With Box, you can safely store files in the cloud. You can also access information wherever you are at any time. This intuitive app syncs information from your desktop and phone. It is a handy tool when you are in meetings or away from your desk. With Box, you can share the necessary files with your colleagues or update documents from your mobile device. There's also the ability to view different types of files and enjoy full-screen quality. When you install Box, you get 10GB of cloud storage for free. You can add extra security to more sensitive files with file-level security controls. You can access your information and folders offline for added convenience. You can view documents and stored files using a real-time search tool. There is also an easy way to share large files with friends and colleagues. This is done through the link-sharing method. All you have to do is copy the automatically generated link and you're good to go. It's a versatile cloud storage program because you can save photos and videos too. The download speed is slow at times, but in most cases it depends on your network connection. Box is a secure, fast, and user-friendly system to manage important files wherever you are. If you have a phone, you have access to all your important information and folders at the touch of a button. Where can you run this program? This app requires Android version 5.0 and up. Is there a better alternative? No. Box is a reliable cloud storage system for Android phone users. DropBox works in a similar way, but with less space. Switching to cloud storage makes it easier to access files. Box is a safe and secure place to store your information. It's an effective tool and a top-notch folder management option while you're out of the office at any time. Should you download it? Yes. If you find yourself away from your desk and need critical information on the go, this is an effective system to use. Remind is a communication platform for teachers and students to talk to each other. Web software also has several useful features, such as sharing files and translating messages. This platform is designed for both offline and online teachers. As a teacher, you can send schedules, photos, files or even quizzes through messages to all students. Remind acts as a social network for educational purposes. Professors can easily contact their students as well as their parents without having to request personal numbers or emails. The website can also tell you if all your students have received your message or if someone is missing it. Educators start by creating a class that can function as a group in certain social networks. This is where teachers message everyone in the classroom. The platform also allows you to send private messages to a student or his parents. Parents makes educational resources such as Powerpoint lessons accessible to everyone. Parents can also see your messages. All documents, spreadsheets, and other files are available under the Files tab for everyone in the class to access. Integrated Platforms and Other Features Educational Platform also supports other resources to help you with class abilities. This includes a Google class that provide students with course jobs and their grades. You can also use a monkey quiz and review for exercise or after-school activities. Another way to recall can help you is the translation feature. You can translate any posts on the site into some of the most commonly used languages, such as Spanish, French and Korean. This can help you understand what your students can say. It also allows you to communicate with people who can only speak a particular language. Where can you run this program? The Remind website is available through any browser. You can also use a mobile phone app that is compatible with android 4.4 or better phones, as well as iOS 10.0 and up. Is there a better alternative? A good alternative to Remind is Twiducate. A social media app that provides a private platform for both teachers and students. The app is compatible with Google Docs and YouTube. Remind fulfills its goal of providing you and your students with a social media platform for effective messaging and sharing. It also goes beyond its function with integrating other websites and platforms such as Google Docs. You can also contact international students or teachers with Remind. The only limitation of the site is the 140-character limit, which is similar to Twitter, before it doubled the character limit. Should you download it? Yes, a free account provides teachers with the tools they need to communicate and provide resources to the class. Watch videos from the Internet from YouTube for Android. This is the official app that allows you to watch videos from the Internet directly on the Android device. YouTube works just like its web version: subscribe to channels, search videos, see recommended videos, share videos and that it also has voice search and instant search suggestions. You can also throw videos on tv, comment on videos, and also loved and disliked them and letting the world know how you feel about said video. Enjoy watching YouTube videos for Android. Check out Tom's Guide for more information android and Android Games. Also check out the forums for Android. Download Let your food and drink orders be delivered to your address with delivery.com for Android. delivery.com this is a free app for That will help you get food and drink orders to be delivered right on your door steps. Please check out Tom's Guide for more interesting apps and the latest tips on Android. And you can go visit Tom's Guide Forums for any concerns about your Android. Download if you want to change the way your Android device looks, you can easily get Android themes for free from the Google Play Store, but their installation may not be as easy as you expect. This is partly due to the fact that modern Android devices are much more customizable than in the past. On the new Android models, you can customize everything from icons to keyboards, and even wallpaper, lock screen, and text on your device. To make things even more difficult, most Android devices are already configured with leather - this is a user interface created specifically for the brand phone that you have. For Samsung, it's called the Samsung Experience or Samsung One user interface; HTC phones have HTC Sense; LG Phones have LG Home Launcher; Pixel phones have Pixel Launcher. These different user interfaces mean how you add themes to your Android device varies, depending on the brand of the phone you use. The information below should apply no matter who made your Android phone: Samsung, Google, Huawei, Xiaomi, etc. Because Android phones have so many different user interfaces, phones from one brand may not have the same themes available as on another brand. These common steps should help you find and apply the free themes available to your device brand: These instructions may vary slightly depending on the brand and model of the Android device you have. Tap and hold an empty space on the home screen. Click Themes. Scroll through a list of free themes available until you find the one you want. When you click on it, you'll be taken to the theme description page. There, click Download. Follow on the hint screen to install and apply the theme on your device. The themes that are available on each device will vary and you may not be impressed with the choice. Don't worry. You can get other great themes from the Google Play Store. To install the themes you'll find in the Google Play Store, you first need to install a so-called launcher. As soon as you download the theme, open it and you will be asked to download and appropriate launcher. When this is done, you can apply the theme. Installing a launcher doesn't always automatically apply the theme. Go to the Play Store and My Apps Apps It's set to find a theme that you've downloaded. Click Open and the theme applies. Requires a CM Launcher, which you have to install in order to apply the theme. The Blue Silver Metal Launcher theme is perfect for any time of year (and goes nicely with Android phones that have blue cases). This sleek, sophisticated style is perfect for business people, and being able to customize the theme to match your style and use makes it almost perfect. One of the best features of this theme is the notification cleaner. If you get tons of garbage notifications, this theme has settings that will make them go away. No more debris in your shadow window. In addition, the free version of this theme is supported by advertising, but advertising is not intrusive at all. Download the Blue Silver Metal Launcher Theme requires a CM Launcher, which you must install in order to apply the theme. If spring is what you feel, the Pink Cherry Blossom Theme will definitely help you feel the warmth of the new season. This is another theme in the CM Launcher collection, which means you have to install a CM Launcher before you can apply the theme. Once installed, it's a theme that lets you customize wallpaper and icons, so you're not stuck with just the settings from the theme design. The theme also comes with the ability to hide the app, in case there is something you would like to stay away from prying eyes. Download the Pink Cherry Blossom Theme requires a ME Launcher, which you have to install in order to apply the theme. When it's hot outside, this topic will help you express how you feel. The flaming phoenix perfectly imagines how some summer days feel. It also serves as a reminder that something beautiful can rise from the ashes. This theme fits this description. Some icons have been completely replaced by flaming images. Others are surrounded by flames, but still easily recognizable. Including with the theme are some useful tools, too, including a booster that helps improve your performance, battery monitor, and junk cleaner. Download the Phoenix Theme requires a CM Launcher, which you have to install in order to apply the theme. Color fluorescent Black theme fun, party ready theme. The dark background sets bright icons, and 3D animations make flipping between home screens way more interesting than what you'll have with most standard themes. Like other themes in the CM Launcher group, there are many customization options, including background changes and icon appearance, so you can really make this theme your own. Download the color fluorescent Black theme requires a CM Launcher, which you have to install in order to apply the theme. If the peaceful and 3D themes for Android (free, too!) are on your list of requirements, 3D Koi Fish is the perfect theme. Three koi fish swim lazily around lining the pond when your phone is not in use (there are even even pads), but when you swipe the screen right or left, they float faster. Random water droplets also ripple across the screen when it is not in use, or if you touch the screen. In addition to aesthetics, this theme behaves in the same way as others from CM Launcher. Our only wish is that users can customize the fish in the theme. Download 3D Koi Fish requires a CM Launcher, which you have to install in order to apply the theme. When it comes to those home screens, CM Launcher knows what you like. The cute Cartoon Penguin theme is a good example. Featuring an adorable cartoon penguin as the centerpiece of this theme, the icons are all the smaller versions of the penguin on the iceberg. Customized animations, wallpapers and icons are also included in this cute theme. Download The Cute Penguin Cartoon Theme requires a CM Launcher that you have to install in order to apply the theme. As holiday themes for Android devices go, it's a good one. The app icons are all customized to holiday decorations and can be changed if you prefer a slightly different look. Like other themes from CM Launcher, this theme also has a performance amplifier tool, and the ability to hide apps in case your phone is compromised. Download the Christmas Santa Winter Theme Theme
