Battles take place in real time, so you can directly control your character when moving, attacking or dodging. However, actions are also determined by a series of maps with energy requirements, which adds a strategic factor to the battle. In Dragon Ball legends, you can fight online players from all over the world. And as you beat the challenge, you can unlock new famous fighters such as Goku, Vegeta or Trunk, although there is also a never-before-seen character created just for the game, with a new plot arc designed by Toriyama himself. Dragon Ball Legends is an excellent combat game that borrows many features from desktop releases such as great character design and animation, and gameplay with a close-up of third-person perspectives. The top 15 Android games released in the first half of 2018 with 2018 halfway, are now as good as any time to look back and highlight the best games that have been released on the Android platform so far this year. From the names we've been waiting for for months to the rarities that have given us pleasant surprises, the collection of apps that have been released over the past six months has been commendable, to say the least. Read on to find some of the best games we've seen so far this year. More Dragon Ball Legends will be the first to use new Google technology It should come as no surprise to everyone that the Dragon Ball brand is still so popular even in 2018. With the latest episode bringing people together to watch it in stadiums and public squares and the announcement of a new film coming out later this year, it is understood that the brand's licence holders would like to take full advantage of its success. So we have Dragon Ball Legends, a new game for Android and iOS that will be released later this year, focused on online team fights between users around the world. And best of all, it relies on Google's new Spanner technology, which will allow for much faster connection speeds than current standards provide.
