Your task is to drive the car so that it stops at the position that the game pointed out. It sounds simple because if you've ever participated in Grand Theft Auto (GTA) or Bus Simulator: Ultimate, you're already chunky with your ability to drive simulators. However, do not rush, the game has a completely different car console than previous games and the challenges in the game can be extremely sinister! Participating in the game, you will turn into a real driver behind the wheel with the task to complete the task of parking for money. On a car with many basic driving tools, the Real Car Parking 2 also appears about that thing in the screen interface. You will drive a car with the same steering wheel in real life. Tap and pull the steering wheel to make the car move in the direction you want. In addition, the levers, the brake pedals, appear on the screen with the same use as the real thing. ManyReal Car Parking 2 modes have many different tests and challenges. Game modes, including Starter Mode, Time Mode, Hard Mode and Hardcore Mode.Starter Mode, are suitable for beginners who are in the process of learning the game. The complexity of the levels will be the perfect first step for the beginner of this game. Time mode is a parking mode with a certain time limit. For a certain period of time, the player will have to complete the assigned task. Although the time is relatively convenient to complete the test, no one knows what happened in front of you. This mode attracts the haste and fuss that it brings, especially when playing at a high level. As for the hard mode and hardcore mode, I would like to confirm one thing, hardly really. Sinister problems often appear in these two modes. You will be put in unpredictable circumstances that you will never think of. But the mission is still a mission, try your best to get out of it!
