By pushing industry performance standards and leading competition with the most advanced and innovative 20 x 5 mobile vibration screening plant in production today, the S190 High Energy Screener clearly demonstrates McCloskey's focus on making customer-oriented features standard. Features such as adjustable screenbox angles allow you to adapt to a wide range of material applications, including quarries, mining, sand and gravel, coal selection, topsoil and wood chips. With a high level of specifications and components, the S190 screener is easily the number one choice for high performance, quality and cost. The S190 is also offered as a triple deck and has the highest combined true screening area on three decks. This class of leading screening area, along with its high-energy screening action ensure that McCloskey Triple Deck models are an excellent choice in cumulative screening material. Track or wheeled variants Most advanced 6100mm x 1524mm (20' x 5') plant in production 12' bunker capacity 8.01m³ (10.48 yd³) or 15' bunker capacity 10.01m³ (13.09yd³) 1200mm (4800mm) (488m³ (13.09yd³)) 1200mm (4880mm) Channel Conveyor Remote Control rollover grid 10 minutes created time SPECIFICATIONS (Tracked) S190 Double Deck Screenbox Top Deck 5' x 4' side voltage - 5 from Screenbox Lower Deck 5' x 6' End tension - 3 from main conveyor belt Width 1050mm (42) Stockpile Tail Height Conveyor 4638mm (15' - 3) Side conveyor 5100 mm (16' - 9) . Tier 4. Level 3 is only available for LRC. Customer reviews Widely known as one of the fastest growing heavy freight companies in Europe, Metcalfe Farms (Haulage) Ltd are primarily a successful dairy farm, housing 1,300 dairy cows on 3,200 acres...
