(1998-2002)GM Daewoo (2002-2011)Korea GM (2011-present)Production1998-presentBody and chassisClassic car (A)Body style5-doorLayoutTransverse front, The Chevrolet Spark (originally released as Daewoo Matiz) is a subcompact city hatchback car produced by General Motors subsidiary GM Korea. The first generation of Daewoo Matiz was
launched in 1998 by the South Korean division of General Motors GM Korea, formerly known as Daewoo Motors, replacing Daewoo Motors in 2002, under the sign of Chevrolet. The second-generation model was introduced in 2005, the third generation was released in 2010. In June 2013, a limited-
production version of the Chevrolet Spark EV was released in selected markets in California and Oregon. The Spark EV was the first generation (M100, M150; 1998-2005) of the first generation (M100, M150)ReviewAlso calledDaewoo Matiz, Matiz

facelift) Production of Daewoo Matiz began in 1998 and has been sold in Korea and many European markets codenamed M100. The exterior design is based on Lucciola, the 1993 Fiat Cinquecento concept of Italdesign Giugiaro, which was rejected by Fiat. The 0.8-liter gasoline engine and transmission were shifted from the Daewoo Tico, but are now using
a lot of tochester fuel injection system. The engineering business was carried out at the Daewoo Worthing Technical Centre in England. The car became the best-selling Daewoo model in Europe and India over the next four years. It was developed on the basis of Daewoo Tico, a version licensed by Suzuki Alto, with which both Tico and Matiz share
mechanics and suspensions. This origin derives from its characteristic narrow width, introduced by the Japanese tax category Kei car, which exempts from the need to certificate that the vehicle has proper parking. The Matiz was originally launched with only a 0.8-liter engine straight three. It developed a maximum power of 51 hp (38 kW), a maximum torque
of 68.5 H·mm (51 lb·ft) and had a combined consumption of 6.4 hp/100 km (44 mpg)... It had a top speed of 144 km/h (89 mph) and could reach 0 to 100 km/h 17 seconds. This engine was developed by Tico's division of the British company Tickford, based in Milton Keynes. The connection with Tikford was recognized in brochures distributed in SALONS in
the UK. It was released mainly with three trim levels: E, S and SE. The latter had air conditioning, wheel covers, body-colored bumpers, rear spoiler, fog lights and driver's airbag. In some markets it was also available with an automatic transmission. M150
(2000-2005) The M150-series Daewoo Matiz Facelifted M150-series Daewoo Matiz FSO Matiz Formosa (FAC) Matiz Pontiac Matiz Chevrolet Matiz Baojun Lechi This facelift was developed at the Worthing Daewoo Technical Center in England and is presented in South Korea in late 2000, and has been exported since 2001. The front structure was modified
to accommodate the four-cylinder engine, although the introduction of this engine, a 1.0-liter S-Tec unit, was delayed until after the takeover of Daewoo General Motors in 2002. The M150 is still manufactured by GM-Uzbekistan (formerly UzDaewooAuto) in Uzbekistan. The car was launched into the Russian market as Ravon Matiz in 2016, but soon ceased
operations. The Matiz update was sold under the name Daewoo Matiz II. Lechi In China the car was sold as a Chevrolet Lechi. It will be offered under the Chevrolet and Baojun brands during the transition period. Lechi has also received some powertrain
upgrades, making the car economical enough to qualify for subsidies and tax breaks from the Chinese government. and intellectual rights, as General Motors claimed the car was a copy of Daewoo Matiz. GM showcased the scale of the design remember, for example, that the doors and doors of Sparks are interchangeable without changes. GM China Group said the two vehicles shared a remarkably identical body structure, exterior design, interior design and key
components (MotorAuthority.com) and Car and Driver called it a carbon copy, while the International Herald Tribune called it a clone in a 2005 article. The Detroit News reported that the dispute reflects the confusion, risks and ambitions of China's new auto industry, where global automakers are battling pugnacious upstarts for a fraction of what could
become the world's largest automotive market. Второе поколение (M200, M250; 2005-2009) второго поколения (M200, M250)Шевроле MatizFSO Mat

The upper body has been significantly revised based on again based on the
design from Italdesign Giugiaro, S-Tec engines have been updated and the car's drag ratio has been lowered, resulting in better fuel economy. The interior has also been revised, with the twist-beam rear suspension system replacing the
previous 3-link beam axis, and the front suspension using a cast rather than pressed and manufactured, lower-hand control. In 2008, the 800cc engine was revised to fall below the level of 120g/km, thus qualifying for the UK's 35 pound road tax band and no London congestion charge. In Europe, it was sold under the names Chevrolet Matiz and Chevrolet
Spark. In Italy, there was a version of LPG called Chevrolet Matiz Eco Logic. Matiz Eco Logic was built from 2007 to 2010 in more than 60,000 BRC gas equipment vehicles in Cerasco, Cuneo ,Italy). In Korea, where it was sold only with an engine See and after the introduction of the M300 Matiz (Matiz Creative), the M200 Matiz was renamed the Matiz
Classic. It was sold in more than 2.3 million units for the first 10 years of production. As of 2011, VIDAMCO from Vietnam produces the Matiz M200 as a Chevrolet Spark Lite in full knockdown (CKD) form at its production in Hanoi. In India, the local manufacturer GM India has released two special editions of this generation: the Chevrolet Spark LPG, a
version equipped with a consistent set of liquefied natural gas, presented on World Environment Day in New Delhi, and Chevrolet Spark Muzic, presented in 2009. the back and narrows evenly to the front of the grille. The headlights, which appear to extend from the base of the using to the disc brakes. Double taillights, which extend upwards to taillights, are also LEDs. In early 2007, GM conducted a survey testing the
relative popularity of Beat, Trax and Groove concepts on the Chevrolet website, with Beat receiving nearly 50% of the vote, which ultimately determined the production of Daewoo Matiz Creative (South Korea) Holden Barina Spark
CDX (Australia; pre-facelift) Holden Barina Spark CD (Australia; facelift) GM presented a pre-produced version of the Chevrolet Spark sign at the North American International Auto Show, but at that time only the Beat concept was
shown. Production of the Chevrolet Spark was unveiled in 2009 at the Auto Show in Europe in the first quarter of 2010, followed by other markets around the world, and sales in the U.S. are due to begin in early 2012. Commercial production of the 5-door Chevrolet Beat began on December 15, 2009 in Halola, Gujarat, India. It was launched in India on
January 5, 2010, during the Auto Expo of New Delhi, India. The GM Daewoo Matiz version was unveiled at the Seoul Motor Show in Ctober. It was terminated in February 2018. With the M300, Suzuki's original platform was replaced by the
GM Global Small Vehicles platform developed by GM Daewoo engineers. In North America, Spark was first delivered to GM dealerships in Mexico in the 2012 model year, but did not replace the Chevrolet Spark went into production on April 16, 2012, and
arrived at dealerships in August 2012. In 2014, in North America, the automatic transmission is the Jatco M4M-CVT7, a continuously variable transmission (CVT), and the final drive ratio of drives relative to the previous 4,145 3132 reduces engine
noise and increases fuel economy on the highway while increasing noise and reducing fuel mileage in the city. Industry sources have commented on the current problems with the reliability of Jatco CVT transmissions. The 2013 Spark was the fastest-selling car in the U.S. in July 2012, just six days after they arrived at dealers when they were sold. Beat
diesel General Motors released a diesel version of the Chevrolet Beat in the Indian auto market on July 25, 2011. The 3-cylinder turbodiesel engine with a capacity of 936 cm with a capacity of 62.5 hp (46 kW; 62 hp) and 160.26 N·m (118 lb· ft) of torque, which leads to good acceleration and pickup. The 1.0-liter, 936 cm diesel engine can reach speeds of
100 km/h (62 mph) in 16 seconds and a top speed of 142 km/h (88 mph). The Chevrolet Beat Diesel offers a mileage of 24 kpl (56 mpg) according to ARAI (Automobile Research Association of India) test reports. The engine is based on Fiat Multijet diesel technology. The Beat sedan/notchback (NB) Chevrolet Beat NB (Mexico) Four-door sedan version was
presented at the 2016 Auto Expo in India as the Chevrolet Essentia. After GM stopped selling cars in India's domestic market in 2017, Essentia was cancelled for the Indian market. As a result, this model was exported to Latin America. In Mexico it is sold as Beat NB (Notchback). The Spark/Beat Activ Chevrolet Spark GT Activ (Chile) Crossover-style
version is also available in South America as the Chevrolet Spark GT Activ or The Chevrolet Spark GT Activ or The Chevrolet Spark GT Activ. The production version is available in several Latin America as the Chevrolet Spark GT Activ or The Chevrolet Spark GT Activ. The production version is available in several Latin America as the Chevrolet Spark GT Activ. The concept was demonstrated at Auto Expo 2016 in India, but the production version was never sold in India as GM withered off the market.
Chevrolet Spark (UK, pre-facelift) Chevrolet Spark (UK, pre-facelift) Chevrolet Spark (Canada, first facelift) Chevrolet Spark (USA, first facelift) Chevrolet Spark GT (Chile, second facelift) Chevrolet Spark GT (Chile, second facelift) Interior Europe: Engine choice includes 1.0 and 1.2-liter I4 engine. In Italy there is a version of LPG Spark Called Chevrolet Spark Eco Logic with BRC gas equipment according to the end of 2009. This bi-fuel
version is available with engines 1.0 and 1.2 (both with 16 valves) from 113 to 119 grams of CO2 emissions respectively. While LPG cars are still available in Italy, in France LPG versions were only available from 2009 to 2012. India: Production of the new spark, called Beat, began at the Halol plant near Ahmedabad in Gujarat, India. Initially, the car will be
sold in India and the Far East. The second generation of Spark is sold together. The car uses 1.2-I II engine, capable of gasoline and liquefied gas, is on the Market as SMARTECH II. GM India is reportedly to build an electric version of the Chevrolet Spark with Reva Reva Car company. However, after the acquisition of the Reva Electric Car Company by
Mahindra and Mahindra, GM India abandoned plans and is working on its own electric version in the U.S.: on the market as Chevrolet Spark, the car uses a special version of the engine S-TEC (RPO code LL0). Philippines: The Philippine version was built in 2011. The car has engines of 1.0 liters and 1.2 liters. LS (5-speed mechanical or 4-speed automatic)
and LT (5-speed mechanical). It was discontinued in 2015. Republic of Korea: The Matiz version has been renamed Matiz Creative. The car was
renamed Chevrolet Spark as part of a gradual abandonment of the Daewoo brand in Korea, making room for the Chevrolet brand. Australia: Spark was released in October 2010 as the MJ Holden Barina Spark series. He came in two guises; CD and CDX. Holden Barina Spark was released in October 2010 as the MJ Holden Barina Spark series. He came in two guises; CD and CDX. Holden Barina Spark was released in October 2010 as the MJ Holden Barina Spark series.
on August 26, 2010. It comes in three trim levels: L (1.0 litre manual), LS (1.0 litre manual), LS (1.0 litre manual), LS (1.0 litre manual), LS (1.0 litre manual). Russia: Iskra of Uzbek goods has been sold in Russia as Ravon R2 since 2016. It is available with a 1.2 L engine and an automatic transmission. Domino's DXP The Domino's DXP (short for Delivery eXPert) is the 2015 Spark,
customizable Roush Performance for Domino's Pizza, based on the mid-level 1LT-finish Spark, where it was transformed into a revival of the express car with a canopy that was popular from the 1930s to the 1950s. For this car, the front and rear passenger seats are removed and replaced with storage compartments that can carry 80 pizzas, two 2-liter
bottles of soda and diving sauces. The left rear passenger door is converted into a warming oven, which can only be unlocked with a black front grille with the Domino's logo, as well as a custom lower body kit, and all DXP cars have a custom Domino vinyl
wrap with a illuminated cylinder on the Domino's roof. All DXP vehicles are equipped with SiriusXM and OnStar satellite radio systems. Production is limited to less than 200 units and once each vehicle reaches 100,000 miles, it will be retired and returned to Rush, where it will be restored in the form of stock and sold as used by Spark (all four plant seat belts
and airbags remain completely intact, and covered with plastic panels). Despite the Domino's intention to eventually retire DXP and not leave any remaining, several destroyed DXP were rescued by private individuals with the intention of keeping them as rare cars when the rest of the fleet fleet The situation led to the threat of legal action from Domino's
franchisees. DimensionsWheelbase2,370 mm (93.5 inches) Weight 1,356 kg (2989 lb) is a limited 5-door hatchback battery, Chevrolet in 2013-2016. The Spark EV was a compliance vehicle specifically designed to meet the government's mandate for car manufacturers to increase the penetration of electric vehicles into the fleet of all operating vehicles on the road in
some U.S. states, but was not intended for broad adoption in the broader U.S. market, and is also produced and sold in quantities that will meet the demand for such vehicles on the open market where no such government rules exist. In October 2011, General Motors announced the planned production of the Chevrolet Spark EV, the third-generation
Chevrolet Spark electric version, with limited market availability. The production version was presented at the Los Angeles Auto Show in November 2012. As part of GM's electrification strategy, the Spark EV was the first all-electric passenger car to enter the General Motors market in the U.S. after the EV1, which was discontinued in 1999. Spark EV was
released in the United States in selected markets in California and Oregon in June 2013. The electric car went maryland in the second quarter of 2015, the first East Coast state where Spark EV was discontinued in December 2016 when Chevrolet began
selling the Bolt, which had a much longer range. In October 2012, GM Korea announced that it would start making and selling Spark EV in limited quantities in Canada and select European markets. It was available in Canada for limited fleet sales. The electric
car was originally equipped with a 21.3 kWh lithium phosphate battery supplied by A123 Systems. In white paper, in 2014, the production version featured a 97 kW (130 hp) engine providing 542 N·m (400lb·ft) of torque. The Spark EV can be quickly charged up to 80% capacity in 20 minutes with an additional CCS/SAE Combo Type 1 connector, and
charging time increases to about seven hours with a special 240-volt charging station or about 17 hours using a standard household 120-volt socket. In the 2014, 2015 model year, the battery supplier was changed from 3.17 to 3.87,
and the new torque engine was reduced to 443 H·m (327 feet ·lb). Fourth Generation (M400; 2016) Fourth Generation (M400)Adulo Review calledHolden Spark 72-Production2015-presentModel 2016-presentModel 2016-pres

inputs, as well as a rear-view backup system. The 1LT and above models also add SiriusXM Satellite Radio with a paid trial subscription enabled. Facelift, along with the Chevrolet Cruze and Chevrolet Malibu. Changes for Spark include a new third generation MyLink
infotainment system, revised external style signals, the addition of low-speed autonomous emergency braking (AEB) on individual models, and new external color options. In the U.S., The Spark facelift went on sale in the third quarter of 2018 as a car of the beginning of the 2019 model year. MY19 facelift MY19 Global Marketing and Manufacturing Asia In
India, it was launched in 1999 as Daewoo Matiz. In 2007, General Motors India launched the third-generation Chevrolet M3X concept as the Chevrolet spark. In Japan, Matiz was sold under the length, width and displacement of the engine
exceeding the kei rule. In the Philippines, Matiz was available during the 1999-2000s through the grey market. In 2007, it was released under the name Chevrolet Exclusive in 2003. From 2005 to 2009 it was manufactured by Nexus Automotive under the name Chevrolet Joy, which is now
replaced by the newer M200 series and is now sold as a Chevrolet Spark. In Taiwan, Matiz was sold under the Formosa brand from 2001 to 2009. Europe From 1998 to 2004, Matiz was sold in Europe under the sign Daewoo. In 2004, it adopted the Chevrolet brand, as well as other South Korean General Motors models such as Lacetti and Kalos. Since
2000, CKD kits have been delivered to UzDaewooAuto, FSO and Rodae, which will be built and sold in Uzbekistan, Poland and Romania respectively. In early 2005, FSO began marketing Matiz under its own brand. The new Chevrolet Matiz models are being sold as Chevrolet Spark in the UK, due to be renamed in 2010. In Mexico, Matiz was introduced to
the market in 2003. The 2006 model was renamed the Pontiac Matiz G2. It was also sold as Pontiac Matiz and Pontiac G2 was discontinued in Mexico after a short run of 2010 models as the Chevrolet Spark in August 2010, and Matiz continues to be
sold along with Spark. The M300-based vehicle is currently in production in Brazil as a replacement for the Chevrolet Celta. In Colombia, Matiz was imported by Daewoo distributors between 2005, and then GM Colmotores started and sell it under the Chevrolet Spark brand. In 2006, a version of the taxi called 7/24 was launched. In Costa Rica,
dominican Republic, El Salvador, Honduras, Panama, Uruguay and Venezuela, it is sold as Chevrolet Spark. In Argentina the first generation was sold as a Chevrolet dealers. A third generation has been available since 2011. In Chile, Ecuador and Peru
the former version is sold as the Chevrolet Spark, and the latest version as the Chevrolet Spark GT. In Paraguay it was originally sold as Daewoo Matiz, but since 2008 it has been sold through Chevrolet Spark GT. wheels w/black painted accents. The 2013-16 Spark EV 1LT and 2LT models were based on their respective petrol counterparts, although included unique fifteen-inch (15) aluminum alloy wheels, seat trim, and electric motor and single-speed automatic transaction instead of the traditional automatic or five-speed manual (or continuously variable transmission
(CVT).). The up-level 2LT finish included light blue accents on interior accent trim panels and Seat. For the 2017 model year, a new level of ACTIV trim has been added, which is based on the mid-set 1LT, but includes leatherette-trimmed seat surfaces up to level 2LT finish includes a unique exterior body kit, interior accent trim panels, unique fifteen-
inch (15) aluminum-alloy discs with dark grey-painted accents, and side roof rails that can accommodate roof cabinet accessories. In Canada, Spark was declared the most expensive new car in the country since the 2016 model year, the starting price was $9,988. For this price, the basic Spark does not include air conditioning, but comes with a manual
transmission. It competed with similar Nissan Micra prices (before discontinuing this car in Canada as of the 2019 model year). On October 2, 2010, General Motors (GMSA) announced plans to produce a new Chevrolet Spark at the Port Elizabeth plant. The second generation Spark is still sold, although branded as Spark Lite. Middle East In Iran, Matiz was
produced (first imported and then collected) and known as Daewoo Matiz. In Israel, UMI (Universal Motors Israel) announced on January 18, 2011 the start of sales began in February 2016 and two specifications were launched.
The LS had a basic specification that had steel wheels, a central lock, and Holden's MyLink infotainment system. Backed by the LS, the LT adds 15-inch alloy wheels, keyless input and rear-view camera. In April 2018, Holden announced that It was discontinuing its sales of Light Car in Australia. Although, it continued to be sold in New York until the collapse
of the Holden brand in 2020. U.S. S.
