Find a used car trade, resell, certified used and retail value used vehicles depending on the condition, mileage and other factors of car sales. Acura MDX Prototype shows slick new look, with Type S close behind 7 2021 Ford Mustang Mach 1 order book open, and Ford shows its price of 16 2021 Kia K5 Review New Look, a new name, still value leader 8 Aston Martin DBS Superleggera leads the list of discounts this month 1 Thor24 raises the bar for Murica 39 Oregon soldier helps fend off mom llama injuries 1 Follow us ! feature (f, b, e, v, n, t, s) - if (f.fbq) return; n q f.fbq - feature () n.callMethod ? n.callMethod.apply (n, arguments) : n.queue.push If (f, _fbq) f, _fbq n; n.push n; n. n.loaded - !0; n.version - '2.0'; n.src - q; t - b.createElement (e); t.async - !0; t.src - v; s.mentsByTagName (e); s.parentNode.insertBefore (t, s) (window, document, 'script', '//connect.facebook.net/en_US/fbevents.js'); fbq ('init', '174181139752304'); fbq ('track', 'PageView'); fbq ('trackCustom', 'ViewedVehicle', 'year': finish: '); (function (i,s,o,g,r,a,m){GoogleAnalyticsObject:r;r=r||function (f,r,q){r=q (Arguments), i[r]new Date ()}.a.createElement (o, m).s.getElementsByTagName (o);a.async 1;a.src=g.m.parentNode.insertBefore (a,m)})(window, document, 'script', '//www.google-analytics.com/analytics.js');ga ('create', 'UA-71479133-1', 'auto'); ga ('set', 'anonymizeIp', true); ga ('set', 'dimension2', 'GMC'); ga ('set', 'dimension3', 'Acadia'); ga ('set', 'dimension7', 'usefulness'); ga ('set', 'dimension8', 'hub model'); ga ('set', 'dimension9', 'video'); ga ('set', 'dimension10', 'SUV');ga ('send', 'pageview'); (function (d, t) 'var a' d.createElement (t), s.getElementsByTagName (t); a.parentNode.insertBefore (a, s); (document, script); (function (d, t) var a d.createElement (t); s d.getElementsByTagName (t); a src » ; s.parentNode.insertBefore(a, s); (document, script); At first glance, the 2021 GMC Acadia's beautiful exterior design and spacious three-row interior makes it the perfect family-owned SUV, but other SUVs in this price range offer a more enhanced experience. Buyers will choose from a standard four-cylinder, turbocharged four-cylinder, or sleek V-6, but none of these powertrains deliver particularly exciting performance or class-leading fuel economy. The convenient infotainment interface provides competitive connectivity, and the GMC cabin offers highly sought-after second-row captain's seats. However, its interior materials do not live up to the asking price of Acadia, even on the top-spec Denali trim, but thoughtful Cubbies provide enough room for entire families to stash their road trip goodies. What's new for made several packaging changes to Acadia for 2021. The Pro Safety Plus package, which includes several driver assistance features, is now standard for SLT, AT4 and Denali. The Elevation Edition package is now available on SLE and SLT and includes 20-inch wheels and black accents. The heated steering wheel joins the Premium package for the SLT and AT4 finishes. The same finishes can now be had with a package of technology that includes a head display and a 360-degree camera system. The second-row captain's chairs are standard on all but the base SL, and three new colors - Cayenne Red Tintcoat, Hunter Metallic and Midnight Blue Metallic - join the palette. Prices and which ones to buy We would choose a mid-level SLT trim, which adds acadia available turbocharged engine, leather first- and second-row seats, and a loud rear door to the equipment list. In addition to these SLT extras, that model comes with standard LED headlights, heated, powered adjustable mirrors, and no entry key and start button. The engine, transmission, and PerformanceThe Acadia base engine 2.5-liter four-cylinder is good for 193 horsepower and the additional 3.6-liter V-6 is 310 horsepower. The nine-speed automatic and front-wheel drive are standard with any engine and all-wheel drive is optional. The 2.5-liter is good for maximizing fuel efficiency, but no more - it has a flesh 1,000-pound towing capacity while the V-6 can tow up to 4,000 pounds. The turbocharged 2.0-liter 230-horsepower engine is also available, but only on SLT and Denali trims. While you will never forget that you are driving an SUV, Acadia is competent and reasonably composed. Acadia feels heavy during a high-speed turn, but when driven in a less aggressive manner (as most people drive most of the time), the ride is forgiving and stable. Adaptive suspension is standard on Denali and optional on SLT-2 trim with all-wheel drive-adjusting shock absorbers every two milliseconds to help smooth the ride over the bumps or tighten things up if the driver starts to feel frisky. Fuel economy and Real-World MPGThe EPA estimates the front-wheel drive version with a base 2.5-liter engine will earn 21 mpg city and 27 highways. The front-wheel drive V-6 has an estimated 19 mpg city and 27 highways. The front-wheel-drive turbocharged engine is a thrifty combination, with ratings of 22 mpg city and 29 highways. However, we haven't tested any Acadia with a nine-speed automatic transmission on our 75-mph highway fuel economy test. Compact interior, comfort and CargoThe Acadia exterior can help it fit into garages and parking spaces, but it imposes to the expanse of the interior. The interior design pleases the eye, and most controls are intuitive and within reach of the driver. Black and white calibration cluster with red needles At a glance, Denali models are equipped with a reconfigurable central screen, which provides a lot of additional information about the vehicle depending on the driver's settings. The tilt and telescopic steering column can use a larger range to give very high or very short drivers a comfortable position, but it still works for most people. The leather steering wheel is equipped with an aluminum finish, which is convincingly upscale. Unfortunately, some of the interior materials have a cheap look. With the third row in use, we were able to place only two carry-on luggage in Acadia, but with the second and third row of seats stacked, we were able to fit 28. Dodge Durango has held four cases for its third row and 30 with the rear row seats folded, so this may be the best choice if you'll be frequently towing people and cargo at the same time. View photos of GMC infotainment and ConnectivityWhen comes to technology, Acadia offers a lot for the whole family. From USB ports to Wi-Fi hotspots, passengers can easily stay connected. The touch-screen infotainment system is intuitive and responsive; Charging more than one device that requires a 12-volt outlet can prove to be a problem, since only one of these outlets is provided. Safety and Driver Assistance FeaturesThe 2021 Acadia earned a five-star crash test rating from the National Highway Traffic Safety Administration (NHTSA), but the latest version that was evaluated by the Insurance Institute of Road Safety (IIHS) has not been named Top Safety Pick. Its driver assistance technology adds an extra layer of protection, but they are either expensive options or they force the buyer to choose one of the expensive top finishes. Key safety features include: Affordable Automated Emergency Braking Affordable Storage Lane Assistance Affordable Blind Spot MonitoringWarranty and Maintenance CoverageThe Acadia comes with a comprehensive warranty and maintenance coverage package as standard, with additional protection plans available from dealers. Hyundai offers longer limited powertrain guarantees and guarantees, but the GMC covers Acadia's first maintenance visit during its first year of ownership. The limited warranty covers three years or 36,000 miles of Powertrain warranty covering five years or 60,000 miles The free service is covered for the first visitMore Features and Specs Beautiful Style, a well-connected infotainment system, and space for up to seven passengers to make acadia an easily beloved family. The GMC mid-size crossover was all new for 2017 and sports a more compact body and a plethora of upgraded features that make it jumps and borders The larger, older-school SUV it replaced. The V-6 engine is optional and provides a decent fuss, while the standard four-cylinder engine is a choice for buyers, mindful of fuel economy. Acadia customers will have to choose between maximizing freight or people however, as its trimmer sizes have less interior space. What's new in 2019? GMC has launched the Acadia Black Edition package on the SLT model for 2019. It adds 20-inch wheels with black accents and other black exterior trim. Otherwise, the changes are minor: the new 17-inch wheel design comes with an All Terrain package and four new colors to join the palette: Dark Sky Metallic, Pepperdust Metallic, Red Quartz Metallic, and Smokey quartz Metallic. Pricing and which one to buy We'd go with the mid-range SLE-2 model as it adds heated front seats, eight-way power-adjustable driver seat, fog lights, 18-inch wheels, remote start, lift, and second row captain chairs. We'd also switch to an 8.0-inch touchscreen infotainment display that adds eight Bose sound system speakers and a multicolored driver-information center. We'd order a strong 310-hp 3.6-liter V-6 engine, but we'd stick with the front-wheel drive Acadia, since all-wheel drive adds \$2,000 to the bottom line. Engine, powertrain and performance likes: fast acceleration from the V-6 model, relaxed driving, adaptive suspension available. Dislike: Weak base four-cylinder engine, unenthusiastic during the turn, pronounced body roll in high-speed maneuvers. The acadia's base engine is a 2.5-liter four-cylinder good for 193 horsepower, but the extra 3.6-liter V-6 makes 310 horsepower and pushed our Denali test car from zero to 60 mph in 6.1 seconds. The six-speed automatic and front-wheel drive are standard with any of the engines; all-wheel drive is optional. The 2.5-liter is good for maximizing fuel efficiency, but no more - it has a flesh 1,000-pound towing capacity while the V-6 can tow up to 4,000 pounds. While you will never forget that you are driving an SUV, Acadia is competent and reasonably composed. Acadia feels heavy during a high-speed turn, but when driven in a less aggressive manner (as most people drive most of the time), the ride is forgiving and stable. Adaptive suspension is standard on Denali and optional on SLT-2 trim with all-wheel drive-adjusting shock absorbers every two milliseconds to help smooth the ride over the bumps or tighten things up if the driver starts to feel frisky. Fuel economy and Real-World MPG No matter how you set up Acadia, fuel economy figures are only average. With all-wheel drive, the Acadia Denali we tested returned the frustration of real fuel economy in our tests at 20 mpg; The front-wheel-drive version of the SLT-1 is better in our test and returned exactly the 25 mpg that the EPA predicted. Interior and cargo likes: stylish interior, with a capacity of the first and second rows, high-tech infotainment offers. Don't like it: Some cheap materials expose cost-cutting, with only one 12-volt outlet, a limited cargo hall for the third row. Acadia's compact exterior can help it fit into garages and parking lots but it imposes consequences on the interior space. The interior design pleases the eye, and most controls are intuitive and within reach of the driver. A black-and-white gauge cluster with red needles provides information at a glance; Denali models are equipped with a reconfigurable central screen, which provides a lot of additional information about the vehicle depending on the driver's settings. The tilt and telescopic steering column can use a larger range to give very high or very short drivers a comfortable position, but it still works for most people. The leather steering wheel is equipped with an aluminum finish, which is convincingly upscale. Unfortunately, some of the interior materials have a cheap look. When it comes to technology, Acadia offers a lot for the whole family. From the abundance of USB ports to the on-board Wi-Fi 4G LTE, passengers can easily stay connected. The touch-screen infotainment system is intuitive and responsive. Charging more than one device that requires a 12-volt outlet can prove to be a problem, since only one of these outlets is provided. With the third row in use, we were able to place only two carry-on luggage in Acadia, but with the second and third row of seats stacked, we were able to fit 28. Dodge Durango has held four cases for its third row and 30 with the rear row seats folded, so this may be the best choice if you'll be frequently towing people and cargo at the same time. Safety and driver-assistance FeaturesThe Acadia did great in its crash tests with the Insurance Institute of Road Safety, but missed out on the Top Safety Pick award because its headlights scored only marginal in this test; The National Highway Traffic Safety Administration gave the four-wheel-drive Acadia five stars and gave four stars to the front-wheel drive model. Its driver assistance technology adds an extra layer of protection, but they are either expensive options or they force the buyer to choose one of the expensive top finishes. Key safety features include: Affordable Automated Emergency Braking Affordable Storage Strip assistAvailable Blind Spot Monitoring Guarantee and Maintenance Coverage Acadia comes with a comprehensive warranty and maintenance coverage package as standard, with additional protection plans available from dealers. Hyundai offers longer limited powertrain guarantees and guarantees, but the GMC covers Acadia's first maintenance visit during its first year of ownership. The limited warranty covers 3 years or 36,000 miles Powertrain warranty covers 5 years or 60,000 miles Free service covered for first visit
