How to tame a dog in minecraft creative mode

Next Pig FAQ - How to Ride? Previous Pie FAQ - How to Bake? On this page of minecraft guide, you will find information on how to tame or cat. This way you will get your first companion. Tame tame cat tame dog PiesDogs are, for all intents and purposes, tame wolves, which get the collar and look change. The dog responds to sit/even/attack orders and is very effective against the mob. To tame one, you need meat and/or bones. Approach the wolf and feed it by holding the object in your hand and pressing the action button. After several attempts, you can call it to you. Taming catcatTaming Osilot (to make it a cat) is similar but, you need to serve ocelot with soot. Cats are certainly more difficult to tame, but can help by keeping reptiles away. It is better to catch the ocelot with bullets, to make it unable to escape. You need to carry a lot of fish with you, because the animal is, usually, not easily tamed. Between successive bits of serving fish, you need to take some time. After taming it, the cat will change its color to black, white, black or ginger. Next Pig FAQ - How to Ride?
