MICRO USB CHARGING PORT: This port allows you to charge the Afterglow wireless headset while you're in use. 8. WIRELESS TRANSMITTER: Connect the active USB port to the game console. 9. STATUS LED: - A flashing LED means that the headset is not paired or is out of range. A solid LED indicates that the headset and transmitter are successfully paired. The LED that is off indicates that the Xbox One has gone into standby or sleep mode. 10. PAIRING PIN-HOLE: Your headset and transmitter will come pre-paired, but if they're ever disabled, you can re-pair them by pressing a small button inside the pin hole with a small paper clip. SET UP: XBOX ONE ENGLISH 1. Connect the Afterglow wireless transmitter to an active USB port on your Xbox One console. The LED light transmitter will flash, indicating what it is on and searching your headset. 2. Tap and hold the power button on the power headset. The flashing LED on the headset's headphones will indicate that the headset is looking for a wireless transmitter. The successful connection is indicated by solid LED light on the ear cups and a beep. 3. If you've already logged in with an account when you connect an Xbox One wireless transmitter, you'll see an icon on the screen indicating the headset has been assigned to that particular account. Audio MODES ENGLISH Audio modes indicate the beeps heard in headphones. BASS BOOST: For those who prefer an extra kick at a low-frequency end, this mode adds depth to your explosions and rumbles without sacrificing crystal clear sound. This is evidenced by the upward beep. PURE AUDIO: Pure Sound offers a well balanced and wide audio experience that allows you to hear the game just like the game's developers are designed without additional improvements. This is evidenced by the downward beep. BATTERY AND CHARGING ENGLISH POWER AND CHARGING: Your Afterglow headset is designed to provide gamers with up to 16 hours of battery life on a single charge. LOW BATTERY: Your Afterglow headset will alert you to a sound tone when battery life is low. When the headset has about 10 minutes of energy left, THE LED cup lights The headset will be off, but you will still be able to hear your game and chat audio. It takes 2.5 hours for the headset to be fully battery-powered. You can use the headset while charging, connecting the Play and Charge cable to the headset and active USB port. LED CHARGING INDICATION: When charging, the ear cup lights will pulsate. When fully charged, the ear cup lights will stop pulsating, and remain firm green. When charging, the ear cup lights will stop pulsating, and remain firm green. SETTING UP: ENGLISH 1 MOBILE DEVICES. Connect one end of the grey 3.5mm auxiliary cable to the Afterglow headset and the other to the audio output of your mobile device. 2. Adjust the volume at will on your mobile device. 3. To turn on the headset while using the headset in mobile mode: Turn on the headset while disconnecting from the transmitter, press and hold the mode button for 10 seconds until the headset HAS LED flashing lights turn off. TROUBLESHOOTING ENGLISH MY HEADSET AND TRANSMITTER ARE NOT PAIRED - MAKE SURE ... To get out of passive mode, restart the headset by holding the mute button for 3 seconds to turn off, and then repeat to power again. While connected to a live USB port, you can re-pair the wireless transmitter by pressing the button inside the pin hole on the side of the transmitter until the LED light starts flashing quickly. While in off position, press and hold the headset power button for about 10 seconds until the earcup LEDs are firm. Your wireless transmitter and earcup LED headset should have solid LED light. Now they're paired. I can't hear others - MAKE SURE... Adjust the chat/game balance set until you hear the others clearly. I CAN HEAR OTHERS - MAKE SURE... - Your headset IS ON and paired with a wireless transmitter. This is evidenced by a solid LED on the headset headphones and wireless transmitter. Your microphone is not off. Click on the large MUTE button on the left ear cup to disable and not ignore yourself. NOTE: When you turn off the microphone, you will hear two short beeps. Click it again to get out of MUTE. I CAN HEAR GAME AUDIO - MAKE SURE... - Your Xbox One system is on and the wireless transmitter is connected to a USB port. Your headset is on ON. This is evidenced by a solid green LED on both wireless transmitter and headset headphones. Your volume is turned up. You've evenly balanced your game compared to the audio chat on the headset. Your headset is recognized by the Xbox One console. Check settings if you haven't received a notification from the console that it has been recognized. FRANCOIS MANUEL CASQUET-MICRO WITHOUT PHIL D'USE OF THE NOMENCLATURE OF FRANCE TRANSMETTEUR SANS FIL ANTIBRUIT SANS FIL AMOVIBLE C'BLE DE JEU C'BLE AUDIO ET DE CHARGEMENT DE 3.5 MM DE 6 PIEDS DE LONG PR'SENTATION DU CASQUE-MICRO FRAN'AIS 1.
