As a legitimate retailer for Cole haan, we can offer several replacement lens options, while maintaining the authenticity of your product. The first option is to replace your current lens with the original lens from the manufacturer. This is usually the best option for someone willing to pay a brand premium and also doesn't require a prescription lens because most manufacturers don't offer a prescription. The second option is to have our labs create lenses like OEM. This will look and feel like original but will not have any sign (if any) that comes with the original lens. Tell me about the original Cole Replacement Lens haan! When Cole haan created their glasses frame, they made additional replacement lenses based on what they felt was the market need. These replacement lenses are stored in their warehouses and are available to any retailers authorized to buy on behalf of their users. This will be the same as the lens that came originally in your haan cole frame. When time passes and these replacement lenses are purchased or discarded and their availability and prices change, almost daily. Because of these issues, we don't allow our customers to put these items in their online shopping cart. The only current way to order the original Cole Replacement Lens is to contact our customer support team and have your model, size and cole haan frame color. This information can be found in the interior of your temple. What about your Cole Replacement Lens? We manufacture replacement lenses for all major brands and Cole haan is no different. The condition of our art machine has been making prescription lenses and lenses for more than a decade and not only that, we have a 90% satisfaction rate on all our custom lenses. Not only are we confident about quality, we are also positive you will love the style because they will match almost identical to your old lenses. If it sounds like we push our lens over the original Cole Replacement Lens. It's because of us. Our lenses are cheaper in price and usually better in quality. You can also customize it by changing colors and colors, adding mirrors or photocomic options, and you have a 30-day money back guarantee on everything. If it's not what you want, take all your money back. We've been in business for a long time back, happy customers and we want to make you one too. If your glasses break or don't fit properly, our team can make adjustments for free. Our staff is experienced in glasses repair and maintenance. Let East Eye Care shows you how to make your frame last. Harmful rays of the sun can damage not only your skin, but also your eyes. Protect your eyes from damaging UV rays by transitioning photocopying lenses. This lens is clear and turn dark outside the house. They block 100% of harmful UVA and UVB light rays. Transition lenses optimize your vision in every situation as they quickly brighten and darken depending on the amount of UV light. The lens reflects disrupting the optimal vision. This results in eye fatigue, especially on computers, tablets, or driving at night. Reflections also create unwanted cosmetic lens disorders. Anti-reflective backlash can increase the amount of light that reaches the eye by 15%. This increase in light transmission reduces eye strain and glare at night while at the same time improving your appearance. See our great discounts on glasses and contacts.
