More Jurassic World Live Review About Jurassic World AliveJurassic World Alive Alive: Its Time to Hunt Dinosaurs in the Real World. It seems that the success of Pokemon Go, as an augmented reality game, 2 years ago really inspired other developers to create this genre of games. Making sure there will be 2 famous franchises that will be present in AR games, Ghostbuster and Harry Potter, only developers Ludia and NBC Universal are working together to bring these prehistoric animals to an AR-based game called Jurassic World Alive. It is planned that this game will be released for the iOS and Android platform, and now the developer has opened a pre-registration period on the official website Jurassic Wolrd Alive. The developer says there are about 100 species of dinosaurs, including some exclusive dinosaurs present in the Jurassic Wolrd films franchise. Just like Pokemon Go, you can capture dinosaurs with a real background when you are closer to your hunting dinosaurus you will hear the sound of a dinosaur which will mean that you are getting closer to your game. Interestingly, this game presents some rather interesting features, one of which is a laboratory system where you can create your own version of dinosaurs by combining the genes of each dinosaur that exists. It seems that in 2018 mobile will have 3 AR games from famous franchises, we should Does Ludias and NBC Universals game able to compete with Harry Potter master wizard made by Niantic, or Ghostbuster World, made by developer Next Age. It's interesting to see. Jurassic World is alive, a hunting game for dinosaurs like Pokemon GO. The sophistication of technology in the field of mobile devices can not only be felt on a variety of interesting features in smartphones, but also games do not want to miss. In Jurassic World Alive, the smartphone's ability to detect the position of its users using GPS satellites is used as a Pokemon GO game. But instead of catching a cute monster, your hunting is a ferocious dinosaur! Inviting players to move, due to the nature of the game that uses GPS satellite tracking to detect your position, you will be asked to move on to hunting dinosaurs. If you have never played Pokemon GO, then you may be surprised to play this type of game. To be successful in this game, you have to mentally prepare the steels to keep moving, unlike most games that actually make you not move. Dinosaur hunting in Jurassic World Alive will be displayed on your smartphone screen as a map that matches your area. The longer you go, the more likely you are to find dinosaurs roaming the map. Sometimes you can find rare dinosaurs after walking. Dinosaurs have habitat, just like dinosaurs that you often see in movies or books, Dino in Jurassic World alive also has habitat that they like. For dino who love water areas, then you have to find places that have water such as lakes or times. There are also dinosaurs that like to gather near a crossroads or a park. Once you find it, the next step is to catch it. In Jurassic World Alive you will find a mini-game in the form of shooting dino from the point of view of the drone. After successfully shooting several times, Dino will drug and become your new collection. Collecting dinosaur DNA, every time you catch a dino, Dino's DNA will be yours. The point is to be united into a new, strong Dino. But to get the right DNA, you need to hunt it and often more than once. This is the appeal of this game. Jurassic World Alive mods allow unlimited cash. You can convert cash into unlimited coins. You can also get fragrances here. Even you can create new types of dinosaurs, like in the Jurassic world. Not only does power increase, the nature of Dino, whose DNA is united will also appear there. If you combine a nimble and smart Raptor with a big and powerful T-Rex, the results will be awesome! So many variations of dino can be educational material for children, especially like dinosaurs. Combined with the nature of the game, which invites players to keep moving, this game will make children not to be silent and fat. But pay attention not to get them looped on your smartphone screen to Dino, not looking outside! Arena Fighting With Other Players, Once You Manage to Get a Strong Dino, What's Next? Of course, pitted against another Dino! Dino! Some positions on the map, you can find the entrance arena. The arena contains dinosaurs that you can conquer. The more dinosaurs have been defeated, the more prizes you can get. The prizes are mainly to improve the dino's ability to be better. You can also fight with other players. Through the ranking system, you and other players will compete to be the best. The form of combat is also very interesting and exciting, because the dino will immediately fight on the screen. The player only needs to order the type of attack and skill used by Dino, because then the dino will fight on his own. Using money or cash in the Jurassic world live cheat engine will stimulate your progress. You can try to catch other dino to become yours. An interesting feature that we like is that Jurassic World Alive players can use cameras with augmented reality (AR) function and put the dino that you have in the real world. Of course, it doesn't seem real, but only on a smartphone screen. However, Dino will move like when it is in a position where your camera points. Very impressive! Conclusion, Jurassic World Alive is a very interesting game based on GPS to play. If you are a gamer who prefers action in the game, then this game is perfect for you. Plus the visual quality is high, and the details of the dinosaurs shown in the game are also high. The dino movement also looks natural and will certainly make you stunned. Try playing Jurassic World alive if you like Pokemon GO! The conclusion of the Jurassic world of living cheats provide unlimited everything indirectly. You can use the money to buy most of the premium item in the game store.
