbers and order, will mention Chaos is just to wait to be deciphered. Also something that may have another linking theme, one that one can take another look at is the fact that the whole knowledge of the existence of this double came on the recommendation of a Mathematics Teacher. This history teacher working with him in a secondary school, a maths teacher, another dealing with some kind of order and numbers, recommended him to watch the film that his double appears in. Ideology signals, but are they relevant? The world of this narrative seems to point to instances of free will, in all the order of numbers and words, the chaos of probability, the author immerses you in identities change by the choice of the self. The common sense protagonist, Tertuliano Maximo Alfonso, has his own voice appearing in the narrative as a separate character of the protagonist talking to him and helping him make his next move. I could compare the story to a chess game. As in a chess game, this narrative has slowly moved to a position of checkmate, one eventually learning what needed to be done next and what needed to be done to achieve that checkmate when probability arose, and made his move howsoever ridiculous and darkly humorous it seemed in forms to him, in the end, he knew from the story , how to obtain check mate. There are many things left for thought. I saw the film adaptation after reading this novel the first time, so for the review, I read it a second time, a question that may be further thought about, is that a hypothesis, do products of the mind have some ability to take a material shape in this narrative? If his fluid writing style, his easy reading narrative, dilemma and the thrill of what will happen next, for example when double meet, have no great reading glue and have you in the narrative, then his play with identity, number, words, nouns, ideology, conscious, and chaos with order and its deciphering, can do, or simply the words he lays out with careful creative genius do not have you , even the love element that exists fails. so I do not know what will. A great tale to read many times over from a great craftsman with words. He had gone back to the first picture, the one where at the reception, in close-up, looking directly at Ines de Castro, and he was minute in time analyzing the image, line by line, feature by feature, Apart from a few small differences, he thought, especially the moustache, the different hairstyle, the thinner face, he is just like me. He felt calmer now, the resemblance was amazing, but that was all it was, and there is no shortage of similarities in the world, twins for example, it would really amazing be that out of the six thousand million people on the planet there were no two people exactly a similar. We all know that every day that dawn is the first for some and will be the last for others and that for most people it will be just another day. For the history teacher Tertuliano Maximo Alfonso, this day when we find ourselves, when we continue to exist, as there is no reason to believe that it will be our last, will not just be another day. You could say that it appeared in the world with the possibility of becoming another first day, another beginning, and therefore indicates a different destiny. Everything depends on the steps Tertuliano Maximo Afonso takes today. But the procession, as people used to say in times gone by, is just about to leave the church. Let's follow it. We have a strange relationship with words. We learn a few when we are small, throughout our lives we gather others through education, conversation, our contact with books, and yet, by comparison, there are only a small number about whose meaning, reason and denotation we would have absolutely no doubt if one day we had to ask ourselves seriously what they meant. Thus, we affirm and deny, so that we convince and are convinced, so that we argue, infer, and conclude, wandering fearlessly over the surface of concepts that we have only vaguest of ideas, and despite the false air of trust that we generally affect as we feel our way along the path of the verbal darkness we manage, more or less , to understand each other and even, sometimes, to find each other. If we had time, and if impatient curiosity was to sting us, we would always end up finding out exactly what an monkfish was. The next time the waiter at the restaurant suggests this inelegant member of the Lophiidae family, the history teacher will know what to say. What, the hideous bentonic creature who lives in the sand or on the muddy seabed, and will add firmly, certainly not. Chance, however, chose, although it would be more accurate to say that it was inevitable, since enticing concepts like destiny, fortune and destiny really have no place in this narrative,.. The list of names was quickly locked away in a drawer, the loose videos were returned to their respective boxes, and The Parallel of Terror, which is still in the video player, followed the same route, it had not been so easy to impose order on chaos, since Began. Experience has taught us, however, that there are always a few ends left unteved, always some milk spilled along the way, always a line that comes out of line, which, when applied to the studied situation, means that Tertuliano Maximo Afonso is aware that his war is lost even before it has begun. The way things stand now, thanks to the sovereign stupidity of her talk about ideological signals, and after her masterstroke, to comment on the existence of order in chaos, of a decipherable order, it is impossible to tell the woman who is now in the kitchen to make coffee, Our relationship has come to an end,... According to popular wisdom, you can't have everything, and there's a great deal of truth in that the balance of human life is constantly swinging back and forth between what's achieved and what's lost, the problem lies in the equally human impossibility of coming to an agreement on the relative benefits of what should be lost and what should be won, which is why the world is in the state it's in. ... I still think you should forget about this business of doubles, twins, and duplicates, maybe I should, but I can not, it is something that is stronger than me now, My feeling is that you have set in motion a large crushing machine that slowly moves towards you, warned common sense, but when his companion did not respond, he shrugged, shook his head, saddened by the outcome of the conversation. What he absolutely does not understand, no matter how much he cudgels his brain, is why it is that while communication technologies continue to evolve in a truly geometric progression, from improvement to improvement, the other form of communication, from me to you, from us to them, should still be this confusion crossed with culs-de-sac, so deceiving with its illusory esplanades, and so devious in expression as in concealment.
