FRONTLINE COMMANDO 2 (MOD Unlimited Money) is a third-person shooter released in the form of free-to-play by Glu Games, a well-known U.S.-based publisher. They have quite a few games to reach a lot of players like Dino Hunter or Kim Kardashian. The second part of this series of third-person shooters is inspired by Call of Duty: Modern Warfare. Everything you know at the beginning of the game about a devoted soldier in battle. After a botched raid, all his teammates were killed. He is determined to assemble a team of mercenaries to fight and avenge the fallen comrades. The gameplayThe game features more than 40 major missions and is accompanied by many other side quests. These missions will help you learn the history of the game, giving you a huge amount of money and weapons. FRONTLINE COMMANDO 2 retains its original gameplay style. Without much change, the game still uses the hiding mechanism. If you want to defeat the enemy and defeat, you need to move skillfully, dodge the bullets and grenades of the enemy. And of course, your ability to use weapons is the most important factor. Just need an accurate bullet, you can change the outcome of the whole battle. Hiding behind obstacles is the best way to avoid enemy attacks, especially in this game. However, do not hide the passive path in one position, because the enemy can concentrate firepower and quickly destroy obstacles. In addition, you should also notice some things that may interact in combat. For example, a barrel of dynamite will explode if you shoot it. Teammate This fight is very dangerous, but you are not alone. In each battle, you can bring up three other AI-controlled soldiers. They will automatically fight, throw grenades, move, ... like a real player. Each character has a role in the match. They can be a nurse, sniper or even a person who can sacrifice to distract their opponents. Theoretically, you can bring any character you want. I think every team needs a nurse who is responsible for the medic for the members when they are injured. WeaponIn the mobile shooting game, the frontline commando 2 arsenal really impressed me. The game is full of popular guns like rifles, sniper rifles, shotgun, pistols, ... In addition, you can also use grenades or RPG missiles to flush out enemy tanks and helicopters.
