Left to get free shipping! Your order is eligible for free shipping! Related only to the U.S. Doesn't include Alaska and Hawaii To proceed with checkout For many of us, the first ship we've ever created was a pot made on a pot loom. Small pot loom kits for kids very neat and potholders make wonderful gifts for kids to give. As a child, I enjoyed this craft greatly, mainly because I loved making useful gifts. But here's the good news! Potholder looms no longer made just for children! I recently discovered the Potholder Pro Loom Kit for big hands and large pot holders. Of course, I had to go back to my favorite children's craft. In addition to the loom kit, I also purchased an extra bag of loops. I remembered needing more loops in specific colors to make the pot holders I wanted. When I sat down to make my first adult potholder, I started by splitting the loops by color and putting each color in a ziplock sandwich bag. I counted them and unfortunately found that I didn't have enough of any two colors to make one pot. So I decided to make a rainbow-colored pot. I love rainbows, so that turned out to be a good choice. It will take 42 loops to complete one potholder with a Pro Kit. I made my first big pot in less than 2 hours. I found that it's still fun to have pot holders. The difference is that I did it for myself and my own home. Potholder Pro is really a huge and wonderful way to relive these great memories in crafting. I can just do a few more to give as gifts too! 10 Potholder Pro Loom Kit Harrisville Samples Harrisville Designs 10 Potholder (PRO Size) Loom Kit This is a much improved loom kit compared to the kit I had as a child. Instead of a plastic loom with straight spokes, this kit includes a metal loom with curved spokes. Bent spokes hold loops on a loom. This is a huge improvement over the plastic looms, which allowed the loops to slip off too easily. Something else I mentioned, making my big pot holders, the loops weren't too short. I used to get so disappointed when the loop was too short for a loom, especially when the colors were so limited. What Happens in Potholder Pro Kit x 10 Metal Loom with Bent Spits Bag Loops - A variety of color metal hook for weaving plastic hook Hook Instructions Keep in mind: Ready Pots 8, which is more potted than we made when we were kids. Not enough loops of one color in two two to make a solid color or 2 color potholder. It will take 3 or 4 bags of mixed color loops to get enough of the two colors to make two potholder colors. Single-colored loop bags are available. Less than 2 hours to finish the potholder! Harrisville Designs PRO 10 Cotton Loops, Multiple Color Packs - Makes 2 Potholders Check Price Harrisville Designs PRO 10 Cotton Loops, Peacock Harrisville Designs Check Price Price PRO 10 Cotton Loops Check Price Harrisville Designs PRO 10 Cotton Alternating above and below each loop (2 strands for the loop set) Carefully pull the new loop using the hooked end Repeat the weaving process with the other loop, except for the beginning with the first loop set over the metal hook and alternate below and above each loop set. (See image below) Continue until all the spokes of the loom hold the end of the cycle, ending with the edges of Potholder, use the image below to understand and follow these directions. I used red and orange loops to make it easier to see what was really going on. Start with one angle and slip two loops onto the hook for crochet (Image 1) Pull the loop closest to the hook end (orange pictured) through the first loop (red pictured), leaving one loop on the hook (Image 2) Slide the next loop from the loom talking and on the hook (Image 3) Pull that loop through as far as the pot continues. Use this loop as a pot hanger Note: You can grab a needle and thread to stitch the final loop in place only to keep the potholder from coming unraveled later. Enjoy your new great potholder!
