It's not every day that you torture the odd job like this, so how can you expect to know how to install a drinking fountain? That's where PlumbersStock comes in. This is not a standard setup. We have an amazing feature to add and discuss. When you're using the elkay's ZEL2O feature, it becomes even more difficult to work with. Even the most experienced handyman can struggle a minute or two with this element, so take advantage of this useful video guide. PlumbersStock's own West Harris walks you through the process and offers professional tips to make the job go smoothly. The function of the ZH2O is convenient and environmentally friendly, as it prevents waste, so we strongly recommend it when replacing or installing a drinking fountain. Install elkay Drinking Fountain For your convenience, if you prefer reading, here are the basic steps to complete the installation: Remove the mounting bracket To use your level to arrange the bracket and then put the anchor in the wall. Use wall studs if possible. Put the mounting bracket in place in case the rough plumbing did not match the entrance to the drinking fountain. You may or may not do it yourself. I'll scratch the fountain to the mounting bracket. Install the 2O bracket. Connect the water supply line. Install a water filter that fits tightly, but should install without problems if you have made the drainpipe properly. Attach outdoor accommodation. Connect the fountain and fountains of the zh2OBuy Elkay OnlineNow you know and we all know how much battle that is. Buy new Elkay fountains here at PlumbersStock! If you have any questions or comments, please leave them below and we will offer our experience in response. Check out our how-to-plumb page for other useful learning resources, just like this. We also carry parts of the water cooler at discounted prices. The Elkay activated sensor, loud water coolers and drinking fountains provide cleaner, healthier hydration. Flexi Guard bubblers provide flexible antimicrobial protection to protect against injuries and microorganisms. Installing the app: Installing a wall. See our selection of Advanced Gas Station bottles. ezH2O® the original petrol stations of the original Elkay bottle offer the main features and benefits of ezH2O. In models for numerous applications to fit your needs. Installing apps: Installing a wall and an inwall. See our selection of original bottle gas stations. Features Benefits ezH2O® Improved ezH2O® Original FillSafe™ Recognition (Filtered Models Only) Filter Recognition System detects a new Elkay filter and automatically resets the filter monitor light on the green. There is no need to fold by hand. X Low Energy LED lighting is an energy efficient touch that helps users see when their bottle is full and illuminates the dark corridors. The X Energy Savings Mode Programmable Cooling System can be activated at a time when the device is not being used to save energy costs. The X System Diagnostics Unit automatically checks the system to make sure it is operating within the normal level. Scroll through alerts on a visual display if a problem arises. X Easy Installation Only one power connection is needed. Everything comes in one box. The versatile two-tier cooler design allows for a standard installation of a high left/low-right cooler or alternative, reverse cooler setup. X Visual Filter Monitor (filtered models only) Green, yellow and red LED lights indicate the state of the filter and when the filter should be replaced. X X Exclusive green ticker™ informs users about the number of 20 ounces of disposable water bottles saved from waste by reusable bottles and cups on ezH2O. X X Hands-free Activation sensor operation and bottled lounge platform provide users with a contactless experience filling bottles. X X Fast Filling fills reusable bottles faster than a traditional fountain. X X Minimum splashing distributes laminar water flow, so minimal splash when filling reusable bottles and cups. X X Dedicated drainage bottles gas station dispenser and bubbles have highlighted drains, minimizing spray and cleaning. X X Antimicrobial Protection Key plastic components on the unit have a special ion antimicrobial drug drug that inhibits the growth of mold and mold. X X WaterSentry® Plus Filtration (optional) uses our industry-leading WaterSentry Plus filter with a rating of 3,000 gallons and NSF certified by NSF/ANSI 42 and 53 to reduce lead, Class 1 particulate matter, chlorine, taste and smell. X X ezH2O® Outdoor Bottle Filling Stations, designed specifically for outdoor installations, we offer a family of bottled gas stations ideal for parks and recreation areas, pools, golf courses, stadiums and schools and business campuses. Some of the models included in our original ezH2O lineup are also rated for outdoor use, such as our vandals and outdated models. Installing applications: wall installation and pedestal. Characteristics/Benefits of Increased Corrosion Resistance: Tube models are made with type 316 stainless steel, providing excellent protection against the elements. Heavy calibration design: Made of rigged screws that withstand stains and corrosion. Sealed resistance to freezing (optional): Models resistant to freezing are equipped with fully sealed airtight valves to keep water safe from contamination. Vandal Resistance: One-foot bubbles have a chrome guard hood that prevents pollution from users, and protects against airborne sediment and tampering. Stunning colors: Tube models are available in 12 bold colors. See our selection of outdoor tubular products. 1 2 3 4 5 6 7 8 8
