Remind is a communication platform for teachers and students to talk to each other. Web software also has several useful features, such as sharing files and translating messages. This platform is designed for both offline and online teachers. As a teacher, you can send schedules, photos, files or even quizzes through messages to all students. Remind acts as a social network for educational purposes. Professors can easily contact their students as well as their parents without having to request personal phone numbers or emails. The website can also tell you if all your students have received your message or if someone is missing it. Educators start by creating a class that can function as a group in certain social networks, this is where teachers message everyone in the classroom. The platform also allows you to send private messages to a student or his parents. This makes educational resources such as Powerpoint lessons accessible to each participant. Parents can also see your messages. All documents, spreadsheets, and other files are available under the Files tab for everyone in the class to access. Integrated Platforms and Other Features Educational Platform also supports other resources to help you with class abilities. This includes a Google class that provides students with course jobs and their grades. You can also use a monkey quiz and review for exercise or after-school activities. Another way to recall can help you is the translation feature. You can translate any posts on the site into some of the most commonly used languages, such as Spanish, French and Korean. This can help you understand what your students can say. It also allows you to communicate with people who can only speak a particular language. Where can you run this program? The Remind website is available through any browser. You can also use a mobile phone app that is compatible with android 4.4 or better phones, as well as iOS 10.0 and up. Is there a better alternative? A good alternative to Remind is Twiducate. A social media app that provides a private platform for both teachers and students. The app is compatible with Google Docs and YouTube. Remind fulfills its goal of providing you and your students with a social media platform for effective messaging and sharing. It also goes beyond its function with integrating other websites and platforms such as Google Docs. You can also contact international students or teachers with Remind. The only limitation of the site is the 140-character limit, which is similar to Twitter. before it doubled the character limit, will you download it? Yes, a free account provides teachers with the tools they need to communicate and provide resources to the class. Apple Music is a great system, overshadowed by a terrible application with many errors. Songs will randomly get dropped from playlists, downloading music for Playback can be unreliable, and the app itself often crashes directly without warning. More images Play and listen to your favorite songs on your Android with Apple Music. Apple Music allows you to access your Apple Music account along with your own music collection and enjoy it on your Android smartphone or tablet. Apple Music offers a collection of more than 50 million songs from its catalog. You can browse and stream the latest songs, get hand-picked personalized recommendations from music experts based on the music you love, and view the best music curated by the service's editors. The service also offers a radio-like system that allows you to discover new music and tune in to radio shows, interviews and more, either on Beats 1 or at stations made by Apple editors. You will also get to connect with your favorite artists by learning about their inspiration and effort with photos and videos as well as their music. Apple Music lets you create playlists in the app that's transferred to all devices. You can mix in your own local files with music from the service. Visit Tom's Guide for free Android apps and for the latest news and apps. And if you have any Android problems, check out the tips on the Tom's Guide forums. Download aa_editors_tip This is a list of applications for drinking water as people. If you are here looking for an app to remind you to water your plants, we recommend our best gardening apps for the Android list! (/aa_editors_tip) Most people don't need an app for drinking water. We just don't go through it much in a day. However, there are some people who could definitely use the water reminder app. There are people who hike or exercise a lot where water consumption is important. There is no ton of variance in this space on a mobile phone. These apps remind you to take drinks at regular intervals and track how much you have consumed. It's simple, simple, and most apps don't mess it up. Here are the best water reminder apps for Android! Hydro - Water Drink Reminder Price: Free/\$2.99 Hydro is a totally serviceable water reminder app, and it's a good place to start this list. The app includes what we consider to be the main functions. These features include a water demand calculator to see how much water you really need. It also comes with reminders, water-tracking diagrams, cloud backup support, cross-device synchronization, and support for about ten languages. The premium version removes ads and provides additional backup options. It looks good and it worked in our testing. We can't ask for much more than that. Jump Fitness Drink Water Reminder Price: Free/\$2.99 Leap Fitness has a bunch of fitness apps on Google Play. One is a water reminder app. This is another app that does everything we imagine you need in an app like this. It tracks your water intake, reminds you to drink water, and you can see your history of drinking water. It also has synchronous support for Google Fit, Samsung Healthcare and creating an account through Google. It also has backup and recovery options from the cloud. It uses a material design and is easy to use. As a Hydro, we can't find anything really wrong with it, and all the features work well. The premium version goes for \$2.99 as an in-app purchase. Water Time Price: Free/Up \$2.99 Water Time is a quirky water reminder app with an adorable little mascot. He does the basics for sure. You can track how much water you drink each day and get reminders to drink water if you slack. It shows you how much you need to drink during the day and actually warns you to stop if you drink too much. It also tracks coffee and tea consumption as well, and we liked that extra tracking feature. It does not track your daily, weekly or monthly statistics very well at the time of writing (October 21, 2018). However, some developers feedback from Google Play reviews promises that feature in future update. This update should add a much needed boost to an otherwise perfectly enjoyable app. The to-do list app works too Price: The Free/Varies A list of apps is a worthy way to remind yourself to drink more water. It obviously doesn't have the tracking function of some of these other apps. However, this is a good solution for those who don't need or want to track every ounce of (or ML) of water, but still want to make sure they drink more. TickTick, Todoist, and Microsoft To-Do are great options in this space, but there are many others. We have our best to-do list of apps linked to the button above if you want to see these options. All of them support repetitive tasks, so adding a reminder to drink water every day shouldn't be too much of a deal. In addition, they can help organize your life in other ways too. Google Assistant and similar reminder app Price: Free/Varies Reminder apps may actually be better for this than to-do list apps. Reminder apps provide quick reminders for different tasks throughout the day. They're not as heavy as the to-do list apps, and let's face it, it's a list of water reminder apps, not a list of water apps. Either way, Google Assistant has a reminder feature if you want to go down the personal assistant route. Google Keep has reminders, like life reminders and reminders of life. As a to-do list option, we'll have our best reminder apps connected up on the button above if you want to see The best of the best. They are usually free with different costs. CHECK OUT OUR LIST OF BEST REMINDER APPS! If we missed any great water reminder apps, tell us about them in the comments! You can also click here to check out our latest Android app and game lists! The world of music streaming is huge. Gone are the days when they bought and listened to the songs of individuals, as there are more than enough of them there who want to give you access to millions of titles for just a few dollars each month. Spotify and YouTube Music are some of the most popular services in the Android space, but have you ever thought about giving Apple Music a shot? Yes, Apple's music streaming service is available for Android devices, and for some people, it can cost \$10 each month. Want to know more about everything Apple Music has to offer? Here's everything you need to know! Apple's take on streaming music is worth a look. Even if you're a die-hard Android user, Apple Music is a worthy contender in the music streaming space. It has a huge library, useful features, and a generous free trial that lets you test drive it for three months with no money down. As a way to keep people in your ecosystem, most apple services are exclusive to Apple products. However, Apple Music is one of the few where this rule does not apply. While you can get Apple Music on your iPhone, iPad and Apple Watch, you can also download the Android app and use it without any problems on your favorite phone from Samsung, OnePlus, Google, etc. - no Apple hardware required. You will need to create an Apple ID in order to use Apple Music, but you can do so directly from the Apple Music app for free and link it to your existing email address. While we wish Apple has made more of its services available for Android, the process of using Apple Music on an Android phone is about as seamless as it gets. Make your account, choose the plan you want and you're ready to go. You can listen to over 50 million songs no matter what artist or genre of music you're in, most likely the songs you want to listen to are available on Apple Music. Apple boasts that Apple Music has over 50 million songs that users can access, and while it's not necessarily different from what's offered by the likes of Spotify, Amazon Music Unlimited, and other services, it's a nice assurance that you won't miss out on any of your favorite tunes. In addition to being able to access all the streaming songs available with Apple Music, you can also use the app to listen to any songs you've purchased through iTunes. However, keep in mind that you must have a paid subscription to Apple Music to listen to your iTunes library through the app. For you recommend music based on your preferences if you find yourself a little overwhelmed with all the songs at your disposal, Apple Music has a neat tool to make sure you can quickly access the songs you like the most. When you click on the For You tab for the first time, you'll through a process in which you tell Apple Music your favorite genres and artists. From there, he will take this information and customize for you a page with tunes he thinks you will love. If the recommendations aren't the best when you first start, don't worry. The Tech You use Apple Music and like/dislike the songs, the more it will learn your listening habits and better recommend music for you. Live radio is a nice change of pace similar to almost every streaming service out there, you can create a custom radio station in Apple Music based on a particular artist, album or song. In addition to this, you can also tune in to live streaming Beats 1 radio. Maybe it's just me, but there's something relaxing about listening to music and having a commentator chime here and there throughout the music that's playing. It's definitely more of a traditional radio setup than just creating a custom station, and while it may not be as personalized, it's a good change of pace to regular on-demand streaming and can help you discover music you otherwise won't listen to. In addition to the Beats 1 live program, there are also on-demand broadcasts that aired earlier in the week, and exclusive interviews with the best artists that you can listen to at any time. The library where you save your favorite songs/albums When you find songs that you really, really like, you can add them to your Apple Music Library. Here you can quickly find all your favorite music, along with options to sort it by playlists, artists, albums, individual songs, and more. There isn't anything special about the library that you won't find in other streaming apps, but it's a basic feature that works well and as expected. You can save songs for offline listening on a similar note, Apple Music also allows you to download songs for offline playback. Downloading songs is as easy as adding it to the library and then tapping the cloud icon to save a local copy on your phone. Once you've downloaded the songs, you can go to the settings and see which music is downloaded and delete the saved songs if you don't need them anymore or don't need them. There's no limit to how many songs you can download, as long as you don't max out the phone's internal storage. See what your friends are listening to with Friends Mix In an attempt to make the streaming experience a little more social, Apple Music has something called Friends Mix. Friends Mix is a custom playlist consisting of songs based on what your Apple Music friends are listening to so you can check out what they are currently grooving. Friends Mix is updated every Monday, which means that it is always up to date with the latest groove of your friends. There's an Apple Music app for Android Auto In addition to the Apple Music app for Android phones, you can also access the service through Android Auto. Apple Music made its Android Auto debut back in September 2018, and just like Android Auto apps for or YouTube Music, it gives you a clean and safe way to access your songs while in the car. Apple Music costs \$9.99 a month and comes with a three-month trial of the latest, but not least, let's talk about The favorite theme is the price. Apple Music has three plans to choose from, and they work as follows: Individual - \$9.99/month family - \$14.99/month college student - \$4.99/month Individual plan is something you'll sign up for if you just need access to one account, a family plan supports streaming up to six people, and a discounted college student option available to verified college students through UNIDAYS and can be signed for up to 48 months. Once these 48 months are up, you will be moved to an individual plan. No matter what level you've registered, you'll get a three-month free trial if you've never subscribed to Apple Music in the past. This means that you get three months to use the service to keep your heart without spending a dime. If you like it, just stay signed up and you don't have to pay anything for three months. If you find that Apple Music isn't for you, cancel your membership and enjoy the remainder of your free trial without having to hand over any cash. Apple's take on streaming music is worth a look. Even if you're a die-hard Android user, Apple Music is a worthy contender in the music streaming space. It has a huge library, useful features, and a generous free trial that lets you test drive it for three months with no money down. Down.
