FOLLOW US Puffin Web Browser is an evil fast mobile browser. Once users experience the exciting speed of Puffin, the regular mobile Internet feels like torture. Puffin Web Browser includes Adobe-Flash-Over-Cloud 24/7 now without additional in-app-purchase. 🏹 Wicked Fast: Puffin speeds up mobile browsing by moving the workload from limited-resource devices to cloud servers, and resource-intensive web pages can run super-fast on your phones or tablets. 🛡️ Cloud Protection: All traffic from the Puffin app to the puffin server. It is safe to use public insecure WiFi through Puffin, but not safe at all for most browsers. 🚀 Last Flash: We continue to improve our cloud servers and provide the latest version of Flash Player through the cloud. 📶 Save bandwidth: Puffin uses its own compression algorithm to transfer web data to the device, and this can save up to 90% of bandwidth when regularly browsing the web. (Please note that streaming flash content or video requires more bandwidth than normal usage.) Features: Incredible page download and rendering speed Adobe Flash support over the cloud in the daytime (also running on Android 4.4) Download to the cloud (up to 1G per file) Theater mode for flash videos and games Virtual trackpad and gamepad Color theme for toolbar and sidebar Most JavaScript's Full Web Experience (desktop and mobile view) - Incognito tab: Automatic cleaning of your in-app browsing activities - Restrictions - Puffin Web Browser Data Centers are located in the U.S., and cloud servers can only access public websites from U.S. geolocation. local content, especially videos of local interest, may not be available from the U.S. due to geo-restrictions in their countries. , China, Saudi Arabia, United Arab Emirates) and some schools (e.g. in the United States).
