PDF format is one of the most used for sharing documents, the advantage of this type of file is that they can be viewed on any device in the same way without any formatting issues. Of course, editing, merging or sharing these files is one of the possibilities offered by the software. The free tools that allow you to perform this type of action are actually numerous, and you can choose free programs and browser-enabled online services to download to your computer. The reasons why you may need to merge two PDFs or split a document into multiple sections are different. Consider a case where you only need to share part of a specific document with others. Programs to combine and share PDF freepdfill PDF ToolsPDFill PDF Tools is a free program that offers a variety of tools to work with PDF files. The graphical interface is certainly not very modern, but its use is very simple. Click the Merge PDF Files button to use the PDF file merge tool. You can select files individually or upload all pdf files to a single folder. You can then sort the documents as you wish into a new file. Click the Share or Resend Pages button to download the file for share, there are options to choose whether to extract each page in a separate file or whether creating a file contains a specific range of pages. As mentioned above, there are other tools included to edit PDF files as well. It seems possible to add watermarks, convert PDF and PDF images to images, rotate and crop documents, sort pages, and add data such as author and title. PDFTK BuilderPDFTK Builder is another program of the union and pdf division is an easy-to-use tool. The application launcher displays an interface that is divided into multiple tabs. To merge PDFs, click Join Files. Use this tab to download the documents and sort them as you wish. You can also specify the pages for each document uploaded that will be used to create a new file. You can also set a password for a new PDF file. To cut PDFs, click Share instead Share; In this case, there are no options, and each page of the document is saved in a new file. Among the other features available, we highlight the ability to rotate pages and add watermarks to a PDF. PDF Split and MergePDF Split and Merge is another solution for sharing and connecting a PDF. It is a program developed in Java that can be used on Windows, Mac and Linux. The interface is very simple, launching the software, we will find a window divided into two parts. Clicking on the left menu association opens a tool for merging PDFs. When you click Share, click Tool to share PDFs. Among the other options available, we highlight the possibility of rotating pages. PDF ShaperPDF Shaper is another free program for Windows that allows you to put multiple PDF files in one file and separate the document into several PDF files. When the software starts, a window appears with all available features. To share the files, click Share. This opens a new window where you can download the documents you want to cut. The options are limited, but you can specify the pages that you want to extract from the file. When you click Merge Window, click Merge Window to select the attached files. Also in this case, the use is very simple, just select the files on the hard drive, ask for them the way you want and start the action. Note that PDF Shaper, like the above programs, also includes other pdf editing tools to extract text and images in documents. Combining AND editing PDF onlineSmallpdf.com provides a variety of online tools for editing PDFs. If you want to share your documents, you need to click Share PDF, thereby opening the page where you can upload the files. The download can be done by selecting documents on your hard drive or through Dropbox and Google Drive. When the download is complete, the page displays a preview of the pages that make up the document. Therefore, you can select which file to include in the new file by clicking Mouse. To merge documents, click Merge PDF. This opens a page through which you can select which files to send from your computer. Once the download is complete, you can select the page mode and file. In file mode, you can sort only the downloaded files and start the merge. Instead, in page mode, you can select the pages that you want to include in the new file and sort them as you wish. Interestingly, pages can also be sorted by adding them from one file between pages in another document. The service is free and can be used without registration.
