Dynamic and exciting combat game MARVEL Contest of Champions will allow fans of wonder-comics to finally determine, which of the heroes of this universe will win in a one-on-one confrontation: the nimble Spider-Man or Wolverine is a cruel, caustic inventive Deadpool or Iron Man, the silent temper of Groot or rocket Raccoon.Winner of primitive power, Chanelier Tiwana, better known as the Collector, enters the champions in huge crystals and forces them to fight with the team of The Conqueror. More than 40 fighters can take part in the duels, each in the collection of combat techniques has a regular blow, strong blow, block and special attack. You can include both heroes and villains in your squad, but the right choice of companions and costumes allows you to get a nice bonus in battle. Over time, the characters will gain experience, equipment and develop new features, so boring in Marvel: The Battle of The Champions simply does not exist. Tips for the Game marvel Competition Champions APK Whether you are new to this kind of games or not, the Marvel Competition of Champions APK has some unique features that you need to know if you are going to succeed in the game. Here are some of our best tips to use when playing - beginners and pros pay attention, there's always something new to learn! Notice the cool bonuses. Some classes will deal much more harm to some opponents than others, and some will have much higher protection against certain opponents. It is important to learn the basics of the bonus system class - they will be explained to you in the game. Just make sure you pay attention to it and don't write it off as minor. No. Level your high ranking heroes first. You may be tempted to align your 1 star heroes to bring them more according to the rest of your team, but don't do so. It's best to upgrade your 2 and 3 star heroes before anyone else to get the most out of your special abilities. Priorities are higher ranked heroes and then level up to weak in later. Don't miss the Arena fights. The benefits of arena fights are fundamental to the game - although you may lose your winning streak. However, don't give up the opportunity to show your stuff against another player in the arena if you're not at all sure that you can win. Hold on to your heroes. Don't be tempted to sell your heroes for quick money, even if you think you don't need them. You'll be surprised at how quickly you'll regret it. Even low class heroes can be roated through the Arena list and you'll earn more crystals for that. In addition, there are three three arena fights that actually require you to have a low hero stat in the lineup. For these reasons, it is important that you don't get rid of your heroes in the game! Crime is the best defense. During the battle, we recommend that you go straight into the attack, rather than wait for the enemy to come to you first. The reason for this is that you immediately weaken their HP and then you can score bonus points against them in a weakened state. It's much better to do this than to let them come to you first, as the opposite will be the case if you do so.
