Drive Ahead - a addictive arcade game on Android, in which the gamer expects a furious car duel. The game has a pixel retrography and appropriate musical accompaniment, which, of course, will please gamers-old-goers warm memories of the first game console. A simple and intuitive operation is implemented with two keys. Small levels easily fit on your mobile device's display. Gameplay is a kind of fight without restrictions on a specially prepared ring. Cars can move both on the ground and on special metal structures, which either resemble scales or break down into pieces. In Drive Ahead the challenge is to destroy the enemy's car. There are several ways to do this. You can hit his car with direct blows on parts of his car, organize an accident, as a result of which the enemy will put his head on the ground or hostile structure, as well as just push him out of the arena or drown. In the game for a complete victory will have to defeat the enemy at least five times. The fight itself is limited by time. If it lasts longer than the allotted time, circular saws begin to pour from the ceiling, which will accelerate the development of events, identifying the smartest player (or the luckiest). The game has a set of modes, among which there is multiplayer. Drive Ahead is a game for one device, but the fun of it does not diminish. In the end, let's give you advice: don't be afraid of driving back to a number of places, this opens up for you a wide range of promising tricks to fool your opponent. Dodreams Ltd.
