Mandatory versions of Android : Ice Cream Sandwich (4.0.3-4.0.4) - Jelly Bean (4.1-4.3.1) - KitKat (4.4-4.4.4) - Lollipop (5.0-5.0.2) - Marshmallow (6.0 - 6.0.0.1) - (7.0 - 7.1.1) - Oreo (8.0-8.1)VLC\_Player\_v3.2.7-ultra.apk VLC is the best video player currently available for streaming video. Video. The app has won the trust of hundreds of millions of users, so you don't have to worry about the quality of this app. It appeared on different platforms and they all got a lot of interest from users. When users come to this app, users can get a lot better to be able to experience. So if users are looking for an app to play video, this is the best app on the market. Support for different file formats One of the most notable features of this application is that it supports all video formats that users can find on the market. Users should find the video online and use this app to play it, and the video will play perfectly. There is no need to mention some popular formats such as DVD or ISO; these are specific applications that can support. In addition, audio file formats that the app is not currently supported by, such as FLV, OGG, OPUS, or even WMA-VLC, the app also supports. This app can provide maximum support for users to get the best experience. A variety of genres Although it is a video player, this app is not limited to this level, but there are many other things. Regardless of the type of file, regardless of the audio file, the app is supported by the user. In this way, users can use this app to watch videos; Users can also use the app to play audio files and more. So users don't need to download too many different apps to perform different tasks. All users need is one app that is this app. This will save users plenty of space to do other things, and the feature will make the job much more convenient. Open files via streaming media In addition to allowing users to open video or audio files stored in the device's memory, this app also provides streaming video online. For example, if a user wants to watch a video on Youtube, the user doesn't have to watch it there. Users can use this to play videos that they want to watch, which is very convenient for users to manipulate the video. Watch videos or 360 degree photos there are many of them now, but videos or photos are shot in 360 degrees, so this app will give users this feature to use. This feature will help users view videos or images as widely as possible. But this feature can only be used when users have videos or photos in 360 degrees. Setting up audio or subtitles This app will give users the ability to customize the sound of videos or subtitles so that users can enjoy Well. Users can customize the size of the subtitles, depending on how users want. In addition, this app also provides users with a professional tool to customize the sound of the video.
