The image is not available forColour: Smart heating is a thermostat that allows you to control and adjust the heating remotely from a smartphone, tablet or computer. If you have a hot water tank you can control that too. The smart thermostat aims to save energy by increasing and lowering the temperature as quickly as possible. Smart thermostats try to avoid exceeding the target temperature by learning how your house is heating up, so that the boiler shuts down at the right moment. What are the benefits of smart thermostats? They are simple and easy to use, so you never want to have this heating yet for a moment again when you are out of the house You can tell your thermostat when you are going on vacation, so pause your usual schedules and automatically resume when you get homeSmart heating can be personalized for you and your family - you can set a different schedule every day easily from the Hive app for winter weekends to lie, you can turn on the heating without having to get out of bedIf your smart thermostat has Geolocation alerts, can it recognize when you're home, or when you're on your commute home, so what does it know to turn on the heat? Yes - you can manage your energy efficiency a lot easier with smart heating, learn about your energy consumption, and assess where you can reduce usage. You'll need an intelligent thermostat that connects to your boiler (sometimes with a receiver), a basic control/home network (hub) that connects to your smart thermostat and internet, and an app that you can download to your smartphone. Smart heating should be safely installed by a professional. Even better, you don't need to be a British gas customer for your Hive smart heating to work. Perhaps the easiest way to get started is with the Hive Thermostat Kit, which includes a thermostat to get the temperature right, a Hive Hub to connect your products to your smartphone, and a Hive receiver to link your products to the boiler. Do Hive thermostats work with Alexa and Google Home? Yes - Hive thermostats do work with voice assistants like Amazon's Alexa and Google Assistant. So if your hands are full and you can't click on the app, just say: Alexa, turn off the heating. Even better, any member of your family can do it. If you forget to turn off the heating, you can also turn it off remotely with your phone. There are many more to know and learn about smart home. Check out our other guides for a more in-depth look at some of the popular products and features...
