Before you start playing the song, you can choose from three different difficulties. If you choose easily, you will have three notes to play. If you choose a normal, four, and if you choose hard, five. Of course, when the more difficult the mode, the more points you get during the game. Some songs are incredibly hard to play properly in hard mode, so make sure you're really ready. When you start, you can only choose from four songs. As you play, however, improve payouts and earn coins, you can unlock new songs. You can unlock more than a dozen different songs in total. Guitar Flash is a great music game that will probably remind you a lot about Guitar Hero, but this version is perfect for touch screens. The game also does not take up much space, taking up less than 40MB. Play the notes at the right time and show everyone that you are a great guitarist. Choose between 3 levels of difficulty (light, medium and hard). 1 - Added search in setlist 2 - Error Fixed 3 - Updated List of Songs 4 - Multiplayer (Beta) Guitar Flash is a music game similar to Guitar Hero, where you try to play songs perfectly by clicking on the correct notes as they appear on the screen. HomeSetlistRankingMultiplayerCustomLive Category: Redes sociales Description: The description does not exist in this OS app: Android , Windows Phone Guitar Hero series had quite an impact on society a few years ago. Through various editions, we were able to pretend, within hours, that we knew how to play like a real guitar virtuoso. It all felt pretty close to the real thing, or at least that's what musically inexperienced thought. But, hey, dreaming is nice, and it's free. If you miss the thrashing of the guitar, feel free to install the Guitar Flash APK file on your Android. Play the notes at the right time and show everyone what a great guitarist you are. Play solo or challenge your buddies This game offers you an entertaining musical experience directly inspired by the Guitar Hero series. The developers of the application do not even hide it a little. Choose a song, level of difficulty and play all the notes at the right time to become the best guitarist on the app. Complexity levels are divided into: Easy: three notes. Average: four notes. Difficult: five notes. Use your special strength to get more points and climb to the world table. You can also unwind the experience by hooking up with friends, given that the game has a multiplayer mode using Facebook. This game may not have the same charm as the Guitar Hero series, simply because playing on a tablet or phone screen loses most of the realism of hitting the fret buttons on a plastic instrument. However, this is a great replacement that you can carry around everywhere. At least you can play this app on the street or in the subway without getting weird looks. Looks.
