Edit Share Arcana Chance is a special event for Persona 4 that occurs after a successful shuffle time (including blank cards). Arcana Chances give a specific effect depending on the alignment of the Arcana Card. Up standing up has a positive effect, and reverse has a negative effect. In general, the effect lasts until a separate occurrence of 3-5 when the condition is triggered (i.e., successfully complete the battle or shuffle time sequence), otherwise the effect will wear out after a long period of time. The temporary effect will then be replaced by the temporary Arcana Chance effect. Effect [Edit &t; Edit Source] Arcana Card Upright Effect Reverse Effect Stupid Random Upright Arcana Card Effect.
